

Withdrawal Of  
All Foreign  
Troops Urged

Tokyo, Tuesday (AP)—President Syngman Rhee has offered Gen. Mark W. Clark a compromise proposal aimed at restoring unity between the Republic of Korea and the United Nations Command, an authoritative source said today.

The U. N. commander, who is in Korea for conversations with Rhee would say only after his meeting with the ROK President yesterday that he was "encouraged." He saw Rhee again today before returning to Tokyo.

Rhee reportedly has advised Clark by letter that he would withdraw his South Korean divisions from the U. N. Command if a Korean armistice is signed on the present terms.

ROK troops now man three-fourths of the battle line.

Rhee's compromise is said to be this:

One—Withdrawal of all foreign troops from Korea, including Chinese and U. S. forces.

Two—A mutual security pact with the U. S.

Three—A time limit on a peace conference, stipulating that the war would be resumed unless the political situation in Korea is settled within three months after the armistice is signed.

There was no one around Tokyo who would say what Clark had told Rhee in reply yesterday, but it was understood generally that the U. N. commander was endeavoring to get the South Korean President back into a cooperative mood before the arrival here tomorrow of Walter Robertson, assistant secretary of state for Far East Affairs.

Robertson is carrying a message to Rhee from John Foster Dulles, secretary of state.

The first two points in the ROK President's proposal are old, but the third point is new. Under the draft of the armistice agreement a political conference would start in 90 days and be limited to one month. Rhee's request cuts the time table down a month.

U.N. Nations  
Urge Rhee To  
Cooperate

United Nations, N.Y. (AP)—The Asian-African group in the U.N., agitated over the freeing of North Korean prisoners of war, urged ROK President Syngman Rhee yesterday to co-operate with the U.N. for an armistice.

It decided also to give the United States and U.N. officials full opportunity to obtain this co-operation before demanding an emergency meeting of the 60-nation General Assembly.

These decisions were made at a meeting of the 16-nation group, with Manila's delegate, Salvador P. Lopez, pressing as chairman.

The Asian-African group contained members who have been making strong talk about the need for an Assembly now. A statement was issued after the meeting, however, saying the question of calling the Assembly back would depend on further developments in Panmunjom and on the forthcoming talks of U.N. leaders.

An unofficial U.N. poll showed the majority, including the United States, is not yet ready for such a meeting but sentiment is building up for it among the frustrated diplomats.

For the Record

NEGROES AND THE  
McCARRAN ACT

(Mr. Schuyler, often called America's leading Negro journalist, has written several books.)

At a recent Harlem meeting commemorating the founding of the first Negro newspaper, *Freedom's Journal*, in 1827, a prominent white lawyer strongly criticized the 200 U. S. Negro newspapers because they had failed to oppose the controversial McCarran Immigration Law.

He felt that American Negroes should oppose it because of its retention of racial and national quotas which, he said, discriminate against Orientals, Africans and particularly Eastern, Central and Southern Europeans.

He also scored provisions which seem to infringe upon our traditional right of asylum and make more difficult the entrance and naturalization of aliens from totalitarian countries.

The audience of Negroes listened politely but it was apparent that the argument left them cold. The following week no Negro

Committee Formed To Fight Highway Plan

Senate Democrats Take Lead  
In Rejecting Eisenhower's  
Small Business Loan Program

Washington, (AP)—Senate Democrats took the lead yesterday in rejecting an administration-sponsored proposal to set up a new federal agency with authority to lend 250 million dollars to small business enterprises.

The vote was 47-42. Democrats argued that the Eisenhower administration in effect was trying to set up a "little RFC" before Congress gets around to acting on a bill by Sen. Byrd (D-Va.) to abolish the Reconstruction Finance Corp., the government's biggest lending agency.

Voting against the proposal, already approved by the House, were 43 Democrats, one independent, and Republican Senators Langer (ND), Williams (Del) and Young (ND). Supporting it were 42 Republicans.

The proposal to set up a permanent Small Business Administration, authorized to make individual loans up to \$100,000 to small firms, was contained in a bill for a two-year extension of the Defense Production Act. The act governs federal authority to allocate scarce materials.

The over-all bill now goes back to a Senate-House conference.

South Koreans Recapture  
107 Escaped Chinese But  
Fail To Retake Anti-Reds

Pusan, Korea, (AP)—U. S. troops yesterday redoubled precautions against seething unrest among anti-Communist Chinese on Cheju Island and got back 107 Chinese prisoners who escaped here.

South Korean police quickly rounded up the 107 Chinese, presumably anti-Communists, but did not leave a hand to restore any of the more than 27,000 escaped anti-Red North Koreans.

The 107 got away Sunday from an interrogation camp at Pusan where they were being held prior to transfer to Chinese stockades on Cheju Island, 60 miles off the Southwest Coast.

The more than 27,000 Koreans started breaking out last Wednesday midnight from mainland stockades under orders by President Syngman Rhee which violated terms of an impending armistice.

On Cheju, U. S. troops had to use tear gas Sunday in putting down the second demonstration in two days by anti-Red Chinese demanding that they be released after the manner of the anti-Red Koreans.

Two thousand of the 14,000 anti-Red Chinese refused to form work details and tried for a time to thwart the effect of the tear gas by holding wet clothing to their faces.

The South Korean police had little trouble finding the Chinese who fled the Pusan camp. The escapees could not speak Korean. The police got them back the same day they fled.

But five days after the mass breakouts sanctioned by the South Korean government, little was being done to get them back beyond radioed appeals of the U. N. Command. These broadcasts had no effect. Little probably could be done, most observers agreed, beyond taking over South Korea by force at the risk of a South Korean uprising.

Supply Of Pork  
To Remain Tight

Washington, (AP)—Supplies of pork and most pork products will continue relatively tight for another 10 or 12 months if an Agriculture Department hog production report is borne out.

A department survey indicated yesterday that farmers will produce eight per cent fewer pigs this year than last. The crop would be the smallest since 1948. Last year's crop was 10 per cent smaller than the 1951 crop.

Cost Of Replacing Bridge  
Estimated At Over \$60,000

It will cost between \$60,000 and \$70,000 to replace the 69-foot bridge over McMichael's Creek which collapsed near Snyder'sville Saturday, a highway official estimated yesterday.

The bridge is not a county but a State-owned bridge.

It sagged into the creek Saturday afternoon. State police reported, under the weight of a tank-trailer and truck tractor operated by William Greaves, of Scranton, employed by Seaboard Trucking Co., Scranton.

State police from the Broadheadsville station began an investigation which is still under way, according to reports from the barracks last night.

One point under consideration is that there are warning signs

which had previously agreed to accept the House provision for a new federal lending agency to help small business.

There was no controversy over the two-year extension, but Democrats sharply attacked the House-approved idea for a "little RFC."

Sen. Byrd, a frequent critic of the former Democratic administration, criticized both the small business loan proposal and the Eisenhower administration.

The Virginia senator said he believes it would involve "costly outlays by the government 'at a time when we are running a heavy deficit without an immediate prospect of a balanced budget.'"

"And the Eisenhower administration," he added sharply, "has pledged itself to balance the budget."

Rhee Rebuked  
By Churchill  
For Treachery

London, (AP)—Prime Minister Churchill roundly denounced South Korea's President Syngman Rhee for "treachery" yesterday and warned that the United Nations has no intention of going forward to conquer all of Korea for him.

A cheering House of Commons greeted the Prime Minister's sharp attack on the South Korean President for engineering the release of thousands of anti-Communist North Korean prisoners just as U. N. and Communist negotiators near final agreement on a cease-fire.

Applause and expressions of approval came even from the Socialist opposition benches.

Churchill said it would appear only sensible to round up the released prisoners—as the Chinese and North Korean Reds have demanded—and said "it might be that reinforcements would be needed for Korea in order to enforce a policy of peace and good faith."

Churchill said it would appear only sensible to round up the released prisoners—as the Chinese and North Korean Reds have demanded—and said "it might be that reinforcements would be needed for Korea in order to enforce a policy of peace and good faith."

Jury Acquits  
Ag Official

Washington, (AP)—Clovie D. Walker, a former Agriculture Department official was acquitted yesterday of conspiring to give an Egyptian friend an illegal advantage in offering cotton for sale to this country.

A Federal Court jury returned its verdict after deliberating less than five hours.

Walker, former director of the Agriculture Department's cotton branch, went on trial April 13. The trial was one of the longest in a criminal case in the courts here in recent years.

Red Terror  
Continues In  
East Reich

Berlin (AP)—The whip of Red terror continued last night to lash rebellious East Germany. Thirty-thousand former Wehrmacht officers were added to a gigantic list for automatic arrest.

Fearful of betrayal even by their own Volkspolizei (people's police) honor guard, panicky Communist leaders turned to Soviet tanks and machine guns to protect their homes in the Pankow district of East Berlin. The police guardsmen were suddenly transferred to routine duties elsewhere in the East sector of this divided city, gripped by martial law.

West Berliners, angered at the bloody suppression of their countrymen in the East, sacked two offices of the Socialist Unity (Communist) party in the British sector late yesterday. They tore down Red flags and burned pictures of East German President Wilhelm Pieck and Premier Otto Grotewohl in the streets. All furnishings and records were destroyed.

Premier Otto Grotewohl's government, still in office only by the gunpower of 300,000 Russian troops, made this desperate bid to regain civilian control.

One—Accused the United States of parachuting agents with arms and radios into East Germany to start the worker rebellion and keep it going into its sixth day.

Two—Singled out ex-military officers as a class that allegedly furnished the "Fascist and reactionary" brains of the fierce uprising.

The revolt swept in a matter of hours last Wednesday from steel plants on the Polish Oder frontier to uranium mines along the Czech border. All major cities and industries, and hundreds of smaller centers, were caught up in the rebellion.

Three—Ominously warned "tens of thousands" of Communist party functionaries they had failed to intervene in the life-or-death crisis and command them to go at once to strike-cramped areas to coax the labor forces back to work.

Four—Held out amnesty for "honorable workers" who had followed "provocateurs of war" into endangering the Communist state and were not yet beaten into returning to their jobs.

Five—Threatened punishment with "iron fists" for all anti-Communists who had even local importance in the zone-wide revolt.

Six—Promised an immediately sweeter life for their 18 million East Germans who had been driven to the wall by work speed-ups, slashed living standards, and Communist bullying.

The lures for a return to meek obedience to Red rule included reduction of work quotas, higher old age pensions and sick benefits, more workers clothing, more electric power for homes, more new housing.

In Bonn, West German Chancellor Konrad Adenauer sent urgent appeals yesterday to President Eisenhower, Prime Minister Churchill and former French Premier Rene Mayer to "do all in our power" to win East Germany's freedom through unification of the whole country.

Washington (AP)—The long-awaited Big Three conference at Bermuda, designed to evolve a program for unity in the Western world, finally appeared set yesterday to begin July 8 as pressing new global problems piled up for consideration.

After several delays, the French Foreign Office announced that France has accepted July 8 as the starting date for momentous parleys with President Eisenhower and British Prime Minister Winston Churchill.

Meanwhile, Wilson himself tossed new, angry words into the heated debate over his proposed five billion dollar cut in Air Force funds. He wrote Sen. Ferguson (R-Mich) that even deeper slashes should be considered.

Washington (AP)—Gen. Hoyt Vandenberg bitterly attacked Secretary of Defense Wilson's office yesterday for imposing what he called restrictive directives on the Air Force.

"The colossal waste involved is certainly obvious to everyone in the Air Force," the retiring chief of staff for air declared in a speech to the Washington Aero Club.

Meanwhile, Wilson himself tossed new, angry words into the heated debate over his proposed five billion dollar cut in Air Force funds. He wrote Sen. Ferguson (R-Mich) that even deeper slashes should be considered.

They met to protest a proposal to relocate Route 611 through their properties and formed an organization to oppose the action. They also considered submitting alternate plans. (Daily Record Photo)

Wholesale Gas Prices Rise  
Second Time Within Week;  
Fuel Oils Also Increased

Wholesale gas prices took their second jump in a week yesterday—a rise of about eight-tenths of a cent a gallon. A week ago they rose three-quarters of a cent.

Again the boost was expected to push up the price of retail gasoline for motorists.

Only two companies confirmed reports of the price increases but it was expected that other companies would follow suit as soon as notice was received from home offices.

The two reporting notice of the price rises were Esso and Tydol. Local managers said they were notified yesterday. The price boosts became effective today.

Also affected were fuel oils, kerosene and other distillate oils—a major item in household budgets when oil burners supply the heat.

Fred W. Kegley said the new Esso tank wagon price for motor gasoline would be 23.85 cents a gallon for "regular" and 25.05 cents for "premium" gas.

For the oils, tank wagon prices would be raised six-tenths of a cent a gallon. This would put the wholesale price at 14.2 cents a gallon as the basic price.

Esso's Philadelphia office said the price rises were caused by the increase a week earlier of 25 to 30 cents a barrel in the cost of crude oil.

J. Stewart Swartley, local manager of the Tydol company, said he received a telegram about 10 p.m. yesterday notifying him of the price increases. The raises were the same as those listed by the Esso company.

If retailers tack on the rise, as they were expected to do, the price of gasoline at nearly all pumps will be 29.3 and 31.8 cents for regular and for premium gasoline.

Washington (AP)—Gen. Hoyt Vandenberg bitterly attacked Secretary of Defense Wilson's office yesterday for imposing what he called restrictive directives on the Air Force.

"The colossal waste involved is certainly obvious to everyone in the Air Force," the retiring chief of staff for air declared in a speech to the Washington Aero Club.

Warehouse  
Collapses

Philadelphia, (AP)—A warehouse filled with government-owned crude rubber collapsed with a roar "like an earthquake" yesterday, and the subsequent blaze prevented an immediate search of the wreckage for possible victims.

The warehouse manager, who fled seconds before the collapse, insisted no one else had been in the five-story building but a fire official said "there were plenty inside. They didn't have a chance to get out."

The estimates of victims ranged from Warehouse Manager Walter Zurek's none to as high as 32. Nearby residents said they had seen a truck back into the building before the structure fell and did not see the driver emerge.

Another report said a man was crushed in one of 12 cars covered with falling debris.

Robert Eastwick, realtor and appraiser, and get a figure on the estimated damages. If the highway passes through the Club Court-Dryden St. section of southwest Stroudsburg.

The committee will appear before Stroudsburg Council to ask support in opposition to the plan.

A similar trip will be made to Harrisburg to tackle Secretary Schmidt or other highway representatives.

Even the individual element was considered: group members agreed to follow the suggestion of Attorney George T. Robinson that everyone write an individual letter expressing his views, with copies to Schmidt, and to governmental representatives and councilmen.

Another general meeting will not be called until the committee has obtained an estimate of the cost of surveys by Hess and Eastwick.

The "favored" plan which is under attack was outlined to The Daily Record June 11. It would re-route traffic away from Seventh and Main Sts. in Stroudsburg. Instead, the traffic would leave Park Ave. at Morningside Ave., follow out along the presently undeveloped Morningside Ave., connection between Park and Club Court. The highway would then swing north and bring the traffic into the intersection of Ninth and Main Sts.

The group which organized last night delayed definite backing of alternate plans until final maps and routes are presented.

One is a proposal for running traffic off Route 611 and onto the old railroad bed, going under the Seventh St. bridge, and winding up somewhere in the vicinity of the old car yards at Dreher Ave. Then the highway would go on to intersect Routes 209 and 611.

The other would be for traffic to leave Foxtown Hill at the cross, swing along Godfrey's Ridge, and come down in the Joseph Kovarik section out Dreher Ave., then swing north to hit Routes 209 and 611.

The group approved the suggestion of Frank LaBar that the aid of the Automobile Association and of the Chamber of Commerce be enlisted.

LaBar said he asked the Detroit AAA for a route from there to New York recently. The clerk there gave it to him, and explained, "We by-passed Stroudsburg completely, you see. That's the worst traffic point in Pennsylvania..."

Another member of the group said a major Mount Pocono area road is sending its guests special maps showing them how to avoid Stroudsburg altogether—because of increasing complaints from patrons about Stroudsburg traffic jams and vexing delays.

Alternate Plan  
To Be Offered  
To State Heads

Strong opposition appeared to be brewing last night against a "favored" highway department plan for shunting Route 611 traffic through southwest Stroudsburg.

The opposition was in the form of Club Court and Bryant St. residents and property owners who gathered in a neighborhood airing of minds and opinions in the backyard of the Howard A. Rockefeller at 25 Club Court.

The Rockefeller called the meeting of residents. In the session, which lasted about an hour and a half, 32 took part.

An organization was formed by the group to present their opposition to the plan "favored" by E. L. Schmidt, secretary of State highways, and to put forth alternative plans which they feel would better solve the problem of where to route the heavy traffic from the new bridges.

Rockefeller acted as an impromptu chairman until nominations for officers were made.

J. Albert Groner was elected president of the neighborhood group, which adopted no particular name.

Rockefeller was named secretary.

A committee was named by Groner: Arlington W. Williams, chairman, and Kenneth Barthold, Frank LaBar, Joseph H. Small, Fred Rhodes and Roy Rockefellers as members. Groner and Rockefeller will also serve on the committee.

Approval was given to a resolution opposing the proposed route.

It was decided to have the committee approach Engineer Edward C. Hess to obtain scale plans for at least two alternative routes to offer the highway department.

Robert Eastwick, realtor and appraiser, and get a figure on the estimated damages. If the highway passes through the Club Court-Dryden St. section of southwest Stroudsburg.

The committee will appear before Stroudsburg Council to ask support in opposition to the plan.

A similar trip will be made to Harrisburg to tackle Secretary Schmidt or other highway representatives.

Even the individual element was considered: group members agreed to follow the suggestion of Attorney George T. Robinson that everyone write an individual letter expressing his views, with copies to Schmidt, and to governmental representatives and councilmen.

# District VFW Asks Investigation Of Rosenbergs' Council

## Remarks By Bloch Called Distasteful

The 20th District, Veterans of Foreign Wars, wants Emanuel Bloch, counsel for the late Julius and Ethel Rosenberg, convicted atomic spies, investigated thoroughly and disbarred from practice of law.

Delegates to a district convention in Easton during the week-end adopted a resolution to that effect and will press for its adoption at the annual encampment of the Pennsylvania Department of the VFW in Philadelphia on July 8.

Meat of the resolution is based on remarks attributed to Bloch after the denial of clemency for the Rosenbergs. "The veterans want the courts to determine whether these alleged remarks constituted violations of the codes of ethics and rules of courts" in which Bloch is now allowed to practice.

The Associated Press account of Bloch's statement after both the Supreme Court and President Eisenhower rejected pleas for clemency went like this:

Bloch charged that "the action of President Eisenhower indicates that we are under a military dictatorship garbed in civilian clothes." He asserted that "the people who are running the government are much more barbaric than the Nazis when they had power in Germany."

In another Associated Press account dealing with Bloch's reaction after the electrocution of the two convicted atom spies, the report went like this:

Bloch took it bitterly, defiantly.

He vowed that "we"—and he didn't explain who "we" were—would drive from power those who failed to halt the electrocution. He mentioned two names: President Eisenhower and Atty. Gen. Brownell.

The Associated Press accounts said further that Bloch said Eisenhower would "go down ingloriously in history as a President who countenanced these deaths."

John Piperator, commander of the Easton VFW post, submitted the resolution.

In addition to asking that "any and all actions" be taken against Bloch for disbarment, the resolution proposed application of "such other penalties as may be available for such activities, and statements by any member of the bar of said court or courts."

A large group of regional delegates to the 20th District convention headed by District Attorney Elmer D. Christine, candidate for state commander, and Paul V. Weary, retiring district commander, voted for the resolution.

## Delaware Water Gap

N. E. Bord  
Phone 3093-J

Mrs. Emma Weir, her son and daughter-in-law, Mr. and Mrs. Ralph Weir and their three daughters of Pittston, and Mrs. Weir's grandson, Larry Shannon, of New York City, called at the home of Preston Rinehart Sunday afternoon. Mrs. Weir is a sister of the late Preston Rinehart.

A. Okuno returned to his home after two weeks stay in the General Hospital.

Polly has gone for her summer vacation. Polly belongs to Mrs. Edythe Glebe and will spend part of the summer at the home of Miss Dorothy Laette of East Stroudsburg.

Mr. and Mrs. Harold B. Crossdale were in Easton recently for Lafayette College Alumni Day.

Water Gap friends have received news of the forthcoming wedding of Miss Kathryn Sebring to Albert McCauley. Miss Sebring is the daughter of Mr. and Mrs. William Sebring, of East Stroudsburg, and now lives at Lake Hopatcong, N. J. She spends much time in Water Gap with her brother-in-law and sister, Mr. and Mrs. Roy Holland. Mr. McCauley also lives in the Lake Hopatcong section. The young couple hope to locate in Monroe County after their marriage which will take place at 2 p.m., June 28, in the Sand Hill Methodist Church with a reception following at the home of Miss Sebring's cousins, Mr. and Mrs. Clair Metzgar, Bushkill.

David Newhart came from Washington, D. C., by plane last week to visit his sister, Water Gap's nonagenarian, Mrs. Eva Drake, and his niece Mrs. Stella Bickling. Newhart flew first to Wilkes-Barre and also visited in Scranton. Mr. Newhart lives with

## Vets Predict Christine As VFW Leader

Stroudsburg Veterans of Foreign Wars members came home from a district organization parley Sunday night with predictions that Monroe County District Attorney Elmer D. Christine will be the new State VFW Commander.

Christine is being boomed for commander by his home post and other organizations throughout Northeastern Pennsylvania.

Purpose of Sunday's district meeting was to elect new district officers and talk over plans for the forthcoming State convention in Philadelphia July 9, 10 and 11.

One member of the local party which attended the Easton meeting says Christine's election is "in the bag" unless some other district begins a dark horse campaign for its favorite son.

At the Philadelphia conference, Christine's name will be placed before the State group by a member of his own post. This honor, according to local officials, will probably go to Franklin Weller.

Weller has backed the attorney for VFW posts in the past, beginning with the position of judge advocate in the organization, a common said.

Officers elected at the Easton meeting, held at VFW post 1290, were Charles Falvey, district commander, from Easton; Senior Vice Commander—Harold Billing, Nesquehoning and Franklin E. Weller, Stroudsburg for the position of district junior vice commander.

Mrs. Georgia Alberson of the Stroudsburg post auxiliary was elected president of the 20th District ladies' auxiliary, which also met at Easton. She succeeds Mrs. Pearl Harlan, Easton.

Other auxiliary officers elected were Mrs. Flora Frutchey, Easton, senior vice president; Mrs. Muriel Hughes, Stroudsburg, junior vice president, and Mrs. Mayme Lazarik, Bethlehem, treasurer.

## Appenzell

Mrs. J. Wallingford

Mrs. Eliza Everitt visited with her sister Mrs. B. W. Dorschner all day on Sunday.

Mr. and Mrs. Russell Knerr of Swiftwater called at the Wallingford home Wednesday night while Mrs. Joseph Nyce and Julia Nyce called Monday night.

Richard Schneider and daughter Lauretta has secured employment at Pocono Crest Lodge at Pocono Pines.

At the Church Services Sunday morning the Rev. Edward Horn pastor delivered a Father's Day sermon to a very interesting crowd. The choir was heard in the anthem "Near To The Heart Of God" while the Altar vases were filled with roses and six baskets of peonies, snap dragons filled the chancel. Next services will be held Sunday morning at 10:30 on June 28.

his granddaughter, Mrs. C. Brown, who has relinquished her work in the psychiatric ward of the city hospital to spend a year at American College to earn her degree. Mr. Newhart left here Thursday, June 18, for Belvidere, N. J., where he will visit relatives, Mr. and Mrs. Levi Mackey.

Mr. and Mrs. Frederick Gehm, of New York City, arrived in the Gap Thursday to spend part of their vacation with Mr. Gehm's parents, Mr. and Mrs. Otto Gehm of Cherry Creek Lodge. The young couple was married this spring.

# Pay more? What for?

Fifty Years Forward on the American Road

You don't have to pay costly-car prices for costly-car comforts.

Ford brings you everything [and we mean everything] you've ever wanted in a

car, at a price that's well within your reach! And according to recent surveys, a Ford returns more of its original cost when sold than any other car at any price!

## Here are a few of the "Worth More" advantages

### you'll find in the '53 Ford:

#### 1. A V-8 engine—powerful and smooth!

Ford's famous high-compression V-8 is a leader in quiet, flexible, economical performance. Ford, remember, has built more V-8's than all other makers combined—over 13 million!

#### 2. America's most economical Six engine!

If it's a Six you want, Ford offers you the high-compression, low-friction Mileage Maker... the engine which, with optional Overdrive, won over all other cars, regardless of size or weight, in this year's Mobilgas Economy Run! And it's yours for the same kind of money that buys less modern sixes in other cars.

#### 3. America's finest and most versatile automatic drive!

Fordomatic Drive is the "automatic" which gives you both the get-up-and-go

of automatic gears and the smoothness of a fluid torque converter. If you choose Fordomatic, you will find that it makes all your driving easier... more relaxing.

#### 4. Automatic gas savings!

Ford's Automatic Power Pilot (on Six and V-8) meters just the right amount of gas, times ignition precisely, burns fuel evenly and completely. You get full high-compression performance from every drop of gas—regular or premium.

#### 5. America's newest and finest power steering!

Ford's Master-Guide power steering gives you new ease, stability and safety in guiding your car on smooth roads or rough. Your car gains in sure-footed roadability and you expend less effort in driving—and parking.

#### 6. Largest choice of models in the low-price field!

Ford alone gives you a choice of 18 different models... a SIX or V-8... Fordomatic, Conventional or Overdrive... the widest variety of body, color and upholstery combinations. You can practically "design" your own Ford!

#### 7. A body that's the style-setter!

Only Ford in its field gives you the advantages of a hull-tight Crestmark Body... the trend-maker in design and beauty. Ford's body is the longest and Ford's trunk, the largest. You enjoy more usable space.

#### 8. New driving conveniences!

Ford's first in its field gives you such "Worth More" features as easier-acting, suspended pedals that eliminate floor holes... foam rubber cushions on front and rear seats in *all* models... and convenient Center-Fill Fueling.

#### 9. An automatically controlled ride!

When you Test Drive this Ford, notice how the wide front tread (widest in the low-price field) takes tilt out of turns... gives you a more level ride. With new "balanced suspension," new spring and shock absorber action and new rubber compression bumpers, road shock in the front end *alone* is reduced up to 80%.

#### 10. It's worth more when you sell it!

An impartial survey of used car prices proved that Fords return a greater proportion of their original cost than any other cars in America. It's another fact to add to Ford's reputation as the "Worth More" car.

But don't take our word for it. Stop in and Test Drive this Ford for yourself. We predict you'll be sold before you're in second! It was true last year and it's even truer this year: you can pay more, but you can't buy better than Ford.

WORTH MORE WHEN YOU BUY IT...

WORTH MORE WHEN YOU SELL IT...

## Nine Persons Treated In Dispensary

Monroe County General Hospital dispensary had a busy weekend, with nine persons treated for accident injuries.

Nancy A. Morrison, Minisink Hills, was treated for a bruised thigh after being bitten by a dog.

Clara Collins, 12, of Bethlehem, stepped on a tin can while swimming and cut her right foot. Eyle Ellenberger, 19, of 59 Smith St., East Stroudsburg, cut her left index and middle fingers on a tin can.

A Philadelphia man stepped on a rusty spike and suffered a puncture wound of the right foot. Treated was Jake Cornelius, Bedford.

George Steele, 98 N. Courtland St., East Stroudsburg, fell while playing and sprained his left ankle.

Two-year-old Barbara Ann Wirrick, Stroudsburg RD, fell from a child's swing and cut her lower lip.

Possible fracture of the left ankle was suffered by Earl G. Owens, 137 Maple Ave., East Stroudsburg, while playing baseball.

Ivan Adams, 33, of 303 Fulmer Ave., East Stroudsburg, received a scalp laceration.

An auto accident victim, Tony Clough, 5, of Lester, Pa., was treated for scalp lacerations after reportedly striking the windshield in the accident.

## Kresgeville

Mrs. W. E. Andrews

Dr. and Mrs. Albert Shafer and Mrs. Henry, of Haddenfield, N. J., were recent dinner guests of Mr. and Mrs. Adam Shafer.

The annual home coming service of the local Reformed Sunday School will be held on Sunday, July 5, with services in the morning at 10 and afternoon services at 2:15. Special vocal and instrumental numbers will be presented, and former teachers and superintendents will speak at the afternoon service. All former members are invited to join in celebrating the special occasion.

A daughter was born to Mr. and Mrs. James Custer recently. The mother is the former Ruth Johnson. The child is the couple's first.

Mr. and Mrs. Stanley Hahn and Stanley Jr. visited with Mr. and Mrs. Barney Charron, Wind Gap, last week.

The area stewardship meeting of the Wilkes-Barre conference of the Lutheran Church will be held in Jerusalem Church, Trachsville, on Wednesday, June 24, at 6:30 p. m.

Recent guests of Mr. and Mrs. H. A. Shafer were Mrs. Robert Getz and Mrs. Carl Miller, of Meekesville; Mrs. Amanda Hinton and Mr. and Mrs. LeRoy J. Hinton and family, of Gilbert; Mr. and Mrs. Allen Gildner and Mr. and Mrs. R. Borger, of Palmerston.

On June 24 ladies of the Pleasant Valley Lutheran parish will take their annual trip to the Topton Orphans' Home.

The PO of A Lodge 245 will hold their annual banquet in Broadheadville house on Friday night, June 26.

Mrs. Agnes Borger returned home last week after visiting the

## Mrs. Rasely, County Native, Dies At 97

Bangor—Mrs. Mary Alice Rasely, 97, one of the oldest residents of the Slate Belt, died Sunday at Gracedale, Nazareth, R. D. 1, where she had been a guest for the last seven weeks.

Mrs. Rasely, widow of Henry Rasely, lived at 631 N. Main St., Bangor, before entering Gracedale. Her husband died in 1907.

Born in Monroe County, she was a daughter of the late Philip and Margaret Ann Sluiter. She lived in the Slate Belt for 60 years. She was a member of Trinity Lutheran Church and its Women's Missionary Society.

Surviving are a son, Floyd P. Rasely, of Easton; one grandchild and one great-grandchild.

Funeral services will be held Wednesday at 3 p. m. in the Hough funeral home. Rev. J. Frederick Stolte, Ph. D., pastor of Trinity Lutheran Church, will officiate. Interment will be in St. John's Cemetery, Bangor.

## PP&L Earnings Show Increase

Earnings after all charges accruing to the common stock of Pennsylvania Power & Light Co. for the 12-month period ended May 31, 1953, were \$11,027,400, equivalent to \$2.54 per share of common stock outstanding at such date, as compared with \$10,416,220 or \$2.40 per share for the 12-month period ended May 31, 1952.

Operating revenues for the 12-months ending May 31, 1953, were \$89,917,386, an increase of 4.5% over last year's corresponding period.

## New York Butter

New York (AP)—Butter 1622.28, steady. Wholesale prices on bulk cartons: Creamery, higher than 92 score AA fresh 65½¢, 92 score B fresh 63½¢, 92 score C fresh 62½¢.

Claire Smith family at Reading. Donald Cain, a student at Washington Missionary College, has returned home for his summer vacation.

Mrs. Clara Borger, of Lehighton, called on Mr. and Mrs. William Kreimoyer recently.

The annual Governer reunion will be held at the West End Fair grounds on Sunday, Sept. 6.

Roger Meekes, of Lake Harmony and Etwood Eckley, of Christmans, called on William Eckley last week.

## M. R. Ziegenfuss Accepts Post In Lewistown

The Stroudsburg Security Trust Co. has accepted the resignation of Melvin R. Ziegenfuss, vice president.

Mr. Ziegenfuss came to Stroudsburg in December, 1946, as assistant treasurer in charge of the Consumer Credit Department. He later was appointed as secretary and assistant treasurer.

In November, 1951, he was recalled to active duty for a period of 15 months, at which time he served as fiscal officer in the Finance Department of the United States Army, stationed at Fort George G. Meade and Fort Campbell, Ky.

He returned to Stroudsburg Security Trust Co. on March 1, 1952, and was appointed vice president.

Mr. Ziegenfuss has accepted a position as vice president of the First National Bank of Lewistown, Pa. He will assume his new duties on July 1, 1953.

## Tobyhanna

Elizabeth Leonard

The regular monthly meeting of the Tobyhanna Civic League will be held in the Coolbaugh Township High School on Thursday evening, June 25, 8 p. m.

Mary Jane Shupp, of Stroudsburg, visited Mr. and Mrs. John H. Saxe on Friday.

Mr. and Mrs. Elwood Pope and children, of Stroudsburg, visited Mr. and Mrs. Fred Pope on Thursday.

Mrs. G. F. Kirkhoff, of Brooklyn, N. Y., spent the past few weeks with Mr. and Mrs. Harold Kresge and daughter.

Miss Nancy Peters, Harrisburg, visited Mrs. Janet Wismer Schulz on Friday. They attended the wedding of Carolyn Brown, Stroudsburg, on Saturday.

Mrs. Frank Dailey visited Mr. and Mrs. Richard Dailey and family, Dover, N. J., on Friday.

The Tobyhanna Lions Club will sponsor a Talent Scout Show on Monday, June 29, at 8 p. m., in the High School auditorium.

Mrs. Russell Brate, of Baltimore, Md., Mr. and Mrs. John Coleman and children, of Bethlehem, were weekend guests of Mr. and Mrs. P. D. Frankenfield.

The Warren F. Nonnenmakers are spending some time at Lake Wallenpaupack.

Capt. and Mrs. J. W. Hennessey, of Bronx, N. Y., visited friends here on Friday.

Mr. and Mrs. P. D. Frankenfield, Mr. and Mrs. Ande Inzerill visited friends in Allentown on Thursday. Miss Sandra Frankenfield returned with them to spend some time here.

Mr. and Mrs. Denis Lally, of Jessup, visited Mr. and Mrs. Allen Pope on Friday.

Mr. and Mrs. Fred Cecachi, of Dunmore, visited Mr. and Mrs. Frank Hochrime on Sunday.

Mrs. John P. Conaboy and family are occupying their summer residence here.

The Coolbaugh Township Volunteer Fire Co. are making final arrangements to hold their annual firemen's carnival completely under cover this year during the week of July 13 through July 18, on the school grounds.

Marjorie Fadden, R.N., of Stroudsburg, and Nancy Wiley, of Hahnenmann Hospital School of

## Raising Money For Children's Camp One Of Maj. Adam's Last Important Jobs Here

Like most other human beings May Adam is a sentimentalist at heart.

She feels a strong connection with those other, less fortunate human beings who live with her, and around her. Gifted with great capacities for affection and an ability to get things done, the thin, always smiling woman, seems to have been on the lookout for "someone who needs" her since early childhood.

Unlike many other humans, however, May Adam has dedicated her life to doing something about those needs.

The "something" in her case has been the Salvation Army. She's been with it since 1923.

Now holding the rank of major, she has seen a number of chapels come and go. In each one of her posts, Major Adam has tried to place the needs of the people first. Limitations of finances or her own time have been purely secondary.

Now Major Adam is faced with a situation which, in some people's book, might be called desperate.

One of her favorite projects is in danger of abandonment. Each year, during the past, the Major

has beat a path to the doors of service clubs and civic organizations appealing for money to send underprivileged children to Summer camp.

This year she has barely had time to get the appeal under way.

For on Thursday, June 11, Major Adam received word from Scranton Salvation Army headquarters that she is to be transferred to that office the first of July.

This meant, in addition to the extra burden of "clearing up" organizational matters to make way for her successors, that Major Adam would have to complete the drive for camp money in half the time she usually devotes to the fund.

She is determined, however, that this job must not be left undone. To leave it unfinished, she feels, would be unfair to the man or woman who will replace her as head of the local post.

For this reason Major Adam is attempting to collect all of the \$600 goal set for the 1953 camp fund.

Thus far donations in the amount of \$52 have come in to Salvation Army headquarters at

78 S. Courtland St., East Stroudsburg. Of this amount, \$25 came from the CLU; another \$25 from the VFW auxiliary in Stroudsburg; one dollar from two "friends" of the organization.

This means Major Adam still must collect \$548 before her goal for the camp fund will be reached.

That \$548 is more than a mere goal to the major, however. It represents a challenge—not only to herself but to the entire body of work she has done in the community, work which last month earned her the "Golden Deeds" citation from East Stroudsburg's Exchange Club.

Much of the work has been done in areas which would not have been touched by the social consciousness of the public school, the church or the service club. It has been done constantly—not once a week, once a month or once a year.

For this reason, there are indications that the challenge lies elsewhere, too.

Whether the camp fund goal is reached depends, in the final analysis on Monroe County service club groups and its hundreds of public-spirited citizens.

## Effort

Mrs. Walter Murphy

Mr. and Mrs. James Mohrey, Mrs. Ruth Clark, Mrs. Wilbur Overholt, of Allentown, were guests of Mr. and Mrs. Kenneth Rinker on Sunday.

Miss Anna Schoch has been confined to her home with illness for the past week.

Mrs. Edwin Bond is a medical patient in Monroe County General Hospital.

Mr. and Mrs. Clark Smith will observe a wedding anniversary on June 25. Mr. and Mrs. Hayden Murphy will celebrate their 33rd wedding anniversary on June 26.

Birthday celebrants are: Mrs. Calvin Feller, June 21; Mrs. William Knecht, June 23; Mrs. Kenneth Rinker, June 26; Mrs. James Hannon, June 30; Mrs. Phyllis Conklin, June 30.

Mrs. Florence Ross, Miss Florence Morris, of Philadelphia, visited friends in Danville on Thursday and Friday.

Mr. and Mrs. Wilson Saxe, of Berwick, visited Mr. and Mrs. Ray Kresge on Thursday.

Miss Betty George visited at the home of her sister, Mr. and Mrs. Kermit Beers, of Kresgeville on Thursday.

Mr. and Mrs. Raymond Gearhart spent a few days visiting the former's son and family in West Virginia.

Mr. and Mrs. Earl Nuthard and son, of Reading, visited Mr. and Mrs. Horace Everett on Monday.

Mrs. Charles Bollinger, of Acquashicola, is assisting at the home of her parents, Mr. and Mrs. Edwin Bond while Mrs. Bond is ill.

William Gould, George Gould, Theodore Bollinger and Mrs. Elsie Kresge transacted business in Philadelphia on Monday.

Nursing, Scranton, visited their respective parents here on Wednesday.

## Kunkletown

Mrs. Adan Bohner

Work on the foundation of the new home, being built by Mr. and Mrs. Luther Berger, was started this week. The home is located on the church lane near the home of Mr. and Mrs. Calvin Berger.

Mrs. Sula Peters visited at Mrs. Lilly Hess' home in Lehighton and at Mrs. Nora Costenbader's at Aquashicola during the week.

Rev. and Mrs. Adan Bohner were Sunday guests of Mr. and Mrs. Myron Snyder at Saylorsburg.

Monday Rev. and Mrs. Bohner attended the annual summer outing of the Carbon County Ministerium.

The group enjoyed a smorgasbord dinner at Varkony's in Saylorsburg and a social and business meeting at the home of Mr. and Mrs. Earl Shoemaker. Attending were Rev. and Mrs. Albert Peters, Lansford, Rev. and Mrs. William Langford, of Palmerston, Rev. and Mrs. Oliver Nace, of Selinsgrove, Rev. and Mrs. E. E. Kutz, of Bowmanstown, Rev. and Mrs. Ray Klingaman, of Cherryville, Rev.

and Mrs. Alton Albright, of Gilbert and Rev. and Mrs. Bohner.

Members of the Ladies Aid quilted all day Wednesday at Pearsall Hall. Present were Mrs. Earl Loebach, Mrs. Harvey Smale, Mrs. Elsie Derhammer, Mrs. Adan Bohner, Mrs. Alvin E. Gower, Mrs. Wilson Christman and Mrs. Sula Peters. That night several ladies met and put a quilt in the frame at the home of Mrs. Derhammer. The plans are to quilt at Mrs. Derhammer's at night so those who can't help during the day may work nights to finish the many quilts on hand.

Franklin Langenbach is a surgical patient at the Palmerston Hospital.

## Editorials

### United Safety Campaign

Last summer, in this northeastern corner of the country, 1600 persons were killed and 100,000 injured on the highways.

Alarmed, the governors of 11 states have pooled their efforts, in a safety campaign for the present summer season. They're not doing anything unusual—just asking their courts and law enforcement agencies to be especially alert to see that laws governing caution and courtesy are observed.

It should help. So should the slogan "Slow Down and Live!"

A joint statement issued by the governors including Pennsylvania's—tells the vacation visitor: "We want you to come back another year with the realization that our brand of hospitality includes safety on the highways."

If the governors continue to exert pressure for firm though courteous law enforcement throughout this region, the summer's highway toll should be considerably less than the 1600 who were killed and the 100,000 injured last year.

### --- or Else

Pennsylvania farmers are smarter than British Socialists.

Now, we can't prove that non-startling statement with figures, graphs and intelligence tests. But we are convinced that it's the truth. Here's why:

At a recent convention, leaders of the British Labor (Socialist) Party promised that if put back in power they would nationalize agriculture.

In other words, all farm land would belong to the government. And the red-tape experts would tell the farmers what to raise and how much. Which convinces us that the rural dwellers of Pennsylvania have more brains than the Marxists of England.

For the British Labor chiefs said that if they put their scheme across they would get rough with farmers who don't raise as much as the thinkers think they should produce.

Well, it so happens that farmers don't have all the say about their crops. A little item called Nature enters into the picture.

If it rains too much, the crops are drowned. If drouth descends, nothing will grow. Or a big wind may flatten the wheat. Or bugs may eat the tender shoots.

But what is Nature compared with the mighty thoughts of Communists or Socialists who expect crops to grow and cattle to fatten when told to do so?

We can picture an angry commissar now coming through the rye beraating that grain for failing to mature when a bureaucrat ordained that it should.

### Convention Season

The convention season is in full swing and the Pocono Mountains are again reaping a substantial share of group-type meetings which demand an atmosphere providing for sound conference achievement and top rest and recreation facilities.

On top of several very prominent state-wide and national organizations which have already convened here, we are now entertaining the Pennsylvania Institute of Certified Public Accountants and the Registers' Association of Pennsylvania.

We extend to delegates of both organizations a hearty welcome. We hope their stay here will be so profitable—as the stay of many others has been—that they will return frequently to enjoy the beauties and hospitality of the Poconos.

### The Once Over

—by H. I. Phillips

#### Prayer Atop The World

The conquerors of Mt. Everest

report that their first act was to say a prayer of gratitude. It is presumptuous to imagine the prayer of brave men in a great hour. A mere "Thanks" from such men might suffice. The doers of heroic deeds are seldom men of words. Nevertheless we like to think that at such an hour a prayer atop the peak might have been:

Oh, Lord, we thank thee for the strength, the stamina, the patience, the faith and the guidance bringing us safely through. Atop this highest of mountain peaks we gaze into space and see works of Thy hand never before seen by man. To us comes long hidden beauty. Through the mists we hear a voice from the Old Testament. The words of Genesis seem written in the skies. "In the beginning God created the heaven and the earth. And the earth was without form, and void. And the spirit of God moved upon the face of the waters. And God said 'Let there be light.' And there was light."

Here is the undefined glory of the first day. Here is peace. From this peak no smoke from camp fires is seen, nor flash of guns. This is the height farthest from the rubble, the ashes, the parade grounds, the blood-stained hills and the sodden battlefields. No hymns of hate have penetrated here. No voice raised in anger has floated across these mountains. Here are peace and quiet and the wondrous beauty of a place unvisited and undefined.

This is a famed peak atop a famed mountain range, but we know that in every phase of life and on every level there are peaks similarly inspiring, flashing to the brave-hearted, and flashing a symbol to those in dark valleys, shabby depths and desolate reaches of praise and desert. Mankind, now in the low places—the Slough of Despond—needs a Mt. Everest of the human spirit. Its civilization is in sore need of Himalayan peaks to set a goal and stir high resolve. This peak is itself a prayer in the great

silences of earth. From it, Oh Lord, we see the beginnings of time and catch the spell of Creation. In this majesty all about us we see the works of mankind strive into insignificance. The tallest building becomes a clumsy contrived toy; the greatest mosque and cathedral are the work of childish hands; the most beautiful poem a tawdry thing, and the finest painting a smear. Are there human beings somewhere leaping at one another's throats? Do ultimatums, defiance and harsh orders ring out in the far distances? In places conquered by man with ease and without great struggles do men and women snarl and screech? From here how desecrating it seems and sounds!

Oh, Lord, may all mankind catch a glimpse of what is seen by us from this peak and feel the matchless spell of that undescended day when the Lord God "formed man from the dust and breathed into his nostrils the breath of life!"

#### Vanishing Americanisms

"The children are all in bed."

"Let's throw a big steak barbecue for the whole neighborhood."

"I am willing to answer any question you ask, gentlemen."

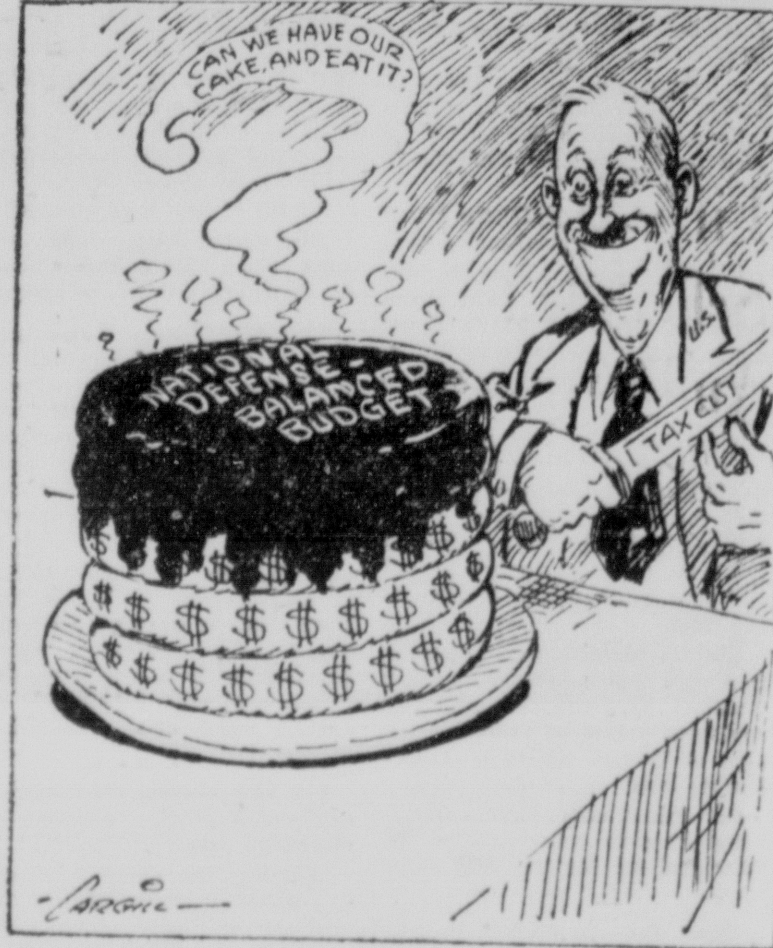

"Never mind about the Fifth Amendment; I've nothing to hide."

"They just bought a big house."

"Sis does all the cooking."

A statue of Hans Christian Andersen is to be placed in Central Park, New York. . . . We trust it will make the muggers, vandals and stickup artists feel a little less hard-boiled. . . . A stay-at-home baseball addict's dream—video is a set which has a slot in it for hot-dogs and a spigot for beer. . . . Two Austrian-born American spies have been let off with prison terms as light as three and a half years. . . . Evidently there are courts which consider it as on a par with violating a no-smoking ordinance. . . . The judge who let Henry Grunewald off with a \$1,000 fine and a probation term admits he was among those given Christmas neckties by him. . . . This is one of the few cases where a Christmas necktie did anybody any good. . . . Mollie Goldberg calls the famous ex-Grand Opera and South Pacific star "Tide" Pina.

### SIXTY-FOUR DOLLAR QUESTION

Robert S. Allen Reports

### Clark's Refusal To Be Questioned--Political

Washington, June 23

That refusal of Supreme Court Justice Tom Clark to submit to investigation was based on straight-out political advice.

House Democratic leaders urged him to ignore the House probes' "invitation."

The party chiefs told the former Attorney General: "Sit tight and ride out this storm, because it won't last long."

The Judiciary Subcommittee conducting the investigation expires on June 30 unless given a new lease on life—which is highly unlikely. The probes, themselves, appear eager to quit.

Clark needed no urging to follow the counsel of the Democratic leaders. It was exactly what he wanted to hear.

The Texas did not consult his Supreme Court colleagues.

One reason for that could have been his desire to avoid involving them in a case they may eventually have to rule on, should the probes subpoena him and he defy them. On the other hand, Clark may not have sought the views of his fellow Justices because he already knew how they felt.

On February 12 this column revealed that, as follows:

"While Clark is ducking investigation by a House committee, the other eight members of the Supreme Court are privately letting it be known they feel he should 'clear up' the charges against him. . . . The Justices have discussed the Clark matter on at least two occasions. He was not present at either. However, he knows about them. Also, that his colleagues disapprove of his refusal to voluntarily testify before the committee."

The Hatch. While partisan politics motivated the advice Clark got from the Democratic leaders, it was well-grounded.

It was based on a secret poll of the full House Judiciary Committee.

That check showed a majority of the 29 subcommittee members opposed to subpoenaing Clark in an effort to force him to submit to questioning on various charges by the investigating Subcommittee.

Before making their secret poll, the Democrats knew that the sole reason the Subcommittee had not attempted to subpoena Clark was fear of being reversed by the full Committee. That's why the probes limited themselves to "inviting" him. They had wrangled among themselves for days over whether to issue a subpoena. The Republicans had a majority for that on the Subcommittee, but weren't sure about the full Committee—which has the deciding voice.

So when Clark rushed to the Democratic leaders on what to do,

they immediately sought information on the line-up in the full Committee.

The emergency poll was made by Representative Francis Walter, Pa., second-ranking Democratic member and friend of Clark. Walter brought back comforting word.

"Tom has nothing to worry about," he reported. "The Republicans don't have the votes to force him to testify. He can safely disregard that 'invitation.'"

This report was later confirmed by what happened at a full Committee meeting on the Clark issue. To the surprise of Representative Kenneth Keating (R., N.Y.), subcommittee chairman, and Pat Hillings (R., Calif.), leaders of the drive to investigate Clark, Republican committee members balked at approving of subpoena. One of them was Representative Chauncey W. Reed (R., Ill.), head of the full Committee.

"I have strong misgivings about the authority of a congressional committee to subpoena a Supreme Court Justice," he said. "I am not questioning the need to investigate Clark. I haven't any doubt there is ample justification for that. But I doubt very much whether we have the power to subpoena him."

Note: As a result of the headline controversies swirling around Justices Clark and William O. Douglas, Senator John Butler (R., Md.) is trying to get hearings on an unnoted constitutional amendment he has authored that is aimed at the Supreme Court. The proposal would do three things: (1) Require Justices to retire at 75, (2) give Congress power to limit the kind of cases considered by the tribunal, and (3) bar Justices from running for President or Vice-President for five years after leaving the bench. Butler's measure goes further than the late President Roosevelt's famed "court packing" plan that was killed by the Senate in 1937.

Hosts—Mr. and Mrs. John Heller, Arlington Heights, entertained friends at a weiner and marshmallow roast.

Anniversary—The Am. Legion Aux. of Geo. N. Kemp Post will observe their 10th anniversary and honor their past presidents. The committee: Mrs. Guy Tallmage, Mrs. James McConnell, Mrs. Rudolph Blitz, Mrs. Charles Reed and Mrs. Copenhaber. Among those honored will be Mrs. C. B. Staples.

Boy Scouts—Veteran's Scout Troop No. 86 enjoyed the weekly hike to Camp Deerpark, in charge of Truman Newhart, Robert Miller and Kenneth Delvalle.

Hawaiians are impatient for the granting of statehood news item. So must be the flag makers, who must be worried as to whether they should continue to turn out 48-star jobs or start producing 49ers.

What we can't understand is why sports writers continue to call the biggest man in golf, "little" Ben Hogan.

What's so difficult about conquering Mount Everest? The Detroit Tigers can't even climb up out of last place!

Coffee drinking by government employees in Washington has decreased 23 per cent, we read. Let's hope this item escapes the attention of our great South American friend, Brazil.

Wonder if those government employees drank it black—or should the dairy and sugar cane industries start worrying, too?

George Sokolsky Says...

### Austrian Schillings Rate Of Exchange Favored Soviets And Their Satellites

The Case Of The Austrian Schillings

This is one of those tales that requires full investigation not because the matter itself is important but because it discloses such unbelievably chaotic conditions in government that it is an index to our major troubles.

In the case of the Austrian Schillings, the rate of exchange was fixed so that it was against the interests of the United States and favorable to the interests of Soviet Russia and the satellite countries. In 1949, American officials in Austria started negotiations with the Austrian government to alter the rate of exchange. The Austrians were very anxious to improve the rate of exchange because it would benefit Austria. Failure to improve the rate could only benefit Russia.

In November, 1949, just before the agreement between the United States and Austria was finalized, the Secretary of the International Monetary Fund, Frank Coe, an American who has taken refuge in the Fifth Amendment, objected to the American negotiators arranging for the correction of the rate of exchange in the interest of the United States. Coe said that he got his information from the Czechoslovakian member of the International Monetary Fund, which is part of the United Nations.

Coe told the American negotiators to desist. General Geoffrey Keyes, American High Commissioner in Austria, and Gabriel T. Kerekes, and Clyde Nelson King, the negotiators, decided to go ahead because Coe had no authority to stop them.

Whereupon a communication came to them from Washington backing up Coe. The testimony is not clear as to whether it came from the State Department or the Department of Defense or who sent it. Here is a negotiation that is taking place with the Austrian government on a matter of some significance; there are communications between the American negotiators and Washington, presumably the State Department, and nobody knows who sent the communications from Washington.

Mr. King said:

"I can't definitely state, but it was my impression all the time that we were dealing with the State Department. I don't know. I am not too sure just who was sending all the messages because they were going back and forth."

The negotiators in Austria tried to find out who was sending the messages and they got no answer. How did they know that these were official instructions? How did they know by what authority the instructions were sent on an instrument called a telegram? They never did. General Keyes decided to go through with the negotiations and he carried them through on his own authority. But neither he nor any one else in Austria ever learned that he got his information from the Czechoslovakian member of the International Monetary Fund, which is part of the United Nations.

# State Registers Oppose Small-Size County Charter Proposal

## Association Asks Hearing On Senate Bill

Opposition to a State Senate bill which gives county commissioners authority to create a small-size charter measure similar to one in effect in Philadelphia was voiced yesterday by the Registers Association of Pennsylvania, assembling at Penn-Stroud Hotel for the second day of their three-day convention.

Russell F. C. Bengler, secretary-treasurer, said the recommendation of the legislative committee, adopted by the assemblage, asks Harrisburg to hold up action on passage of Senate Bill 399, now in House Committee.

Bengler said the resolution proposes a public hearing on the county code so the association will have an opportunity to present its objections. He said the bill takes authority away from county elected officials, giving county commissioners jurisdiction.

Opening the session at 9 a. m., John E. Beddow, register of wills, Schuylkill County, gave invocation and Floyd Butz, Monroe County register of wills and host for the convention, delivered the welcome. Hal Harris, Stroudsburg's chief burgess, extended the official greeting for the borough.

Elmer J. Shipley, state president, presided during the business meeting when reports of various committees were submitted. The afternoon was spent on a tour of the Pocono Mountains, dinner in the upper county region last night and concluded at Pocono Playhouse where representatives and their wives witnessed a play.

Today, a closed meeting at 9:30 a. m., opens the final day's program. Election of officers is scheduled for this afternoon and the annual banquet will occur in the Penn-Stroud ballroom at 6:30 tonight. Main speaker will be Prof. J. William Frey, of Franklin and Marshall College.

## Couple Sells House, Lots

Three lots in East Stroudsburg and a residence were sold to Mr. and Mrs. Stewart R. Hall, Bethlehem, according to deeds recorded yesterday at the Courthouse.

Grantor was H. M. Abeloff, East Stroudsburg. Property is located at E. Sixth and Chestnut Sts.

A Chestnut Hill Township residence and 3.59 acres were sold by Mr. and Mrs. Romasavage, that township, to Mr. and Mrs. Martin Motts, that township. The tract adjoins land of George Siglin. Ownership of the McMichael's Creek is reserved to the Pohoqualine Fish Association. The stream passes through the property.

Other deeds recorded: Mr. and Mrs. Wallace E. Britton, et al., to C. Raymond Michener, all of Barrett Township, a property there on Laurel-Pine Rd., at White Oak road.

Mr. and Mrs. Arthur L. Yetter, Smithfield Township, to Anna M. Jones, Philadelphia, a Middle Smithfield tract adjoining other property of Anna Jones.

## Funeral Arranged For W. D. Heller, 56, Pen Argyl

Pen Argyl—Funeral services for Warren D. Heller, 56, of 24 William St., will be held at 2 p. m. Wednesday at the Swoyer funeral home here. Interment will be in Plainfield Cemetery, Plainfield Township.

Mr. Heller died Saturday at his home here. He was born in Pen Argyl, a son of the late Jerome and Mary Bauer Heller, and was employed by the Jackson-Bangor State Co. He belonged to the First Presbyterian Church.

Surviving are his wife, the former Martha Edwards; two sons and three daughters, LeRoy, Plainfield Township; Warren D., Jr., Mrs. Raymond Heberling and Mrs. George Lambert, Pen Argyl; and Mrs. Willis Weidlich, Bangor; one brother, Joseph, Pen Argyl; three sisters, Mrs. William Minchin, Bangor; Mrs. Calvin Irtley, Nazareth; and Mrs. George Fleming, Poughkeepsie, N. Y., also three grandchildren.

## Hole 30 Feet Deep, 40 Feet Across Perils Two Buildings

Berwick, (AP)—A hole, growing steadily by the hour, is threatening a large bakery and a nearby home in central Berwick. The hole appeared yesterday afternoon near the home of Hugh Vaughn, one of the owners of the Vaughn Bakery. Within two hours the hole had reached a depth of about 30 feet and was nearly 40 feet across. Approximately one-third of Vaughn's home dangled in space over the cavernous hole. The edge of the gaping pit was only 15 feet from the bakery itself.

Employees of the bakery contacted an unidentified geologist. He told them the hole has probably been created by a subterranean river eating away the earth. Only sand was visible in the hole.

A/3c Fred R. Christman

## East Borough Airman Enters USAF School

A/3c Fred R. Christman, 20, son of Mrs. Effie V. Christman of 80 N. Courtland St., East Stroudsburg, has entered the Airplane and Engine Mechanic's School at Sheppard Air Force Base, Texas, the home of the largest technical school of this type in the world.

During his specialized training as a student at Sheppard he will receive intensive training designed to provide him with the thorough knowledge and basic skills required in servicing, inspecting and maintaining aircraft currently used by the United States Air Force.

Upon graduation he will be awarded the rating of Airplane and Engine Mechanic. Along with the majority of graduates in his class, he will enter a course for advanced training or will be assigned to one of the major Air Force commands for on-the-job experience with first-line operational aircraft after completion of his schooling here.

Airman Christman entered the Air Force on March 13, 1953.

## Bangor Hotel Owner Dies

Bangor—Walter J. Finkbeiner, 52, proprietor for 10 years of the Colonial Hotel here, died suddenly at 10 p. m. yesterday, apparently of a heart attack, while visiting in Bangor.

Dr. Floyd M. Hess, Bangor, was called to give first aid. The physician pronounced the man dead at 10 p. m. The body was released to the Stoddard funeral home, Bangor.

Finkbeiner was a member of Our Lady of Good Counsel Church, Bangor; member of the Kiwanis Club; BPOE No. 1106; and former owner and operator of the Bangor Hosiery Co. He was a director of the First Bangor National Bank.

Surviving are his wife, Mazie; his mother, Mrs. Mame Finkbeiner; and son, Walter, all of Bangor; daughters Mrs. William Winkler, and Mrs. Wilson Jackson, Bangor; Miss Marion Finkbeiner, New York City; and Mrs. Daniel Miller, Bangor; four grandchildren and a brother, Carl, proprietor of the Broadway Hotel in Bangor, of which Howard Finkbeiner, the dead man's late father, was proprietor.

## Habeas Corpus Hearing Stayed

Washington (AP)—A hearing on a habeas corpus proceeding brought on behalf of former Sgt. Robert W. Toth of Pittsburgh, yesterday was put off until Thursday.

Toth, an honorably discharged airman, was arrested in Pittsburgh May 13 and flown to Korea for trial by a court martial in connection with the slaying of a South Korean civilian in September, 1952.

The habeas corpus proceeding seeks the release of Toth and his return to his family.

## Young COP To Meet Tonight

Young Republicans of Monroe County will meet for a social night at Tom-X Ranch, Marshalls Creek, at 8 p. m. today. The meeting is open to the public. There will be a buffet dinner.

When the hole first opened, some clothes which Mrs. Vaughn had hung on a line dropped out of sight. Later, huge chunks of concrete from the basement walls and floors of the Vaughn home began breaking away. The chunks of concrete disappeared in the sand at the bottom of the pit.

## Three Petition County Court For Paroles

Three county jail prisoners petitioned the court for paroles yesterday.

All the petitions were taken under advisement by President Judge Fred W. Davis.

Petitioners were Joseph Baldoni, 25, and Sylvester Mills, 26, both of Scranton, serving sentences for burglary; and Raymond R. Sheerer, 25, Stroudsburg, serving time for larceny.

Baldoni and Mills are both married and have children. Each said he hoped for parole in order to aid his family. The pair were jailed last Jan. 7 after breaking into a summer cottage in the Mount Pocono area and stealing some firearms.

Fines of \$100 each have been paid and restitution made, the court was told yesterday. The two men were examined by District Attorney Elmer D. Christine.

Sheerer was jailed Feb. 28, 1952 on the larceny charge, was sentenced to a year in jail, payment of a \$100 fine and ordered to make restitution.

He was paroled July 8, 1952, then jailed for parole violation on Dec. 20, 1952, for failing to make payments on his fine. He was ordered to serve the rest of his sentence, which was scheduled to end July 30.

## Exchange Club Elects Eckert

Howard Eckert, East Stroudsburg, was elected president of the Exchange Club last night at a meeting at Mountain Lake House, Marshalls Creek.

Also named at the annual elections were:

Dr. Grady Moore, vice president; Gilbert Dunning, secretary; Harry Lewis, assistant secretary; Herbert Rupprecht, treasurer; and to the board of control, Elwood Huffman, Harry Crouse, Howard Kester.

Installations will be made July 13 by the district governor, Harold Cregar, Easton. The session will be at William Altier's resort near Echo Lake.

The host for the meeting, Elwood Huffman, announced that instead of pocketing the money for the dinners he was turning the entire check over to the East Stroudsburg Little League.

## Hospital Notes

**Births**  
Son to Mr. and Mrs. Wilbert Dellaven, Bangor.

**Admitted**  
Joseph Milazzo, Stroudsburg; Linda Dunkelberger, Stroudsburg RD3; Verma Heim, Saylorsburg; Jennie Chambers, East Stroudsburg; Milton Angelo, East Stroudsburg RD2; John Gregosh, Clark Summit; Mrs. Ruth Hood, Columbia, N. J.; Mrs. Hortense Quirsimo, Stroudsburg; Mrs. Ruth Logan, Stroudsburg; Mrs. Emmaline R. Kitson, Pocono Lake; Joseph Taylor Jr., Portland; Mrs. Mary Jane Guida, Pocono Manor; Floyd Curry, Philips, N. Y.; Mrs. Carmella Havens, East Stroudsburg; Mrs. Jennie Beck, Mount Bethel; Warren Hontz, Stroudsburg; Mrs. Patricia Nauman, Gouldsboro; Dell Singer, Columbia, N. J.

**Discharged**  
Robert Williams, Stroudsburg; Mrs. Mary Decker, East Stroudsburg; Terry Whitmore, East Stroudsburg RD3; Mrs. Frances Poliskiewicz and son, Bangor RD1; Mrs. Arwella Chiodo and daughter, Stroudsburg RD3.

## Truman Finds Acheson Hard To Pick Up

Washington (AP)—A tall, distinguished looking man with a mustache, strolling out 17th St., N. W., after lunch at the Metropolitan Club paid no attention to the honking of the limousine rolling nearby.

Dean Acheson, former secretary of state, didn't realize who occupied the limousine until it halted in front of him and the grinning face of former President Harry S. Truman poked out the window.

They exchanged warm greetings. "You're the hardest pickup I ever encountered," the visiting Truman told Acheson.

## Truck Driver Pays \$50 Fine

A \$50 fine for driving an overweight truck has been paid by Carlton Chase, 29, Ontario, N. Y., truck driver, arrested at midnight Sunday by Pfc. Emil Weber of the Stroudsburg station. Chase's fine was levied by Justice of the Peace J. T. Hauser, Delaware Water Gap. He paid and was freed at 12:30 a. m. yesterday.

Tibetan monks add butter to their hot tea.

## Cupid Keeps Courthouse Office Busy

Eleven couples showed up at the Courthouse in search of marriage licenses over the weekend, one of the biggest rushes this year.

Applying were: Arthur W. Bond, Stroudsburg, and Helen M. Angle, Portland; Marvin Counterman, Stroudsburg, and Marion Nyhus, East Stroudsburg; Albert Macauley, Rockaway, N. J., and Kathryn B. Sebring, Lake Hopateong, N. J.;

Richard Correll, Bangor, and Marie E. Fisher, East Stroudsburg; Paul E. Kulkosky, Jermyn, Pa., and Patricia E. Zeiner, Stroudsburg; John W. Haulenbeck III, South Orange, N. J., and Leona S. Lone, Buck Hill Falls; Donald N. Bachman and Maryann Remlinger, Allentown;

Paul C. Hammond, Stroudsburg, and Dorothy J. Morris, East Stroudsburg; David C. Beyer and Barbara J. Carlton, Canadensis; and Dale D. Smith, Palmerton RD1, and Betty L. Getz, Kunkletown RD1.

## Pvt. Miller Assigned To Fort Bragg

Kellersville—Pvt. Donald S. Miller recently completed 16 weeks of basic training with the Field Artillery and has been transferred to a new unit where he will receive four additional weeks of military police training.

He is a company clerk and is also active in playing softball.

Pvt. Miller is the son of Mr. and Mrs. Bernard Miller of Snyder'sville.

He would be interested to hear from his friends at his new address: Pvt. Donald S. Miller, U.S. 55259263, Co. B, 12th Ordnance Bn. (Spec. Weapons, Depot) Ft. Bragg, N.C.

## Final Decree Scheduled In Audit Appeal

A final decree in the taxpayers' appeal from the 1951 county audit was scheduled for June 30 by Judge James C. McCready of Carbon County, who has been hearing the case in Monroe.

Judge McCready was in Stroudsburg yesterday to hear further testimony on the appeal which was filed just a year ago.

Chief Clerk Harry Taylor told the court the county had received back all of the money it laid out for purchase of a Ross Township school house under former county commissioners.

In addition there was a profit of about \$230, he added. The schoolhouse was originally purchased for use as an election house. The county never received proper title, according to allegations in the appeal.

The judge conferred with Attorneys Arlington W. Williams and Charles R. Bensinger Jr., for the taxpayers, and Forrest Mervine for the former commissioners, then continued the case to June 30.

He said he expected to wind up the appeal then and hand down his opinion.

## Variations In Materials Aid

Families who build their own homes will find it worthwhile to take a tip from the nation's architects and builders when it comes to creating in interesting exterior design at low cost, says the Construction Research Bureau, national clearing house for building information.

A pleasing exterior, with sufficient variation from other houses in the same block to avoid a peasant-in-a-pod appearance, is not a problem when building in the higher-price brackets. But in the moderate-price field, one must constantly bear in mind the costs. For this reason, expensive false facades, which afford variety cannot be used.

## First Fresh Air Children To Arrive Here Friday; Others Coming July 1, 10

Sixty-three youngsters have been invited to be guests of "Friendly Town" hosts in Monroe County this year, it was disclosed last night by Mrs. John R. Wilson, chairman.

Their visits here are sponsored by the Herald-Tribune Fresh Air Fund, in cooperation with Radio Station WVPO and The Daily Record. Each year, children from New York City are invited to spend two weeks or longer in the Poconos region—away from the sweltering sidewalks of the city.

## Overheated Refrigerator Starts Fire

An overheated electric refrigerator burned in an East Stroudsburg apartment yesterday afternoon, causing smoke damage and summoning borough firemen who extinguished the blaze.

The fire started in the apartment of Mr. and Mrs. Harold E. Lehr, 86 W. Broad St., at 3:15 p. m., and smoke penetrated to the adjoining apartment occupied by Mr. and Mrs. Frederick Nittle.

Firemen donned gas masks to enter the smoke filled kitchen. The Lehrs were reported in York, Pa., and the apartment windows were closed, forcing smoke to the attic where it seeped through and was noticed by passersby.

Marvin Abel, fire chief, said the building is owned by Mrs. Edith Wadanoli, who operates a grocery store on the first floor. No estimate of damage was available.

## Railroad Men Study Atom Use

Atlantic City, N.J. (AP)—Enlarged studies of possible use of atomic power for railroad locomotives are being undertaken, it was reported to railroad officers here yesterday.

The railroad men opened a series of meetings here in connection with a 20 million-dollar display of the latest passenger and freight cars, locomotives, mechanical devices and materials.

Subscribe to The Daily Record.

## Bangor Club To Send Blood Donors Here

Bangor Kiwanis Club expects to send about 12 persons to Stroudsburg tomorrow as blood donors for the Monroe County Red Cross campaign at First Presbyterian Church, Stroudsburg, from 10 a. m. to 4 p. m.

George Remagen, Kiwanis committee chairman, disclosed last night the number is not as great as anticipated but predicted future campaigns might be met more successfully there.

The response by Bangorians to Monroe County's appeal for 150 pints followed a visit to Bangor by Leroy Mikel, blood bank chairman, who asked their cooperation in view of Bangor residents receiving blood at Monroe County General Hospital.

Mikel emphasized again yesterday the urgent need for blood donors tomorrow. The minimum quota of 150 pints allocates 125 to the General Hospital and Armed Forces, and the remaining 25 to the fight against infantile paralysis.

The American muskrat was imported into Great Britain for fur farms, but going wild, it did so much damage to river banks that further imports have been forbidden and efforts have been made to exterminate it.

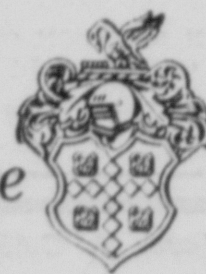

## Tannersville Fire Co. Auxiliary To Sponsor Drive

On Thursday evening, June 25, 1953, the Women's Auxiliary of the Pocono Township Volunteer Fire Company will sponsor a house-to-house drive for donations to be used for the purchase of playground equipment and craft supplies for the Summer Playground to be conducted at the local school. The opening of the Playground early in July will be the first of its kind in this district. The local community is urged to support this endeavor with its donations. —Adv.

# THE NEW PACKARD

## A great new car with a grand old name

Be sure to see and drive  
America's New Choice  
in Fine Cars

The new Packard bears the oldest and the proudest name in fine-car history, and the new line of Packard automobiles recently announced gives the American people, for the first time in years, a "new choice in fine cars."

People who grew up with Packard—and people who want to enjoy Packard prestige—today are visiting Packard showrooms in ever-increasing numbers.

A Packard dealer will be glad to put one of the new cars at your disposal at any time. We believe you will find the time you spend seeing and driving this great new car with this grand old name a gratifying and rewarding experience. Plan to visit your Packard dealer.

Now—Ask the Man Who Owns One

"Found in a Packard..."

a familiar phrase to people who have shared Packard's long and illustrious record for quality.

Here are a few features found in the new Packard—America's new choice in fine cars—

- .... Contour styling that is setting the trend in modern motorcar design.
- .... More power than you will ever use. The famous Packard engine is acknowledged to be one of the finest in the world.
- .... Greater visibility than any other car in its field. Parking and backing are much easier.
- .... The smoothest, safest and most dependable

automatic drive ever built. That's the Packard Ultramatic—without extra cost to you in the Packard Patriotic.

.... More leg room! Five inches more in the back seat. More head room, too. You can get in and out of a Packard with comfort.

.... The most modern motorcar air conditioning available in all models.

.... And, of course, for years Packard's famous riding qualities have been the envy of the automotive world. "Rides like a Packard" is the ultimate compliment!

.... Power steering and power brakes available at extra cost on all models.

.... A wide range of models and colors. Sedans, convertibles and hard-top convertibles.

NEW! The Packard CLIPPER—another great Packard line. If you plan to buy a car in the medium-price class, be sure to see and drive the Packard CLIPPER, compare it with other medium-priced cars.

# Life Becoming Increasingly More Difficult For Communists In These United States

By Raymond Wilcove  
Central Press Correspondent  
Washington — America's 25,000 Communists are fast becoming the nation's most restricted citizens. Across the country, in state, city and hamlet, the American Communist is being hemmed in by legal restrictions.

Now Congress, appalled by the many witnesses who deny investigating committees by pleading possible self-incrimination, is trying to find some way of stripping away this constitutional safeguard without impairing basic civil rights.

More and more the American Communist is becoming a second-class citizen!

It was FBI Director J. Edgar Hoover who estimated there are 25,000 bona fide Communist party members in the country. Hoover added, however, that for every Communist there are 10 sympathizers.

Each of the 25,000 members will have to be registered with the Department of Justice by the Communist party if the United States Supreme Court upholds the action taken by the subversive activities control board. The board ruled the party was controlled by the Soviet Union.

General view of the hearing room during a session in Washington of the House un-American activities committee as it heard Frank Coe (white coat, on witness stand at the right).

However, this is still probably years away. Already, however, the American Communist finds his movements continuously hampered, although not yet completely outlawed.

It is not a crime under federal and most state laws to be a Communist, but in 26 states he cannot run for public office.

He is barred from holding jobs in the federal government, nor can he work in atomic installations or for private firms having secret military contracts.

In 28 states he cannot hold civil service positions; he cannot be a civil defense worker and he cannot rent an apartment in a federal low-cost housing unit.

The State department will not grant him a passport to leave the country. If he is naturalized, he may lose his citizenship and be subject to deportation.

In 11 states and in hundreds of communities he cannot hold meetings in school buildings. Many private halls bar him. In 32 states he cannot serve as a teacher, because

he must take a loyalty oath that he is not a Communist.

He cannot hold office in a labor union which wishes to avail itself of the facilities of the National Labor Relations board. In many unions, he cannot become a member.

He will find it very difficult to hold a job in motion pictures, radio or television once his affiliation becomes known. In Pennsylvania and Ohio, if he loses his job, he cannot receive unemployment compensation.

In Georgia, Massachusetts and Pennsylvania it is a crime to be a Communist. The courts have still to pass upon the constitutionality of these laws.

However, generally speaking, it is not a crime to be a Communist in the United States. He is protected in many ways by the Constitution and still has many of the rights and privileges of other American citizens.

He can vote in all but three states, recruit members for the Communist party, nominate Communist candidates for office in many states, publish Communist

newspapers and magazines, operate Communist schools, usually disguised as Marxist and Workers schools, carry party membership cards, purchase time on radio and television for political speeches during election campaigns, speak at public rallies and at public parks, and maintain Communist party headquarters.

Under the McCarran-Walter Immigration law, no Communist may enter the United States, except by special permission of the attorney general. This prohibition also applies to former Communists. If he escapes detection upon entry, he can be deported for falsifying his record when it becomes known.

If the ruling of the subversive activities control board is eventually upheld, the Communist party will also have to furnish an accounting each year of its income and expenditures, identify all its contributors, and mark as Communist all the literature it mails. The board is now preparing to take the same action against Communist front organizations.

The life of a Communist in the United States is becoming increasingly difficult.

## Importation Of Live Bears Held Unlawful

The office of the Pennsylvania Game Commission, Northeast Division, at Forty Fort reports that the attention of field officers of the division has been called to a type of game law violation which becomes prevalent at this season of the year.

Certain residents of Pennsylvania, while on fishing trips in Canada or in other states where the black bear is not protected, come into possession of cub bears and bring them with them upon returning to their homes.

By resolution of the Game Commission adopted Oct. 8, 1948, under authority of Section 723 of the Act of June 3, 1937, the importation of live bears, except for menagerie, educational or zoological purposes, is unlawful and subjects the offender to the penalties provided by law.

The same resolution makes it unlawful to release any bear or bears that have been brought into the Commonwealth from any other state, province or nation.

## Tannersville

Mrs. William Clugston  
Ph. 2604K3

Pocono Township 4-H Club met on June 11. Marie Besecker, Dot Besecker and Joyce Hay were appointed to see Mrs. John Smith with regard to having a display at the Pocono Flower Show in August. The new County Agent, Luther Zimmerman, inspected the projects of various members recently and Mr. Hft showed members about care of strawberry plants. No date was set for the next meeting.

Among birthday celebrants are: June 14, Homer Brong; June 15, Arthur Youngkin; June 18, Gertrude Walters; June 19, Donald R. Law and Marie Besecker; June 20, Bonnie Kaye Besecker and David P. Learn; June 23, Caryl Nidlund; June 24, Betty Snyder, Patricia Hay, Pamela Andrade and Hilda Werkheiser; June 25, William Clugston; June 27, Lorraine Anglemeyer and June 29, Mary Werkheiser.

## Stroudsburg Eagles To Send Delegation Of Officers To Scranton State Convention

Stroudsburg will send a delegation of officers to the 42nd annual state convention of the Eagles opening Thursday in Scranton and continuing through Sunday.

The local aerie will be represented by Harold Blair, president; George Mackey, past president; Ernest Ridgeway, trustee and official of the state organization; Lester Voss, secretary; Al Ruster, who just completed a term as immediate past president and George W. Price, also a past president.

Opening session Thursday night will honor Morgan W. Harris, who retired last December after serving 12 years as secretary of Scranton Aerie, No. 314.

A large convention class of new members from Northeastern Pennsylvania will be named after Mr. Harris, who joined the organization in 1908. He has held every office, including steward a short time before he was named secretary.

Albert Williams, state vice president and member of the Bethlehem lodge will conduct the ritualistic work. Mr. Williams is slated for the state presidency.

More than 900 delegates from 162 state aeries are expected to attend sessions. Business sessions start Friday at 1:30 p. m. in Hotel Casey.

Speakers on Friday will include Gov. John S. Fine; John Gallagher, Grand Lodge—representatives, Mayor James T. Hanlon and county officials.

Saturday's program opens at 10 a. m. State banquet will be held at 6 p. m. in Hotel Casey.

Robert W. Hansen, Milwaukee, Wis., past grand worthy president, will be speaker.

John A. M. McCarthy, Philadelphia, state president, will preside.

## Mount Pocono

Mrs. L. T. Powers

A Pennsylvania Dutch entertainment narrated by Charles and Carole Noss, York, Pa., with the customs of these people depicted through the use of a color film will be given at Manor Hall, Pocono Manor, Thursday night, June 25 at 8:15 for the benefit of the building fund of the Mt. Pocono Methodist Church and the Trinity Episcopal Chapel here. Tickets are now available and may be obtained through various members of either church.

Miss Hilda Werkheiser, Springfield, Pa., is spending several weeks of her summer vacation with her grandparents, Mr. and Mrs. M. James West.

Pvt. William Johnson, stationed at Ft. Knox, Ky., spent the weekend with his parents, Mr. and Mrs. William Johnson Sr.

Wm., past grand worthy president, will be speaker.

John A. M. McCarthy, Philadelphia, state president, will preside.

## Portland

Mr. and Mrs. Enslay Predmore left last week by train for Los Angeles, Calif., where they will be the guests of Mrs. Predmore's sister, Dr. Evelyn Davies, assistant professor at the University of California. After a stay of several weeks, Mr. and Mrs. Predmore will return East by automobile with Dr. Davies who will spend a vacation with the Predmores and her parents, Mr. and Mrs. G. J. Davies.

Jean Lorraine Golden, daughter of Mr. and Mrs. William Golden, was baptized on Sunday at the Lutheran Church at Johnsonville by the Rev. John Early.

Mr. and Mrs. Fred Kellogg and children, Jeannine and Priscilla, of Towanda, spent the weekend with Mrs. Kellogg's parents, Mr. and Mrs. Frank Gardner, Sunday visitors at the Gardner home were their son and daughter-in-law, Mr. and Mrs. Nathaniel Gardner, of East Stroudsburg.

Mrs. Henry Webb celebrated her birthday on June 19. Mrs. Howard Ott observed her natal day on Sunday, June 21.

Mr. and Mrs. Carl Kramer and Miss Erma Pritschow attended the Ziegler-Hand wedding in the Moravian Church, Nazareth, on Saturday. They later attended the reception at Ross Common Manor, Saylorsburg.

Mrs. Donald Williams, of Mt. Bethel Rd. is a medical patient at Easton Hospital.

Mrs. M. C. Saiger, of New York City, is spending some time with Mrs. E. Randall Carpenter. Mrs. Saiger is the mother of Mrs. Carpenter's son-in-law, Dr. Ralph Staiger, of Hattiesburg, Miss.

The Afternoon Card Club was entertained at the home of Mrs. Harry Morgan on State Street on Thursday afternoon. Bridge was enjoyed and prizes won by Mrs. Horace Rusling and Mrs. Blair Rusling. Refreshments were served to Mrs. Wallace Hutchison, of Mt. Bethel; Mrs. John Herring, of Stateford; along the Delaware; Mrs. Horace Rusling, Mrs. Blair Rusling, Mrs. Raymond Scott, Mrs. E. Randall Carpenter, Mrs. Frank Gardner and the hostess, Mrs. Harry Morgan. The club will meet next week at the home of Mrs. Blair Rusling on Penna. Ave.

Stanley Williams of Main Street is a patient at the Monroe County General Hospital, at East Stroudsburg.

Mrs. Russell Reimer and sons, Baird and Rusty, and Billie Penyl, were visitors at Allentown on Thursday.

Mr. and Mrs. David Frome and sons, Richard and Steven, and daughter Linda, left on Thursday for their home in Dallas, Texas, after spending the past week with Mrs. Frome's parents, Mr. and Mrs. Earl Jones and son John, at Columbia, N. J.

Mrs. Isabelle Kennedy left on Friday for Easton where she will spend a week with her son and daughter-in-law, Mr. and Mrs. Edward Kennedy and family.

Mr. and Mrs. Horace Rusling and daughters, Jane and Joyce, were visitors in New York City on Wednesday.

Sgt. Frank A. Jones, of Kittanning Beach, Columbia, returned to the United States aboard the

## Mrs. Gladys Carpenter

Ph. Portland 22-B

ship General Taylor from the Free Territory of Trieste on June 13. Sgt. Jones was stationed in Trieste for 18 months where he taught classes on all weapons (small). He received his Army discharge after serving two years in the service, having entered the Army in July, 1951. Sgt. Jones is married to the former Ruth Olschewsky, of Kittanning Beach. The couple will make their home at the beach.

Miss Elizabeth Jane Hamilton, of Delaware Ave., is on the dean's list at State Teachers College, East Stroudsburg, for the second semester of 1953. To be on the dean's list a student must attain a quality point average of 2.0 or a B grade.

Frank Fregans, of West Orange, N. J., has returned to his home after spending a few days with his brother and sister-in-law, Mr. and Mrs. Harry Fregans, and son, Albert Fregans.

Mrs. R. W. Besecker, of Delaware Ave., is spending the week with her son-in-law and daughter, Mr. and Mrs. William Lane, and son Billy, in Philadelphia.

Miss Phyllis Fuls, of Upper Delaware Ave., has been admitted to the Monroe County General Hospital, East Stroudsburg.

## AEC Not Asking Restored Funds

Washington, (AP)—Sen. Saltonstall (R-Mass.) reported yesterday the Atomic Energy Commission is not seeking restoration of cuts voted in its funds by the House.

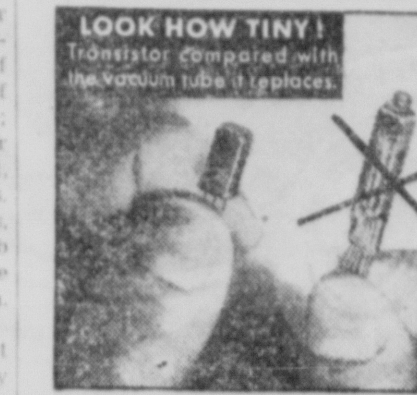

Chairman Gordon E. Dean and other officials of the commission appeared in secret session before an appropriations subcommittee headed by Saltonstall to testify on their fiscal 1954 budget.

The House voted \$1,957,731,000 for AEC operations in the next year, 38 million less than was requested in the Eisenhower budget and 535 million under the 1954 budget of former President Truman.

## Bus Men Will Work On Holiday

Poccano Manor — Pennsylvania's bus men will have their holiday at month's end, but it won't be the traditional "bus man's holiday." Instead, they will be gathering at the Inn here for the 32nd annual convention of the Pennsylvania Bus Association, June 29 and 30.

"Bus company owners and executives attending the convention had better come prepared to work and learn," Association President Har-ley L. Swift, of Harrisburg said yesterday. "It will be something like going back to school again. Of course, after school is over, there will be plenty of time and opportunity to play, but the first order of business will be to see what we can do to keep buses rolling all over the state in spite of declining revenues and increasing operating costs and taxes."

Transportation executives from many parts of the country will participate in the convention as speakers and members of panels. Among them will be Donald C. Hyde, general manager of the Cleveland (Ohio) Transit System; Arthur C. Horrocks of the Good-year Tire and Rubber Co., Chicago and W. Y. Blanning of the Interstate Commerce Commission, of Washington, D.C.

Two of Pennsylvania's Public Utility Commissioners also are scheduled to address the bus men. Henry Houck will be a member of the opening day panel discussion on problems raised by the bus industry's growth, and Thomas C. Egan will be the first day's luncheon speaker.

Among the state's bus executives who will also participate in the program are Wilson C. Feick, of Brentwood; F. D. Spofford, Hagerstown, Md.; O. P. Young, Allentown; Noble Dick, Pittsburgh; Mrs. J. P. DeBolt, Homestead; William Edwards, Williamsport; and Clifford T. Foster Jr., Chester. Col. Swift will preside at all sessions. The program was arranged by J. Gordon McCrindle of Scranton.

New officers will be elected and installed as the last order of business on the convention's closing day. A record number of exhibits by manufacturers of buses and bus equipment have been arranged for the convenience of the 250 bus men expected to attend the convention.

## Vanity Lavatory Adds To Beauty

A vanity-style lavatory is easy and inexpensive to make, adds to the beauty and usefulness of an old-fashioned bathroom, and provides considerable additional storage space.

Build a frame of 2x3s around the washbasin, with the top of the frame 5/16" below the top rim of the bowl. Extend this frame as far on both sides of the bowl as space will permit. Install two or three shelves in the framework.

Cover the top and sides of the frame with 5/16"-thick GPX plastic-faced plywood which is virtually waterproof. Make doors for the front, using the same material. After the lavatory is enclosed, paint the plywood any desired color.

## Avoid Smudge

Wire finishing nails often make a carpenter's fingers dirty when he is nailing trim. The smudges are transferred to the trim and take time to sand off. One way to prevent this is to put a handful of sawdust with the nails in the pocket of the carpenter's apron. The sawdust keeps the nails and fingers clean.

## Attractive Sun Room

The upper walls of an attractive modern sun room, furnished in rattan, are painted in tangerine. Floor, ceiling and dado are in a cool gray. Drapery and upholstery fabrics combine green-gold, tangerine and deep green.

Britain imports more food than any other country, says the British Information Service.

EMMY KELLEY was selected as the prettiest nurse at the Los Angeles General Hospital. At left is Julia McCall, the runner-up. Miss Kelley will compete with representatives of other California counties on August 30 for the state beauty title.

## PP&L Extends Deadline For Stock Transfer

Deadline for shareowners of the Scranton Electric Co. to exchange for Pennsylvania Power & Light Co. stock has been extended to 3 p.m. July 15. In view of the large number of shares already deposited for exchange, it was felt that an extension of time should be made because of tax benefits to Scranton share owners should 80 per cent of the common stock and 80 per cent of the preferred stocks as a class be exchanged.

The announcement was made late yesterday by Charles E. Oakes, PP&L Co. president, who said that if the 80 per cent were reached, the exchange would be freed from Federal income tax, according to information given him by tax counsel for PP&L Co.

In addition to the tax advantage to Scranton share owners, the exchange also becomes effective automatically when the 80 per cent point for both the common and preferred stock is reached. As of yesterday's original closing date, 76 per cent of the common stock, 63 per cent of the 4.40 per cent cumulative preferred stock and 61 per cent of the 3.35 per cent preferred stocks of the Scranton Electric Co. had been deposited for exchange.

## Metal Molding Back

Metal moldings to be used in bathrooms and kitchen are back on the market. Practical Builder, trade publication, reports. Special treatment of the molding should insure tight and permanent adherence of metal shell to wood.

## Radiator Valves

If radiators do not heat all the way across there probably is an obstruction in the air valve. Take it off and blow through it. If this does not remedy the condition, get a new valve.

## Tip On Washers

Leather washers should not be used for hot water faucets and valves. They don't stand up long under the high temperature. Fiber washers should be used.

## Window Cord Care

Window cords will last longer, and raising and lowering of the windows will be easier if cords are dusted twice a year and rubbed with an oil-saturated cloth.

## Most Workers Need Social Security Cards

Vacation times are now here and many area students are already starting out to look for their first job. Some will be looking for work during only the vacation period and others will be seeking permanent employment. In either case, Marie T. Miller, manager of the Easton Social Security office, advises these young people to be sure that they have a social security account number card.

The manager said almost all types of employment are now under the social security program and that in applying for such a job the applicant will have to furnish his employer with his social security account number.

Miss Miller explained that the employer will be required to report the amount of wages paid the individual and that in making this report he must show the employee's name and social security account number. This is necessary to be sure the worker receives full credit for all wages paid him.

"Employers know the importance of the social security account number and consequently, many of them will not hire an individual unless he has his social security account number card. Your chances of getting a job will therefore be much greater if you have your social security card with you when you apply," Miss Miller said.

A person who has already had a social security account number assigned to him should never get another one; he should always ask for a duplicate card with the same number that was assigned to him originally.

Social Security account number cards may be obtained free of charge at the Easton Social Security office, 33 S. Third St. Outside the city of Easton, applications for account numbers may be obtained at any postoffice.

## How To Remove Broken Handle

An easy way to remove the remains of a broken wood handle from an ax, hammer or chisel is to drill a few holes in the wood, pour in some kerosene and when the wood is saturated, set it on fire. But first stick the metal portion of the tool in damp sand or earth; otherwise the heat may cause it to lose its temper.

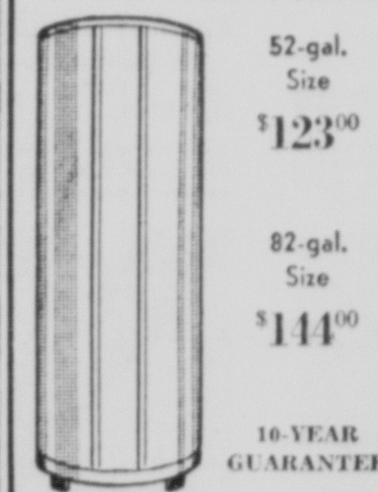

## Aids In Roof Repair

Plastic cement is similar to asphalt-asbestos roof-coating, except that it is of troweling consistency. Used to repair holes in roofs, walls, foundations, etc., it is sometimes known as "asphalt putty."

## Automatic ELECTRIC HEATERS

Constructed of heavy galvanized steel with Fiberglas insulation and white enamel finish. Heavy duty immersion-type double heating elements. Fully automatic, easily installed.

## Trend Reversed As Majority Of Home Buyers Express Preference For Basements

By David G. Bareuther  
Associated Press Real Estate Editor

Why build a house with a basement?

Compact modern heating plants, using oil or electricity, take up no more space than a refrigerator, eliminating the need for large coal-storage bins. Virtually all women prefer laundries on the ground floor where they are rid of stair climbing. Builders have demonstrated that it is entirely practicable to build sound and comfortable houses without basements in the coldest regions.

So why pay for a basement? Architects and builders, even engineers for government agencies have explored this subject to give you the best answer. The shortest answers are offered by Rudolph A. Matern, famous architect and authority on home planning. He says:

One—"Because most people, outside of the southern states, prefer basements, and

Two—"Because basements provide the cheapest space that can be built."

## A Trend Is Reversed

For years it appeared that basements were definitely on the way out. The Housing and Home Finance Agency in Washington made a survey of all houses built in 1950 and found that full basements were provided in only about 36 per cent of the homes.

"Virtually all the rest had no basements, showing the shift toward crawl-space and slab-on-grade construction," that report said.

Back in 1940 a survey by the

FHA had shown that more than half of all new houses had basements.

Arvid Peterson, veteran home builder and president of the Homograft Corp., in East Detroit, Mich., said:

"If you ask me a year or two ago, I would have said that 20 years from now there would be no more basements. Today the outlook is entirely reversed."

A large scale home builder on New York's Long Island erected two identical sample houses. One had a basement, the other had none. The house with a basement was priced at almost \$1,000 more than the basementless house. Nine out of 10 buyers ordered houses with basements, willing to pay the extra price.

## What People Want

Architect Matern now predicts a new trend—the glamorizing of the basement. He bases his prediction on one of the most exhaustive studies that have been made on this subject.

Analyzing more than 116,500 inquiries he has received from prospective home builders since 1946 and more than 38,000 houses built from his plans, Matern has found that in very small houses (up to 900 square feet) basements are preferred. In medium sized houses (from 900 to 1,100 square feet) building on a slab is acceptable. In larger houses (over 1,100 square feet in area) basements again are in big demand.

Matern then made a specific test. He designed a three-bedroom house which could be built for the same amount of money with or without a basement. When a

basement was included the house covered 1,066 square feet—a popular medium size. By omitting the basement 220 square feet could be added to that house for the same cost. This permitted the addition of an adequate utility room to accommodate the kitchen for laundry space and the provision of a multipurpose room measuring 10 by 14 feet—all for the same cost as the basement.

The result? Only 30 per cent of the families who built houses from those plans chose the larger house with no basement.

## Bargain Space Is Offered

No average family needs all of the space a basement provides—but it is bargain space no matter what building costs prevail when a house is built. Architect Matern sums it up this way:

"You get very usable space for about \$1 a square foot. To build that space above ground would cost many times that amount. While the cost of building a house may range around \$13 to \$14 a square foot because of kitchen and

bathroom equipment included, even to enlarge a house without the addition of such extras would probably run around \$7.50 a square foot in contrast to \$1 for basement space.

Furthermore, that basement space could be made very livable, attractive, comfortable and healthful for no more than a total of \$1.50 a square foot."

He makes this prediction: "As long as there is such an obvious demand for basements, there is certain to be a revolution in the design of basements. How would you like to live in a living room or bedroom with only one or two small windows up at the ceiling? There is no good reason for planning basements with such dismal window arrangements."

## Flowers and Sunshine

"Basements should and will have more and bigger windows. Instead of having basement windows and areaways outside of them only about two feet deep and very slightly wider, why not enlarge the windows to perhaps four feet

square, with large and deep areaways covered with glass and screening in greenhouse fashion?

Mr. and Mrs. Walter L. Howey

(Record Photo)

## Ruth Safin Is Bride Of Walter Howey

Miss Ruth Elizabeth Safin, daughter of Mrs. Edna M. Safin of 281 South Courtland Street, East Stroudsburg, became the bride of Walter L. Howey, son of Mr. and Mrs. Henry Howey of Dingman's Ferry on Saturday afternoon, June 20 at 5 p.m. at the East Stroudsburg Methodist Church.

Rev. Harold C. Eaton performed the double ring ceremony. Michael Hannan was soloist, and sang "I Love You Truly," and "The Lord's Prayer."

The bride who was given in marriage by Earl Rau, wore a ballerina length gown of white, nylon lace. Her white veil was held by a coronet of lily of the valley. She carried a white prayer book with a corsage of white orchids.

Mrs. Pauline Lee of 279 South Courtland Street was her matron of honor. Georgiann Nevil of 307 Wallace St., Stroudsburg and the bride's sisters, Gertrude Safin and Mrs. Iola Van Horn were bridesmaids.

They all wore ballerina length gowns in pastel shades of green, lavender, pink and aqua with white accessories and carried bouquets of yellow roses.

Robert Lee was best man and the ushers included Richard Safin, Donald Mosier, and Joseph Canfield.

The bride's mother wore a dress of navy blue with white accessories and a corsage of red roses. The bridegroom's mother wore a dress of powder blue with white accessories and a corsage of red roses.

Following the ceremony a reception for 100 guests was held at Shaffer's Inn, East Stroudsburg RD 2. Roses and peonies formed a bridal arch for the young couple.

The bride attended East Stroudsburg High School and is employed at Art Metal Co. Mr. Howey attended Milford High School and is a veteran of World War II. He is employed by the State Forestry Association. They plan to make their home at East Stroudsburg, RD 2.

## Saylorsburg 4-H Club Meets

Saylorsburg — The 4-H Club held its regular meeting at the firehall on Wednesday afternoon at 12:30 with President Charlotte Neal in charge. The secretary, Darlene Frable, read the minutes and Cathann Bonser gave the treasurer's report.

Joan Hunt who was a new member was elected song leader. After the business meeting, the girls began their study of child care, their project for the summer.

## Party Marks First Birthday

Evelyn Counterman, daughter of Mr. and Mrs. Paul Counterman, of 47 Yetter St., celebrated her first birthday on Sunday. A birthday cake, soda and ice cream were served her little guests Claudia and Richard Ludwig, Vincent and Boyd Counterman.

Older people present included Nancy Albert, Nina Counterman, Evelyn's grandmothers, Mrs. Evelyn Ludwig and Mrs. Lillian Counterman.

## Sara Mae Messerle Is Honored At Birthday Party

Bushkill — A birthday party was held on Wednesday, June 10, in honor of Sara Mae Messerle at her home. It was an outdoor party featuring a hot dog and marshmallow roast, dancing and games. Sara Mae had four birthday cakes baked by Mrs. Lyle Staples, Mrs. Frank Messerle, Mrs. Lester Fish and Mrs. Louis Messerle.

Guests included Patty Hunt, Edna Hendricks, Margaret Smiley, Harriet Hartman, Janet Snyder, Judy Ladlee, Buck Freeman, Lila Mae Ladlee, Carl Smith, Dick London, Jean Edinger, Ruth Minter, Bob Heller, Ruth Dickson, Shirley Valterscamp, John Shaffer, Gary Sterner, Deane Hendricks, Louis Fish, Art Garris, Marvin Bogart, Marcia Kelper, Dick Dickson, Jim Collier, Norm Findlay, Katy Reider, Art Myers, Ray Boyer, Marlys Messerle, Art Booth, Kerry Messerle, Rose Ann Messerle, Alice Miller, June Staples, Frankie Messerle, Gary Fish, Donald Smith, Mary Ann Howey, Toot Ace, Mr. and Mrs. LeRoy Hendricks, Mr. and Mrs. Bernard Fish, Mr. and Mrs. Fred Messerle, Mr. and Mrs. Lester Fish and the hosts, Mr. and Mrs. Louis Messerle.

## Just Between Us

—By Bobby Westbrook

It seems that man needs to suffer to feel appreciative. When the storm clouds blew up yesterday afternoon and the rain redampened the wash lines in Stroudsburg (but not in East Stroudsburg) it was greeted with cheers instead of groans.

Ordinarily, everybody would have sighed "Not again," when the sky clouded over just as the men were coming home from work, but after four sweltering days, anything that made a cool shade and brought the breeze was welcome, even on wash day.

Of course, we need good weather for all the picnics today, but actually the day I'm waiting for is the day our young Lochinvars ride out of the West. I've compared notes with the other mothers and it seems that the time has flown swiftly, up till now, that it.

Now when you know that they're on their way home and the calls start coming through—Colorado, Kansas, Illinois—then the time really drags.

And the questions you've been holding at bay come pouncing in like tigers. Has the trip changed them and how? Have they lost or gained weight? Were they very lame from horseback riding? Will they be glad to get home or will the apron strings start to chafe?

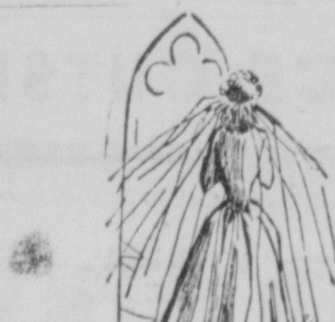

How much of the gear that they started with are they bringing back? But most of all is the When? Tuesday night? Wednesday night? And how will we live until then?

## Helen Angle Arthur Bond To Be Wed

Portland—Mr. and Mrs. Irvin Angle of Portland announce the approaching marriage of their daughter, Miss Helen May Angle to Arthur William Bond, son of Mr. and Mrs. Arthur B. Bond, of Stroudsburg.

They plan to be married in the Lutheran Church at Stone Church on Saturday, June 27, at 2:30 p.m. All their friends are invited to attend the ceremony.

## Eastern Star Banquet Draws Many Officials

Monroe Chapter No. 99, Order of Eastern Star held its 47th annual banquet at High Point Inn, Mount Pocono, on Wednesday night, June 17, with 145 attending. Mrs. Marjorie Canfield, worthy matron, gave the formal welcome and introduced the guests.

They included Mrs. Emile Coyne, of Coopersburg, worthy grand matron of the Grand Chapter of Pennsylvania; Lester Hawk of Nazareth, past grand patron and grand trustee; Mrs. Sallie Berger, of Northampton, grand chaplain; Mrs. Esther Reed of Coopersburg, grand marshal; Mrs. Florence Reppert, of Catawqua, grand organist; Mrs. Blodwyn Klimzak, of Bethlehem, Grand Eater; Mrs. Kathryn Weher, of Coopersburg, district deputy grand matron of district 24A.

The following grand committee members were also introduced: Mrs. Madge Brazill of Allentown, and Mrs. Adele Van Syckle of Bangor, international temple; Mrs. Miriam Huth of Nazareth, cancer registrar; Mrs. Bertha Miller, Pen Argyl, registration; Mrs. Clementine Crossdale, Stroudsburg, credentials; Mrs. Kathryn Shupp, East Stroudsburg, rehabilitation; Mrs. Irene Ruffell, Nazareth, aid to overseas needy.

There were also many of the worthy matrons of nearby chapters including: Mrs. Gladys Schuler of Mary Livingston Chapter, Allentown; Mrs. June Dentith, Schuylkill chapter, Pen Argyl; Mrs. Alma Miller, North Penn Chapter, Coopersburg; Mrs. Margaret Halbforsster, Nazareth chapter, Nazareth; Mrs. Eleanor Mushrush, Jessie K. Berlin Memorial chapter, Catawqua; Mrs. Frances Deily, New Temple Chapter, Allentown; Mrs. Edith Kitchel, William Parsons chapter, Easton; Mrs. Emaline Peters, Rose Croix Chapter, Northampton; Mrs. Ruth Crosland, Calypso Chapter, Bethlehem.

Mrs. Gladys Haigh, local chaplain, gave the invocation. Lucant Hill of Lehighton was soloist. Miss Bess Gardner played her accompaniment.

The entertainment was provided by the Chansonniers of Easton with songs of yesterday and today. Gloria Hunt, soprano; Harold Sigafos, tenor; Dave Parks, baritone and Jack Schug, pianist composed the group.

As favors, Eastern Star white coin purses were presented to the women and cigars were given to the men. Walter Sebring led the group singing with Jeanette Harris as accompanist.

Dancing and cards followed the banquet. In charge of arrangements were Mrs. Sarah R. Hafler, Mrs. Alice H. Staples, Mrs. Dorothy Lim, all past matrons; Mrs. Lillian Wagner, secretary; Mrs. Mabel Lanterman, treasurer; Mrs. Bessie Morman, associate matron; Mrs. Verna LaBar, conductress and Mrs. Mabel Shook, associate conductress.

## Daughter Is Born

Word has been received of the birth of a daughter to Mr. and Mrs. James W. Becker, of Easton, Pa., on June 11. The baby has been named Karen Sue.

Mrs. Becker is the former Miss Doris Gagnon who lived at 104 Prospect St., daughter of Mrs. Bessie Gagnon of East Stroudsburg. The Beckers celebrated their second wedding anniversary on June 16.

## Card Party Tonight

The Laurel Court, Order of Amaranth, will hold a card party tonight at the home of Mrs. Ruth Shiffer, 1742 Pokono Ave., at 8 o'clock. Mrs. Betty Trethe-way will be co-hostess and all members and friends are invited.

## Women Launch Playground Project

Tannersville—The Ladies Auxiliary of the Pocono Township Vol. Fire Co. met at the firehouse on Thursday night, June 18, with a fine turnout of members. Mrs. Louisa Metzgar, president, was in the chair. The main topic for discussion was the community project of equipping and maintaining a playground in the rear of the firehouse.

The members of the organization will conduct a house to house canvass on June 25 for subscriptions toward the start of this project.

Mrs. Alberta Horn addressed the meeting and talked of various aspects of such a project and the benefits to be derived therefrom.

Committees were appointed for the various tables the ladies will conduct at the carnival to be held July 13-18. Donations for the baked goods, fancy work, grab bag, white elephant booth will be appreciated.

A new feature this year will be the Pottery Wheel, with attractive dishes to be awarded. One night there will be a pet show and another night a Doll Show.

The Indian design sweater, made by Alice Raish, and on display in the NuWay Market, will be sold. Frances and Elsie Beeseker are in charge of the clean-up work in the kitchen during July. Cora Smith and Mary DeHaven were hostesses for the meeting and served strawberry shortcake and cream.

## The Elvin Rakes Are Honored On 25th Anniversary

South Sterling — A surprise party was given Mr. and Mrs. Elvin Rake at their home here last Wednesday on the occasion of their 25th wedding anniversary.

The couple received many lovely and useful gifts. Refreshments were served.

The following attended: Mr. and Mrs. James Lewis and James Jr., Mrs. George Frisbie and children, Robert and Sharon, all of Canadensis; Mr. and Mrs. Ray Smith, La Anna, Mr. and Mrs. Edgar Kipp and children, Larry and Dale, all of South Sterling.

Mrs. Henry Zielinski and children, Diane and Henry Jr., and Mr. and Mrs. John Smith and daughter, Kathy, all of Newfoundland; Mr. and Mrs. Jacob Welland and Mr. and Mrs. Jacob Shaffer and daughter, Shirley, Greentown, and Mr. and Mrs. Richard Welland of Promised Land.

## Youth for Christ Picnic Marks Welcome, Farewell

The third annual picnic of the Youth for Christ of Monroe County was held at Shadowbrook on Saturday, June 6. Swimming in the afternoon was followed by a softball game and a covered dish picnic.

The group presented a farewell gift to Rev. Robert Bradburn who has served as song leader and Bible study teacher during the past year. They had collected almost enough money to pay for a 35 mm. camera for him to take to Thailand with him.

The picnic also served as a reunion with a number of former members home including Marcela Coulon, former student at the local college here from Philadelphia; Marjorie Reynolds home from Providence Bible Institute and Joan Harl home from Temple University where she is in training as a nurse.

It was announced that two members planned to leave for Kings College in the fall: Richard Wilson and Mary Comunal. This will bring to four the number of members who have decided to study for full time Christian service during the last two years. Besides Miss Reynolds, Bill Bensen, a graduate of East Stroudsburg State Teachers Col-

## Patty Litts On Finch Dean's List

Miss Patricia Ann Litts, daughter of Mr. and Mrs. G. H. Litts, of East Stroudsburg, RD 2, has been named to the Dean's List at Finch College, New York City where she is majoring in business administration.

Miss Litts is active on the Finch College Newspaper Staff, the human relations club, the social committee and athletic association. Prior to entering Finch, Miss Litts was graduated from Moravian Seminary, Bethlehem.

## Local Guests At Wedding In Northumberland

Miss Mardell G. Weist, daughter of Mr. and Mrs. Nevin A. Weist of Northumberland and Jacob A. Walz Jr., son of Jacob A. Walz of Sunbury were married recently at the Baptist Church in Northumberland. Rev. J. W. Blair performed the ceremony and Mrs. Blair was organist and soloist.

The bride, given in marriage by her father, wore a gown of white marquisette with a strapless bodice of Chantilly lace. Her fingertip veil fell from a shell cap of white satin illusion and seed pearls and she carried a Colonial bouquet of white carnations and baby breath.

Mrs. Norma Lehr, classmate of the bride, was matron of honor. She wore Alice blue marquisette and lace with a matching head-dress and carried a Colonial bouquet of pink carnations and babies breath.

Following the ceremony a reception was held at the home of the bridegroom, Monroe County guests included Mr. and Mrs. Layton DeHaven, Mr. and Mrs. LeRoy Batchlor and daughter, Ruth, Mr. and Mrs. Earl Brong and children, Karl and Eleanor, Mr. and Mrs. John Lutjen and son James, Mrs. Stewart Werkheiser and children Bernada, Robert, Lois and Floyd and Glenn, all of Brodheadsville.

There were also guests from Sunbury and Northumberland. Mr. and Mrs. Walz are spending their honeymoon in the Poconos.

## Snydersville 4-H Club To Study Sewing

Snydersville—The 4-H Club of Snydersville met at the home of Mrs. Russell Bond on June 17. The club plans to take sewing as its summer project. A committee was named to select a name for the club, and another to take charge of refreshments each week.

There were 10 members present at the meeting and they were served with cake and soda in celebration of the birthday of Beverly Bond, club treasurer, who was 12 years old on their meeting day.

Mrs. H. C. Archibald, who makes her home with her son-in-law and daughter, Mr. and Mrs. Elmer Kiefer Jr., will mark her 85th birthday today. There will be no formal celebration since she has been ill for some time.

## Around The Stroudsburgs

Russell Yoch of 18 North Green St., East Stroudsburg, has been admitted to St. Luke's Hospital, Bethlehem, as a medical patient.

Mrs. H. C. Archibald, who makes her home with her son-in-law and daughter, Mr. and Mrs. Elmer Kiefer Jr., will mark her 85th birthday today. There will be no formal celebration since she has been ill for some time.

## Past Councilors

The Past Councilors, Daughter of America, will meet on Friday night at the home of Mrs. Martha Janusz, 90 Smith St., in East Stroudsburg.

Jege is studying at Eastern Baptist Seminary.

Plans were made for a youth council meeting to be held at the home of Mrs. Rachel Sarley, on Saturday June 27 at 8 p.m. Weekly prayer meetings are also held at the Sarley home each Tuesday night.

## Baby Shower Is Held For Mrs. Razny

Newfoundland — A baby shower, in honor of Mrs. Elizabeth Fossgreen Razny, was given by her sisters, Marie and Millie Fossgreen, at their home in Angels, Tuesday night, June 16.

Guests included Mrs. Ann Razny, Mrs. Diane Razny, Mrs. VanBuskirk, Mrs. Elaine Miller, Mrs. Vera Newcomer, Mrs. Doris Voeste, Mrs. Shirley Butler, Mrs. Helen Fossgreen, the guest of honor and the hostesses.

Games and refreshments were enjoyed by all. Sending a gift but unable to attend was Mrs. Lucille Smith.

When the lights flickered out during yesterday's threatened electric storm, one was reminded of last winter's bout with ice—the candlelight, fallen wires, and COLD. Remember? ... One new item of merchandise in our sports-ware department recalls the laughter and fun of a Bob Hope movie, "Fanny Pants." This happens to be the name given a delightful new bit of feminine apparel—an up-to-the-minute version of the pedal pusher, coming straight from the Italian Riviera.

These trim pants have a band that ties in a bow just below the knee, while another version, in cotton twill, has a lacer similar to the one you might find in your sport shoes. Solid colors are available in the twill and crinkle crepe, but the seersucker comes in red, white and blue stripes only. In sizes 16 to 20, these are priced lower than the mercury in March, and will go a long way to "booy up" even the most feminine lass ... Elsie Miller of our toy department is wearing the new "dolly stockings" and says they feel wonderful. This elasticized hosiery is just what you need if you bend a lot at work, for it stretches easily, with never a snag, sag, or bag ... These nylons are really SMOOTH ... Smooth, let's repeat that word and apply it to skin and hair. You've probably heard Arthur Godfrey expounding on the merits of Lanolin Plus, and everything he's said is true. It's sensational. The skin cleanser, for either dry or oily complexion, is the color of gold, and just as good. The hair conditioner is a rich, ivory color, and stimulates and conditions the scalp even while it controls fly-away locks. Getting down to a magic formula—which it is—Lanolin Plus U equals BEAUTY, A to Z ... Know where I'd like to be this minute? No, not on a beach, or even on a faraway island under a Palm Tree. I'd like to be in a bathtub, with water to my chin, and bubbles of creamy lather soaking away the grime and discomfort of the day. A bath can be a luxury—with scented pearls softening the water, and crystals giving off the fragrance of a country garden. Then, after the rubdown, there's nothing more refreshing than a dash of cologne and a sprinkling of some wonderful talc. Wonder if there's time for all that before dinner? ... Yesterday the whole store was talking about: the news item concerning the red shirt given Mr. E. H. Wyckoff by the Boy Scouts; the name, Thomas Alan, chosen by the Graham Kineharts for our Tommy's grandson; the weekend marriage of Margaret Oldorf and Vernon Imbi, which attracted dozens of the bride's Wyckoff colleagues despite the heat; and the fact that souvenirs were our biggest selling items of the morning. All the city visitors must have remained over for a bit of shopping ... Our new souvenir window is attracting a lot of attention, and it won't be long before every youngster in town will

## Miss Waltz Is Bride Of James Grimm

Honesdale—Miss Elizabeth Ann Waltz, daughter of Mrs. Harriet Waltz, 325 Park Street, Honesdale, and James H. Grimm, son of Mr. and Mrs. Harry Grimm, Greentown, were wed here Saturday afternoon.

The St. John's Evangelical Church, decorated with white roses and pink mountain laurel, was the scene of the double-ring ceremony performed by Rev. Albert F. Klepper, pastor of the church.

Mrs. B. Clinton Hughes, Bristol, Conn., the bride's aunt, was the vocal soloist, singing "At Dawn-ning," "Because," "O Perfect Love" and "The Lord's Prayer." The organist was Miss Eleanor Trask, Honesdale.

The bride wore a gown of misty nylon tulle. The Elizabethan effect at the neckline was enhanced by the exquisite cutaway redingote of imported chantilly-type lace which tapered to a veil of illusion fell from a cap of lace, trimmed with seed pearls. Flowers were a cascade bouquet of white roses with a white orchid center.

Mrs. James Bovard, East Orange, N. J., was matron of honor. She wore a gown of turquoise froth of tulle with sculptured bodice and jacket of imported lace. She wore a simple Juliet cap of interwoven bands of matching tulle and carried a cascade bouquet of carnations.

The bridesmaid, Miss Jean Grimm, Greentown, sister of the bridegroom, wore a similar gown in rosebud pink and carried an identical bouquet.

Junior bridesmaids were Miss Barbara Hackman, LaAnna, and Miss Carol Hackman, LaAnna, and Miss Barbara Blitz, East Stroudsburg. They were attired in gowns of yellow tulle and carried small baskets of carnations.

Attending the bridegroom as best man was Clarence Barlet, Philadelphia. Ushers were Willis Gilpin, Newfoundland and Donald Sagers, Wenonah, N. J.

The bride's mother wore a beige lace dress with navy blue accessories and a corsage of red roses. Mrs. Grimm wore a light blue dress with white accessories and a corsage of pink roses.

A reception was held at the Park hotel, Honesdale, following the ceremony, after which the couple left on a wedding trip to New Hampshire. For travelling the bride wore a white dress embroidered in blue, a navy blue faillie duster, navy and white accessories and a white orchid.

The bride is a graduate of Honesdale High school and Cornell University. The bridegroom, now serving with the U. S. Army Chemical Corps in Baltimore, Md., graduated from the Greene-Dreher-Sterling High school and the Pennsylvania State College and was employed by the Socomey-Vacuum Oil Company as a chemical engineer before induction.

The couple will reside in Baltimore.

## Son Is Born To Rubish's

Mr. and Mrs. Michael Rubish announce the birth of a son born Saturday at 6:30 p.m. at Whiteville, N.J., where Mr. Rubish is pro at the Whiteville Country Club. He was former pro at the Glen Brook Country Club and he and his wife, Pat, have many friends here.

The baby weighed 7 pounds.

In seconds, she'll be talking  
with a new grandmother in Chicago!

The time required to reach a telephone in a distant state has been cut way, way down. It used to take anywhere from 10 minutes to half an hour, or even more, before the operator could complete your call. Now you can usually measure the time in seconds!

How did all this happen? Through ceaseless research that produced hundreds of new developments, each of which had to say "yes" to these two difficult test questions:

1. Would it improve the quality of telephone service?
2. Would it aid in keeping costs under control?

We'll never stop using those two tests—because there will always be new answers for the problem they help us meet: how to give you constantly better telephone service at the lowest possible cost.

AN EXAMPLE of a new development that helps provide better telephone service at the lowest possible cost is the Bell System's radio-relay network.

It carries telephone messages (TV programs too) from coast to coast by means of hundreds of hilltop towers which flash electric impulses with the speed of light. The towers provide better transmission at lower cost than underground cables.

Your voice comes through clearer and more distinctly than ever before!

Service that's high in value—low in cost

COACHING CLINIC—Five members of the 10th annual Eastern Pennsylvania Scholastic Coaches Association Clinic are pictured above in a moment of laughter in the lobby of the East Stroudsburg State Teachers College gymnasium yesterday. The group, from left to right, includes Commander Arthur C. "Shorty" Long,

Memphis, Tenn., Naval Air Station; Ken Loeffler, clinic instructor from LaSalle College; Lt. Frank Gugert, Memphis NAS; Marty Baldwin, clinic director, and Sam Russell, Stroudsburg High basketball coach. Long, Gugert and Russell are clinic students.

## ESSTC Host To Association

### Swartzwalder, Loeffler Hold First Classes

Floyd "Ben" Swartzwalder, Syracuse football coach, and Ken Loeffler, LaSalle basketball mentor, were the featured attractions at the 10th annual Eastern Pennsylvania Scholastic Coaches Association clinic that opened at East Stroudsburg State Teachers College yesterday.

Swartzwalder, fresh from one of the greatest football campaigns in the history of the University of Syracuse, held two classes in discussion of football as it is taught at the New York school.

The present Syracuse mentor, who formerly coached at Muhlenberg, opened his discussion at 10:30 a.m. and ended at 3:15 p.m., with 45 minutes out for lunch.

Loeffler took over at 3:15 p.m. and held the center of the stage for the remainder of the afternoon. The highly regarded mentor drilled a large class in some of the fundamentals of the game and graduated to the more technical aspects of the sport as the class progressed.

The LaSalle mentor also told of some of his experiences in Puerto Rico, where he is coaching at the present time.

Gene Martin, head football coach and dean of men at the host college, was in charge of registration beginning at 8:30 p.m. Approximately 100 student coaches are registered at the clinic.

Films of the Syracuse football games last season were shown in the ESSTC auditorium last night.

Today's schedule calls for Wes Fesler, Minnesota football coach, to handle three classes, beginning at 8:30 a.m. and lasting through 3:15 p.m. with rest periods and lunch spaced in between. Loeffler takes over again at 3:15 p.m.

A buffet luncheon will be served at Glen Brook, at 6 p.m.

## Life of Riley

By JIM RILEY  
Sports Editor

Ken Loeffler, colorful basketball coach at LaSalle College, Philadelphia's number one basketball power, took up at the 10th annual Eastern Pennsylvania Scholastic Coaches Association clinic yesterday, right where he left off at the ninth annual edition of the same event last June. Loeffler is regarded by many as the number one basketball coach in the nation, and according to the latest information he soon may be known as the top coach of the cage sport in the world.

LaSalle grew to a basketball power under the guidance of Loeffler, who flew in from Puerto Rico last weekend for two reasons. First, Ken had promised Marty Baldwin, clinic director, to appear at the East Stroudsburg State Teachers College affair for a second straight year, and secondly, the sun reddened coach wanted a new pair of shoes. Shoes aren't scarce in Puerto Rico, but when sizes over 12 are needed, they are much easier to purchase in the States than in the islands.

Loeffler is back at the local clinic by popular demand, and as expected he drew the largest crowd of the opening day program. Ken's array of students featured many familiar faces, but they laughed at his jokes and wondered at his basketball knowledge, just as they had last June. Joe Sager, former ESSTC basketball great and now head basketball coach at Tarrytown, N. Y., High, is currently attending a clinic in which Loeffler has taught for the fourth straight year. Joe is only one of many who believe Ken to be the tops in the business.

The LaSalle mentor, satisfied with his past in basketball and looking for new worlds to conquer in the cage sport, will lecture both today and tomorrow from 3:15 to the end of classes. Loeffler will also talk basketball without much coaxing on the outside. In fact, the former pro mentor will speak on his favorite subject 24 hours a day and enjoy every minute of it. Ken is scheduled to fly back to Puerto Rico at the end of Wednesday's class, in order to be at the helm of his basketball squad for Friday night's game. The Loeffler coached machine, reportedly short on height and experience, is currently second in the league with three wins and one setback.

Ken is scheduled to set up a series of basketball clinics in Japan beginning in September, just as he did in Europe last year. These trips are sponsored by the government. Loeffler has a reason for every move, and the manner in which he breaks up the serious business with humor keeps his classes on their toes from start to finish. The LaSalle coach mentor is scheduled to speak at the Upstate Basketball Coaching School at Delaware Academy, Delhi, N. Y., in the very near future.

Sam Russell, basketball coach at Stroudsburg High, is back at the local clinic for the second year, attending all Loeffler classes. Jerry Stulgaitis and Jack Rist, football coaches at Stroudsburg and East Stroudsburg High Schools respectively, Kenny Meyer, Emmaus, and Jim Myers, Lehighton, are also registered at this year's clinic.

Other coaches well known in the area attending the 10th annual clinic are Ben Jones, Brookville; Andy Loh, Nazareth; John Czerniakowski, one of the Stroudsburg Poconos and now coaching at Doylestown High; Ed Sikorski, Summit Hill High, and the entire coaching staffs at Allentown and Easton High Schools. The student coach traveling the furthest distance to attend classes is Bob McCullough, of Clatskanie, Oregon.

## Eastburg National Bank Trips Cramer's

East Stroudsburg National Bank scored six times in the sixth and final inning last night to earn a 9-8 victory over R. C. Cramer's Little League, in the East Stroudsburg Little League.

LaSalle grew to a basketball power under the guidance of Loeffler, who flew in from Puerto Rico last weekend for two reasons. First, Ken had promised Marty Baldwin, clinic director, to appear at the East Stroudsburg State Teachers College affair for a second straight year, and secondly, the sun reddened coach wanted a new pair of shoes. Shoes aren't scarce in Puerto Rico, but when sizes over 12 are needed, they are much easier to purchase in the States than in the islands.

Loeffler is back at the local clinic by popular demand, and as expected he drew the largest crowd of the opening day program. Ken's array of students featured many familiar faces, but they laughed at his jokes and wondered at his basketball knowledge, just as they had last June. Joe Sager, former ESSTC basketball great and now head basketball coach at Tarrytown, N. Y., High, is currently attending a clinic in which Loeffler has taught for the fourth straight year. Joe is only one of many who believe Ken to be the tops in the business.

The LaSalle mentor, satisfied with his past in basketball and looking for new worlds to conquer in the cage sport, will lecture both today and tomorrow from 3:15 to the end of classes. Loeffler will also talk basketball without much coaxing on the outside. In fact, the former pro mentor will speak on his favorite subject 24 hours a day and enjoy every minute of it. Ken is scheduled to fly back to Puerto Rico at the end of Wednesday's class, in order to be at the helm of his basketball squad for Friday night's game. The Loeffler coached machine, reportedly short on height and experience, is currently second in the league with three wins and one setback.

Ken is scheduled to set up a series of basketball clinics in Japan beginning in September, just as he did in Europe last year. These trips are sponsored by the government. Loeffler has a reason for every move, and the manner in which he breaks up the serious business with humor keeps his classes on their toes from start to finish. The LaSalle coach mentor is scheduled to speak at the Upstate Basketball Coaching School at Delaware Academy, Delhi, N. Y., in the very near future.

## Eagles, Jack's Market Trip Softball Foes

A 5-4 victory over Al Beseker's Diner last night enabled the Eagles to clinch the first half championship in the Monroe County Softball League. The contest was played at Stroudsburg Playground.

Jack's Market, one of the strongest clubs in the circuit late in the first half, came through with an

easy 14-4 victory over Newman's Dress Shop, at the East Stroudsburg Junior High field.

The Eagles broke in front with three runs in the second inning and held the upper hand by a comfortable margin the remainder of the distance. "Dope" Lessig and F. Strunk clubbed homers for their respective leagues.

Leonard "Bull" Peretti, non-playing manager of Jack's Market, pressed himself into service last night and blasted a three-run homer in the second inning plus a single in five trips to the plate.

Two games are scheduled to be played in the circuit today, both at 6:30 p.m. Al Beseker's Diner meets Shaffer's Inn at Stroudsburg Playground, while Newman's Dress Shop and Union Printers battle at East Stroudsburg Playground.

## Out Leading Blue Mountain League In Batting Averages

Bangor—Randall Ott, veteran Portland first baseman-outfielder, is currently out in front of the batting race in the Blue Mountain Baseball League. Averages do not include last Sunday's action.

Ott, one of the greatest hitters in the history of the Blue Mountain League, is out in front with a .423 mark in seven games, with 11 hits in 26 times at the plate.

Howard "Howie" Gutshall, former North Atlantic League star and now a combination first baseman-outfielder with Tatamy, is next in line with a .414 mark, on 12 safeties in 29 trips to the plate.

Frank Sharp, Portland shortstop, is third with a .409 mark, on nine hits in 22 appearances at the plate. Harold "Hal" Nerino, Roseto centerfielder, is fourth with a .385 total, on 10 hits in 26 trips to the plate. Mike Pon-

trelli, Portland, has hit safely 10 times in 26 appearances at the plate, and is also hitting .385.

Rounding out the top seven are Olympio Pacchioli, Martin Creek manager, and Art Osmun, Portland, with marks of .381 and .368 respectively. Pacchioli owns eight hits in 21 times at bat, while Osmun has hit safely seven times in 19 trips.

Bill Williams, Tatamy, has hit four doubles to lead in that department, while Leonard Castellucci, Roseto, is top man in triples with three. Bill Shires, formerly of Pocono A. C., and now with Batavia, of the class "D" Pony League, led the loop with two homers prior to his departure.

Dave "Doc" Schiavone and John Vybhal, both of Roseto, are leading the pitchers with marks of three wins and no defeats and three victories and one setback.

Today's schedule calls for People's Coal and Security Trust to clash at 6:15 p.m.

## Gray, Nips Motts In Mound Duel

Worthington Mower, behind the shutout pitching of Dick Gray, rode to a 4-0 victory over Barrett in a Little Bigger League of the Stroudsburgs baseball game at Gordon Giffels field last night.

The victory enabled Worthington Mower to even its record at

two wins and the same number of setbacks, while the loss was the third without a victory for the Barrett contingent.

Worthington could fashion only four hits, all singles, off Motts, but the winning club took advantage of three Barrett errors to help in the scoring department.

The winning aggregation broke the scoring famine in the second inning when it pushed two runs across the plate. Worthington Mower repeated the two run out-pout again in the fifth to take any doubt out of the final score.

Today's action will send Monroe Silk against Line Material at Gordon Giffels field, at 6:15 p.m.

## Tigers Pay Large Bonus

Detroit, (AP) Happy and bewildered, two June high school graduates yesterday had their diplomas and \$95,000 after signing with the Detroit Tigers as bonus players.

It was something you dream about for Robert Miller, 17-year-old Berwyn, Ill., high school pitcher, who was given a \$60,000 bonus, and Albert W. Kaine, 18, Baltimore, Md., high school outfielder, who received a reported \$35,000.

**Early Lead**  
Last night's winning contingent jumped out in front with two runs in the second frame and held the upper hand for the remainder of the distance.

## FitzGerald Equals Record

Washington, (AP)—Ed FitzGerald of the Washington Senators yesterday became the first major league catcher in four years to score an unassisted double play.

It came in the sixth inning of the first game of a doubleheader with the Cleveland Indians. Wally Westlake was on third and Jim Hegon on second with Bob Feller, the Cleveland pitcher, at the plate when Sonny Dixon threw a third strike past Feller on an attempted squeeze play.

Westlake was an easy out as FitzGerald put the ball on him to complete the double play.

It was the 22nd unassisted double play for a catcher in the major leagues since 1900.

**Easy Out**  
Westlake was an easy out as FitzGerald put the ball on him to complete the double play.

SALARY AND OVERWRITE. Write giving highlights of background. Interview assured for regulars. For prompt review of this advertisement, APPLY BOX 216, RECORD OFFICE.

## Pocono, Barrett Lions Down Foes In Mountain Little League

Pocono Manor—Gerald Keiper and Howard Keiper blasted home runs last night to lead Pocono Lions to an 11-5 victory over Mount Pocono Rotary in a Pocono Mountains Little League game on the latter's home field.

The Lions did the bulk of their damage by three, scoring a trio of runs in the first, third and fourth

innings and then making certain of victory with two tallies in the fifth. Mount Pocono rallied for three runs in the final

## Empire Box Shades Diner In Wild Battle

Smithfield Empire Box outlasted Al Besecker's Diner in a slugfest softball game on Sunday, 11:13, here at Smithfield school.

Empire Box used a six-run spurge in the fifth frame as its main victory weapon, while the losing contingent just missed tying the score with a five-run outburst in the bottom of the ninth and final inning.

In Front

The six runs scored by Empire Box in the fifth frame brought the club from a two-run deficit into a leading position it refused to relinquish, despite the closing spurt by Al Besecker's club.

Bill Perry, hitting at a terrific clip, banged out four safeties in five trips to the plate for the winning club, while Butz turned in a similar performance for the losing aggregation.

Each team accounted for 20 hits and each committed two errors. The offensive included a total of four home runs.

Box score follows:

Empire Box (11)	AB	R	H	E	OE

## Cubs Drop Dodgers Three Full Games Behind Braves, 9-4

Chicago, (AP)—The Brooklyn Dodgers fell three full games behind Milwaukee's National League-leading and idle Braves yesterday by dropping a 9-4 decision to the Chicago Cubs before 11,708 at Wrigley Field.

In the first inning catcher Joe Garagiola walked with the bases full before Eddie Mikis doubled for two more Cub runs.

Frankie Baumholtz and Doc Fondy cashed two out singles in the fourth before Ralph Kiner delivered his 15th homer into the left field seats.

Back to Back

"Hank" Sauer followed with his 10th into the same section of the bleachers to mark the first time since Kiner became a Cub June 4 that the two have delivered back to back homers for the Bruins.

Chicago picked up a final pair of runs in the sixth off Johnny Podres, third of four Brooklyn pitchers.

Brooklyn got to Warren Hacker for a run in the third.

Wayne Belardi, the 22-year-old rookie filling in at first base as Hodges made his debut in left, homered off "Dutch" Leonard.

Brooklyn — 001 000 021 4 9 1  
Chicago — 300 102 008 9 13 0

## Indians Win Doubleheader From Senators

Washington, (AP)—The Cleveland Indians blasted Walter Masterson for three home runs in the sixth inning and captured the second game of a doubleheader, 5-2, yesterday after taking the first game by the same score on a 14-hit attack that included a home run by Larry Doby.

Easter Returns

Masterson, who had pitched 22 consecutive scoreless innings, saw a 1-0 lead vanish when Bob Lemon smashed a home run over the rightfield fence to start the sixth inning.

Luke Easter, slugging Cleveland first baseman who was idle more than nine weeks with a broken bone in his left foot, played parts of both games. He doubled across a run in the opener and singled in the second game.

First Game

Cleveland — 101 001 011—5 14 1  
Washington — 000 200 000—2 10 0

Second Game

Cleveland — 000 001 100—5 7 0  
Washington — 010 000 100—2 8 0

## Registration For Playchool Begins Here

Registration of three to five-year-old children for the Pocono Playchool Cooperative began last night at Stroudsburg Methodist Church.

Tonight, the registration will take place from 7 to 9 p.m. This year the playchool moves to more spacious quarters in the new addition recently built on the church.

Location of the school at the church does not mean, in any way, officials emphasize, that the nursery school is denominational in nature. Children of all races and faiths are eligible for registration in the school.

A fee is charged for registration. In addition to this, the cooperating parent buys a share in the playchool's organization for coming years.

Officers this year are Mrs. Lester Katz, president; Mrs. Edward Katz, vice president; Mrs. William Brown, secretary, and Ernest Farmer, treasurer.

Members of the advisory board are Eloise Bryan, Marie Brown, Roger Dunning, Carl T. Secor, Rev. Roger C. Stimson and Dr. R. Frederick Jones.

## Analomink Wooddale

Mrs. Paul Barry,  
Phone 1424-R-4

Mr. and Mrs. Lowell Davis recently called on Mr. and Mrs. Max Hess.

On Sunday night Mr. and Mrs. Clarence Lesoine and Mrs. John Repsher called on Mr. and Mrs. Layton Brush.

Mr. and Mrs. Kenneth Smiley entertained a large number of guests on Sunday. Those calling were Mr. and Mrs. Charles Garrett, of Brooklyn, N. Y., Mr. and Mrs. Paul Weidman and daughters of Bangor, L.I., and Mrs. John Smiley, of Ft. Monmouth, N. J., and Mrs. Phillip Pierce.

Monday was the fourth birthday of Cathy Bush, daughter of Mr. and Mrs. Melvin Bush. The occasion was celebrated that night with cake and homemade ice cream. Present were Mr. and Mrs. Chester Van Vleet, Mrs. Jack Van Vleet, Mrs. Jack McCauley, Mr. and Mrs. Melvin Bush and daughters Marie, Donna and Cathy.

Mrs. Gard O'Hara and Mrs. Robert Shields recently visited with Mrs. Robert Williams, of Boonton, N. J.

Newton Heydt, of Palmerton, called at the Chester Van Vleet home Monday afternoon.

Mr. and Mrs. Lester Turner and son Barry, Mr. and Mrs. Norman Peters and Pauline Turner recently motored to the Philadelphia Zoo and stopped at Willow Grove enroute home.

The strawberry social held recently by the Wooddale Sunday School drew a large attendance. Recently calling at the Melvin Bush home was Mr. and Mrs. Robert White.

On Saturday night Mr. and Mrs. Lester Turner celebrated the latter's birthday at the CLU Club. The Alteri brothers honored her with the "Happy Birthday" song.

Mr. and Mrs. Tilden Oney and children called on Mr. and Mrs. Stanley Oney, of Mt. Pocono, on Saturday night.

Saturday night callers at the home of Mr. and Mrs. Clarence Lesoine were Mr. and Mrs. Earl Lesoine and Mr. and Mrs. George Johnson.

Sunday callers at the Lester Turner home included Mr. and Mrs. George Rinker and children, Mrs. Annie Turner, Mr. and Mrs. Norman Peters, Mrs. Mabel Weber, Mr. and Mrs. Paul Turner and son, Mr. and Mrs. Donald Rake and sons Roger and Raymond.

Mr. and Mrs. Carroll Doll and children visited Mr. and Mrs. Ross Lesoine on Sunday.

Sunday night Mr. and Mrs. Bob Beecher called on Mr. and Mrs. Melvin Bush and family.

Mr. and Mrs. Robert Shields visited in Plainfield, N. J., on Sunday.

The Analomink WSCS met in the church on Tuesday night with Mrs. Kenneth Smiley presiding. Others present were Mrs. Robert Bates, Mrs. Herman Pensyl, Mrs. May Cramer, Mrs. Doris Miller and Mrs. Howard Warner. Plans were made for a fall supper.

## Bartonsville

Mrs. John Cummings  
Phone 3680-R-2

It had been 32 years since Mrs. Francis Marvin had seen Frank De Young, who with his wife visited the Marvins this past Sunday. There were 12 guests at dinner and eight at supper that day in the Marvin home. The Youngs, whose home is in Easton, recently returned from Australia where they lived many years.

Recent callers at the home of Mr. and Mrs. Richard Metzgar were Mrs. Lulu Miller, of Stroudsburg, and Mr. and Mrs. G. A. Schuttler and daughter Marion, of Dover, N.J.

## County Lets Contracts For Painting

Painting contracts totaling \$3,450.80 were awarded yesterday by county commissioners to R. M. Frantz, Scotrun.

Frantz submitted the low bid of \$2,500.80 for painting the outside of the Courthouse; and low bid of \$950 for painting the exterior of 621 Sarah St., Stroudsburg, a county-maintained building.

Only other bidder was J. Burton Hamblen, Paradise Township.

## Treasury Position

Washington, (AP)—The position of the Treasury June 18: Net budget receipts, \$1,316,354,904.78; budget expenditures, \$235,573,096.32; cash balance, \$4,317,463,756.60; budget deficit, \$10,644,161,593.79; total debt, \$266,589,646,964.69.

## July Draft Quota Set At Seven Men

One of the smallest groups of inductees since the start of the Korean War is scheduled to leave Stroudsburg July 29 for induction into the Armed Forces at Wilkes-Barre.

Five men will be called by Local Board 105 in the July quota. There have been months when no inductees were called, it was noted by Mrs. Beulah McConnell, chief clerk, but this quota is one of the smallest.

Millford Board 148, Pike County, is scheduled to call two men for induction the same date.

## Lancaster Cattle

Lancaster, (AP)—Cattle 2,957. Show price unchanged from last week. Calves 280, good and choice, \$25.00 to \$28.00. Hogs 1,107, bulk of early sales \$27.00, late sales \$25.50 to \$26.75. Sheep 481, choice Spring lambs \$27.00 to \$28.00.

## Saylorsburg

Mrs. Ralph Bond  
Ph. Say. 46-R-16

Mr. and Mrs. Clarence Budge observed their 15th wedding anniversary June 16.

Mr. and Mrs. E. E. Christman and Mr. and Mrs. Robert Flannery, of Pittsburgh, attended the Van Buskirk-Everett reunion held here Sunday. They are visiting with Mr. and Mrs. Ralph Van Buskirk and mother, Mrs. Anetta Van Buskirk, and visiting relatives in this section.

Mrs. Ruth Mackes returned home after spending a week with her son and daughter-in-law, Mr. and Mrs. Donald Mackes, Dover, Del. Her grandson, French, graduated from high school.

Samuel Trach Callie was four weeks old Tuesday, June 16. He is the son of Mr. and Mrs. Samuel Callie, East Bangor. Mrs. Callie is the former Jean Trach of here.

Mr. and Mrs. Vernon Werkheiser, of Harrisburg, spent the weekend at the home of the former's father, Herbert Werkheiser. Mr. and Mrs. Harvey Heller ob-

served their 16th wedding anniversary June 12. Their son, Richard, observed his first birthday on June 11. The Hellers have three other children, Joyce, Nancy and Harvey Jr.

Cheryl and Donald Pottiger, of Telford, are spending this week at the home of Mr. and Mrs. James Eckley.

Mr. and Mrs. Walter May spent Thursday night with the former's brother-in-law and sister, Mr. and Mrs. John Bryant, North Wales. They attended graduation exercises at Penn Charter School, Germantown, where their nephew, Jack Bryant, graduated.

William Faustick, of here, and Ted Rivers, of East Stroudsburg, left Friday morning for Lake George, N. Y., where they will do some carpentry work for Attorney T. Kressel.

Edward Knowles and children, J. Blackwell, of Athens, Pa.; Mr. and Mrs. Samuel Wear, of Allentown; Mr. and Mrs. Grant Knowles and

Suzanne Butts, of Bartonsville; were Sunday dinner guests of Mr. and Mrs. Herbert Knowles. Mr. and Mrs. Clarence Pough and daughter Sharon, of Stroudsburg; Seaman Glenn Knowles, of Norfolk, Va., and Mrs. Knowles and daughter Kathy Lee, of Stroudsburg, called.

Mr. and Mrs. Joe Warkla recently vacated the Ruth Mackes apartment and moved to the Rodenbach apartment, Brodheadsville.

Mr. and Mrs. Thomas Trach left Tuesday to spend the remainder of the week visiting friends and relatives in Philadelphia, and Lewisburg. Mr. Trach is on vacation.

Miss Marian DeLeon spent Monday morning with her mother, Mrs. Sydney DeLeon. She was enroute from her headquarters in Charlottesville, Va., to Worcester, Mass., where she was called on disaster in Red Cross work.

Mr. and Mrs. Harold Olney, of Snyder'sville, took Sandra, Nancy and Marcella Landry and Diana Williams to Dorney Park Sunday afternoon.

Mr. and Mrs. William Bonser attended the wedding of Miss Joan

Howell, and Robert Carley Sunday at Succama, N. J.

Mr. and Mrs. Harold Tonkin, daughter Joan and son Fred, of Easton, were weekend guests of Mr. and Mrs. George Budge and family. Joan Tonkin remained for the week with her aunt.

Mr. and Mrs. Robert Frazier visited Sunday with the latter's mother, Mrs. M. Crouch, a patient in the Wills Eye Hospital, Philadelphia.

Joseph Eberle, Mr. and Mrs. Robert Manly, daughter Catherine and son Robert, Mr. and Mrs. Edward Erath, children Elaine, and Patricia and Edward, and Edward Eberle, of Long Island City, N. Y., visited with Mr. and Mrs. Thomas McCabe this week.

Mrs. Harry Schweinlie, of Philadelphia, is spending a few days with Mr. and Mrs. Walter May. Mrs. Freda Schweinlie, of Philadelphia, is spending a few days with Mrs. Sydney DeLeon.

Rev. and Mrs. Adan Bohner, Kunkletown, and John Snyder, of Brodheadsville, were Sunday dinner guests of Mr. and Mrs. Myron Snyder.

## Builders Determine What People Want In A Home

### Shocking Total Of 27,500 Deaths Occurred In American Homes Last Year; Millions Hurt

Housing research experts have come to the conclusion "There's no place like home" in the field of death and danger.

Last year hazards in the average American home accounted for a shocking 27,500 deaths. An additional 41,000,000 persons were injured in home accidents.

For this reason housing experts are now in the process of drafting the nation's first formal code of safety standards.

This proposed code was the highlight of the recently concluded meeting of the National Association of Home Builders in Washington, D. C.

The new code was discussed by NAHB's technical committee with an eye toward distribution by October of this year. Many American builders have pledged their voluntary compliance with the code, intended to curb home accidents which result from a lack of safety consciousness in home design and construction.

One of these construction faults, researchers say, is the home stairway, built with a curving step at the bottom landing. Children running downstairs often miss the narrow inner edge of the curved step, researchers indicate.

Single steps leading down into sunken living rooms or on outside concrete walks are also found to be dangerous.

How to solve this problem? Studies indicate, at present, that use of two or more steps instead of one will cut down accidents in such locations. This practice will be recommended in the new code.

Here are some other recommendations to be made by the new code:

A minimum standard governing the slope of stairways: "Common-sense guides for use of protruding kitchen cabinets" which cause minor injuries such as bruised, bumps or serious eye injury.

Most important and far-reaching recommendation to be made in the new code will be a declaration of lead-base paints as "unsuitable for interior use".

Lead in paints is a "deadly menace" to small children who like to chew on window sills and other painted surfaces. Taking of lead internally often results in serious illness for children.

The NAHB realizes, of course, that no amount of safety in construction will eliminate entirely accidents in the home.

A cutdown of accidents depends largely on the education of the individual family. Responsibility for avoiding dangers already contained in areas of the house or surrounding property still must rest basically with the family itself.

Both NAHB and the National Safety Council are confident, however, that the new code will make the home a far safer place than ever before by eliminating unnecessary hazards.

### Heating Ducts Made From Fiber Glass

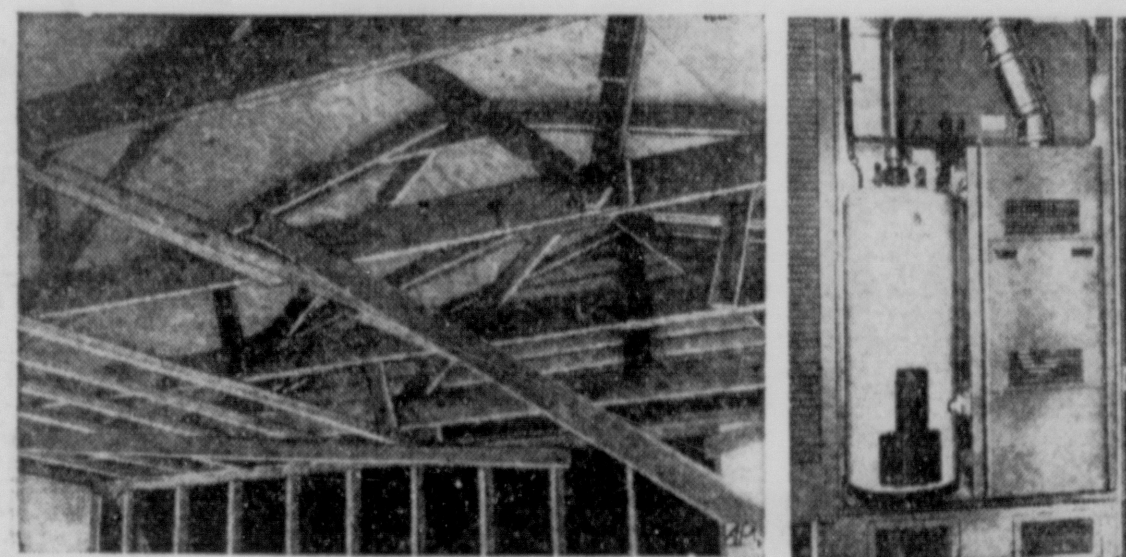

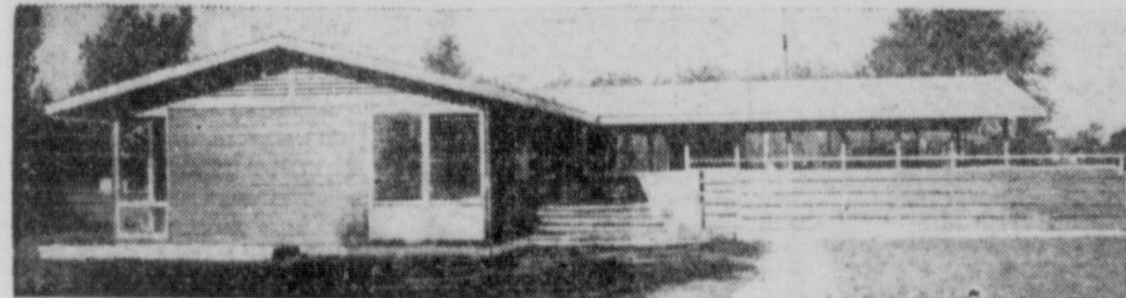

A new type of heating duct, made of flexible fibre glass instead of sheet metal, simplifies the installation of modern central heating plants or year-round air conditioning systems in older houses.

These flexible ducts eliminate the need to rip plaster and lath from walls in order to install duct-work between studs. Shipped to a job folded flat and rolled in packing cartons, they spring open in shallow rectangular form when stretched out.

Developed in anticipation of steel shortages, these ducts have been found to have many advantages over sheet metals. In addition to being readily stuffed into wall spaces through small openings, they are self-insulating, sound absorbing and economical in shipping, storage and handling costs. Nineteen pounds of this fibre glass material goes as far as 49 pounds of steel.

Made by the Gustin-Bacon Manufacturing Co., of Kansas City, Mo., for the Coleman Co., of Wichita, Kans., they are now used extensively for air blending chambers in connection with the company's heating and air conditioning systems.

Such blending chambers usually extend upward in walls from air intakes in or near a baseboard to outlet grilles more than 4 feet above the floor. Instead of opening that amount of wall space to install metal blending chambers, the heating engineers now merely cut openings for the two registers and stretch the fiber glass duct between them. No redecorating is necessary.

### Thermometer Can't Keep You Warm

Ever wonder why a living room can seem comfortable at 70 degrees in summer, but too cool at the same temperature on cold winter days?

The explanation lies in your own body and not in the house, say the experts.

One reason is that lower winter humidities speed evaporation on the skin surface, producing a cooling effect. Another is that your body loses heat more rapidly when it "absorbs" chill from cold walls, windows and doors. This is the process of radiation—body heat being radiated to surrounding cold objects.

### Model House Displays Many Innovations

New inventions are bringing about more changes in modern homes than the average new house indicates. You may find a few innovations in one house and a few in another, but when a maximum of tried and tested new wrinkles are grouped together, an entirely new house results.

This has happened in Wichita, Kan.

A house has been erected there to demonstrate what people said they wanted and liked in a national survey. The house includes more money saving features than architects and builders are likely to find in a one-house show in a long time.

In the first week it was opened 22,500 persons passed through its doors.

A good sized home—comprising 1,266 square feet, plus 444 square feet of carport and storage space—this house is air conditioned the year-round and designed to sell between \$13,500 and \$14,000 in the Wichita market, which is no among the low cost areas.

#### Some Unusual Features

With a trussed roof, instead of the usual rafters, it has no load bearing partitions. Its entire oak finished floor was laid in one operation. Then storage walls—rows of prefabricated, pre-painted closets—were moved in to create the separate rooms.

Sills and plates of the frame work were fastened to the foundation by shooting steel pins out of a Remington gun, instead of meticulously boring holes to fit the timbers over previously embedded bolts.

Windows and doors, including large floor-to-ceiling corner windows, pre-fitted in load bearing frames, were set in as the frame work went up, eliminating the conventional practice of going back and installing these parts after completing the framing.

These window and door frames require no interior trim around them. Their edges are mortised to permit standard gypsum wallboard to be fitted snugly without cutting it from its modular dimensions.

#### Fast Building Features

The outside of the house is finished with shiplap siding, each board automatically leveling over the top edge of the lower board by virtue of a notch or rabbet.

The entire house stands on a floating monolithic slab for which footings, foundation and subfloor are poured in one operation instead of three.

"This house could be put up in 18 days after the slab is poured," says Ken Stowell, the builder. "The actual time consumed on this demonstration house was between 25 and 26 days, with a five-man crew. That included the setting of the storage partitions."

As for savings, the builder cites first the simplified pouring of the foundation in which two complete operations are dropped. Then he lists the time saved by using the gun to shoot the anchoring pins.

#### Many Big Economies

He used oak flooring because of local demand, but by laying it in one continuous run before any partitions were in, he said he saved 30 per cent in labor.

Stowell estimates the pre-fabricated load bearing window frames cut \$200 to \$250 from labor and materials. He credits the shiplap siding with saving 60 per cent in labor time.

Raising the roof trusses took this builder a day and a half without any jib operation. Because of the spacing of the trusses, he could use industrial plywood for roof sheathing. Although the roof overhang is unusually wide—3 feet—he needed no soffit finishing on the underside. Paint was applied directly to the plywood.

Ned A. Cole, architect of Austin, Texas, who designed the house, says open planning and ease of circulation dictated the layout. "You can get to any part of the house from the entrance hall without entering any other part of the house," Architect Cole explains. "You can get to the bedroom from the front door, or from the kitchen, without going through living room. The dining room is off the kitchen for easy serving. Terrace and living room adjoin, so that in good weather you have an exceptionally large living area."

#### What People Ask For

Yet neither the architect nor the builder was striving to be "just different" with this house. They were commissioned by the Coleman Co., manufacturers of home heating and cooling equipment, to produce the house in accordance with the results of a national survey.

The survey showed what people liked and wanted most in a new home. Year-round air conditioning was one of these wants. The inclusion of this feature in the Wichita market, which is no among the low cost areas.

### Found: Cinderella Room In Your Basement

By John L. Springer

You can turn that dreary-looking cellar of yours into one of the most glamorous rooms in the house. I know, because I achieved a "miracle" with mine.

When our home was being planned, we began to think about the fact that it would be on a slope and that, in the back, the foundation would be largely above ground. "I don't like the idea of those bleak concrete walls," my wife commented. "Let's put plenty of windows there."

Somehow, this idea struck our old-fashioned builder as revolutionary. It became necessary to grease his palm furiously before he agreed to such a "crazy" proposition. We had two large picture windows installed, and three smaller ones. Now we are convinced that this was the smartest single idea in the entire house.

#### Enter: Sunshine

Instead of a dark, forbidding-looking cellar, we had a light, airy room from the very beginning. We have since spoken to architects, and they report that the trend definitely is away from those tiny cellar windows when-ever possible. Even on level lots, architects are specifying series of large windows around which brick walls can be built to keep the water out. In modernization jobs, other architects are recommending that concrete or concrete block foundations be chipped away and larger windows inserted. The idea is to let as much natural light in as possible.

Even with big picture windows, however, concrete walls and floors and exposed ceiling joists can be pretty unsightly. We could have improved appearances a few hundred per cent by roller-painting over the walls, using a rubber-base paint on the floor, and nailing inexpensive composition board on the ceiling. Having a more ambitious plan in mind, we decided to elaborate.

**Radiant Heat In Ceiling**  
All along the walls, I erected a framework of 2 by 2 posts. To these I nailed half-inch gypsum board. We decided to get some heat into the basement, so we ran about 200 feet of copper tubing in coils off the main hot water line and attached it to the ceiling joists. Above the tubing we put aluminum foil, to reflect the heat downward.

Next, I nailed 1 x 4 firing strips across the ceiling joists. I had intended originally to nail acoustical ceiling tile, 16 inches square, directly to the ceiling joists which theoretically are 16 inches apart. But experienced contractors warned us that those joists are never spaced exactly, and that if we attempted to nail directly to them we would soon find our tiles very much out of line. Hence the firing strips. Carefully installed, these guarantee that you will be able to nail your tiles evenly.

#### Flooring Is A Job

Once we had ceiling and walls taken care of, I thought that installing an asphalt tile floor would be a snap. It wasn't. In fact, I soon discovered why the men who lay tiles for a living sometimes earn more per hour than journeyman carpenters.

It was necessary first to smooth out the inevitable bumps in the concrete floor, then smear the entire area with adhesive. When the tiles were being put down, we discovered that when we came to the walls we would have to cut each tile to fit. That required a good linoleum knife, a very steady hand and a blowtorch to soften up the tile for the knife. For a smooth-looking job, I found it necessary to install a cove-base molding along the bottom of the wall which covers any cracks resulting

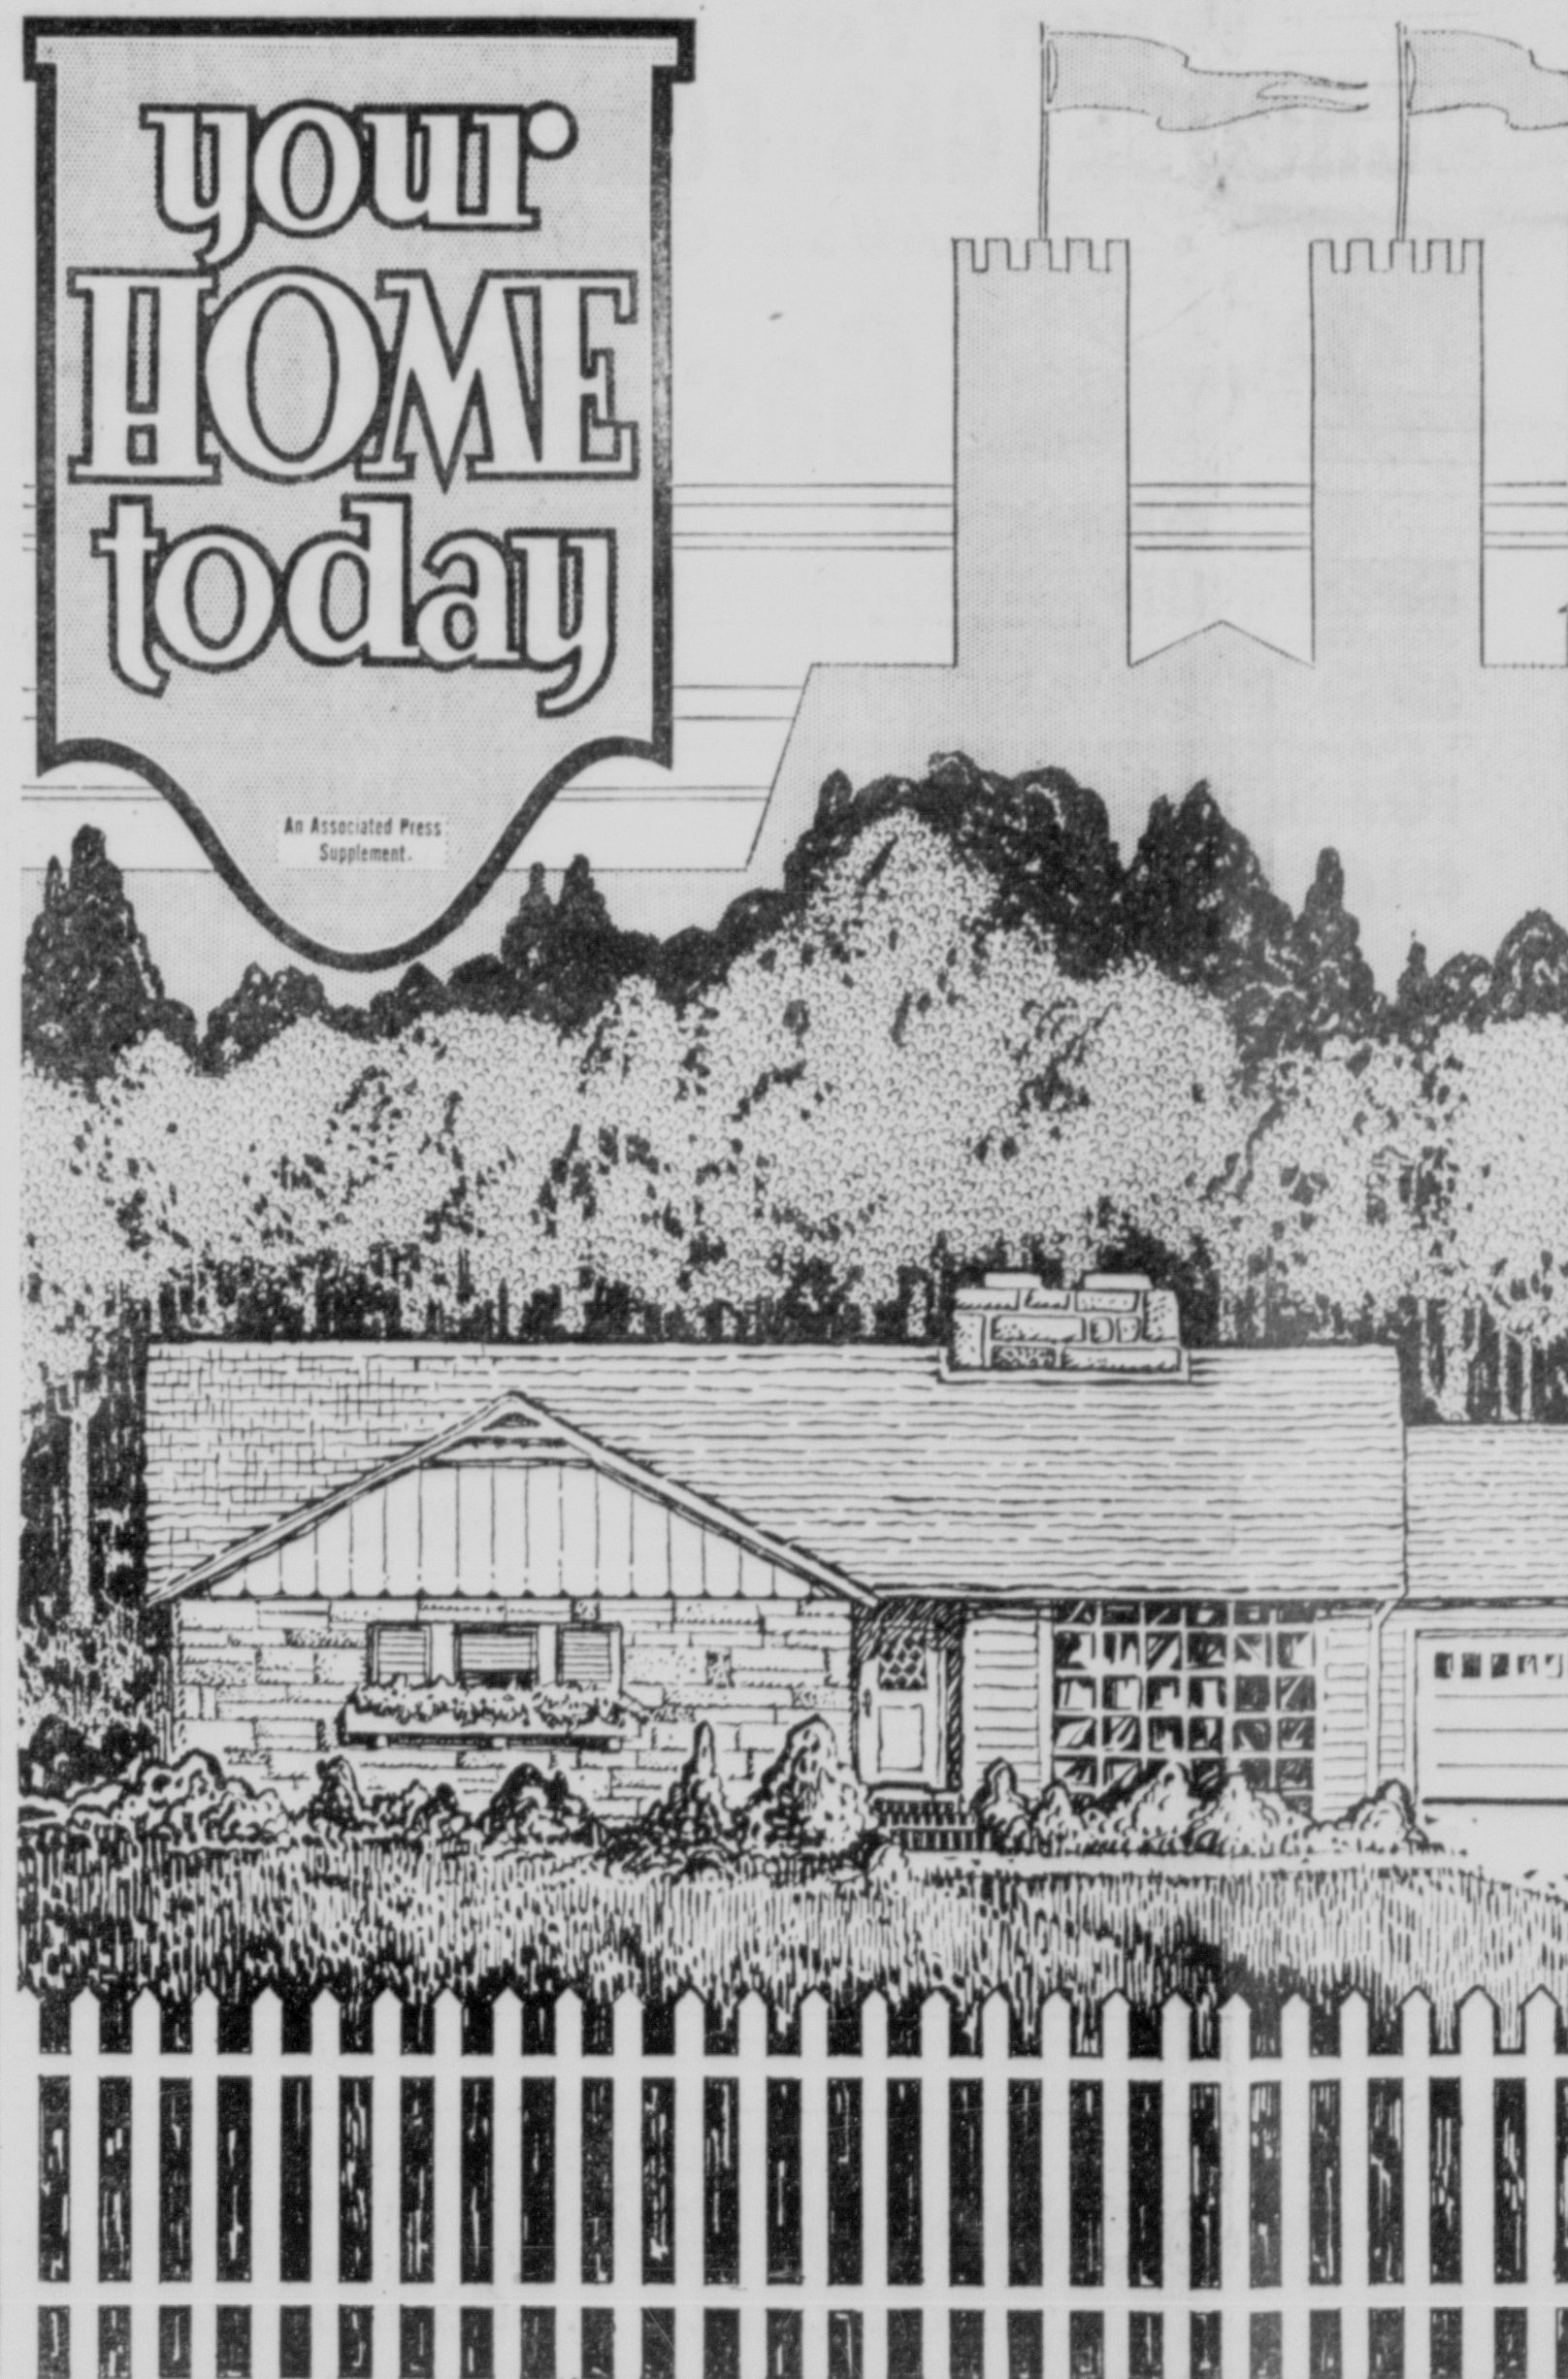

from the inability to cut the floor tile exactly.

We boxed in the steel I-beam with white pine (an expensive luxury; spruce would have done the job as well) and ran crown molding around the ceiling, where the wall meets the ceiling tile. Since all heating pipes were covered, the only clue that this is a cellar are two steel lally columns. These have been painted the same color as the walls and are inconspicuous. So for a cost of materials of \$330, we have a huge, light playroom

16 feet wide and 33 feet long.

There is room for piano, phonograph, radio and TV sets. Because we have not furnished the room expensively, we can encourage the youngsters to paint, draw or practice arts and crafts.

Most builders trying to sell modern homes stress the "expansion attic." Our problem—and that of many other parents of youngsters—is not to provide rooms for them to sleep in but rather room to play and run around in. We are sold on the idea of an "expansion basement."

An Associated Press Supplement.

# Building Attic Bathroom

ATTIC SPACE often provides for an extra bathroom with built-in storage cabinets.

For several generations a bathroom in a house was rated as a luxury. Then for years a second bathroom in a house was considered superfluous. Nowadays many many growing families regard a second bathroom as a necessity to take the pressure off the morning rush hour and clean-up periods before meals.

The result is that the creation of a second bathroom is one of the first considerations in any project to finish off an attic.

For plumbing economy it is wise to locate a projected attic bathroom before you try to plan the rest of the improvement. Placing it over a downstairs bathroom, or over the kitchen is almost a must for the extension of plumbing lines.

### Some Planning Tips

Here are some points to check when planning an attic bathroom:

See that it has adequate ceiling height. Few things are more annoying than bumping your head against low ceilings or overhangs. Determine the amount of area available by measuring from floor to rafters and enclosing only the areas that will provide normal headroom.

Take advantage of low space under the roof slope by building in storage cabinets and drawers. Extra storage space in a bathroom can always be used for linen, winter blankets, luggage and seldom used equipment.

Check floor joists to make sure they are sturdy enough to support the added dead weight of bathroom fixtures. If not, double them. This will permit you to finish the floor and walls with clay tile, which is waterproof and permanent in decoration.

### Showers Save Space

If you are obliged to keep a second bathroom small, install a shower stall rather than a tub. A roomy shower stall, finished in tile from floor to ceiling is always easier to clean than a tub.

In choosing colors for bathroom fixtures and tile, place your orders early. If you wait until the last minute, you will have to make your selections from whatever is in stock. Some tile is manufactured to match fixture colors perfectly. Giving a contractor time, gives you a wider range of choice in colors. The usual bathroom tile job requires two days of work. The wall is tiled the first day and the floor on the second day. The tile contractor returns after the floor has cured for three days to give it its final cleaning.

Bathroom floors and shower stall floors are flashed to prevent water from seeping through to damage walls below.

### For Chalky Plaster

When an old plastered wall becomes so chalky that it is difficult to make wallpaper stick to it, a coat of shellac, which dries quickly solves the problem and allows the wallpaper to be applied in the usual way.

## Let Comfort Set Kitchen Sink Height

In modernizing a kitchen it is worthwhile to consider some of the dimensions for comfort devised by experts. Even if you try such dimensions out and disagree with them, they will serve a useful purpose in reminding you to plan work surfaces and shelves at heights best suited to your use.

The average woman is supposed to find a 32-inch height for a mixing surface to be the most comfortable. She favors a 36-inch height for the kitchen range. She wants the bottom of the kitchen sink 32 inches from the floor.

This results in sink drainboards and side counters, which should measure at least 24 by 36 inches in area, being about 38 inches above the floor.

Some home makers object to such variations in height because of appearances. They get the idea from pictures that all work surfaces should be on a level. But comfort should dictate and the housewife can determine that herself.

No shelf in a kitchen should be higher than 72 inches from the floor. This may be too high for most women, but sturdy kitchen stools and ladders solve that problem.

## Why Screens Need Paint

Window and door screens of steel, galvanized iron, copper or bronze always should be painted. Steel or iron mesh is painted to prevent rust. Copper and bronze do not rust, but corrode and develop stains; therefore, they need protective coatings.

Spar varnish or special screen enamel, available in all well-stocked paint stores, are used for this work. Either of these materials can be applied with a spray gun, brush or inexpensive screen applicator made from a block of wood covered with carpet on one side.

To prevent openings in the mesh from becoming clogged, the varnish or enamel is thinned and after it is applied to each side of the screen, the screen is shaken to prevent the accumulation of drops.

Both sides of a screen are painted before the frame is painted.

### Squeaking Floors

Most floor squeaks are caused by flooring not being nailed firmly to the subfloor or having worked loose in places. Nailing through the tops of the board is one remedy. Fourpenny finishing nails usually suffice, being countersunk with the nail head holes filled with putty or wood filler.

## How To Judge Home Like An Appraiser

When you examine a house with an idea of buying it, you can take some good tips from an appraiser—the man who specializes in placing values on houses.

Some of the points to be considered were recently summed up in The Review of the Society of Residential Appraisers. These points were compiled by Lawrence C. Lockley of the School of Commerce of the University of Southern California:

1. Looking at the underside of a house will reveal the condition and size of structural lumber, adequacy of nailing, signs of serious slippage or settlement, evidence of dry rot or termites, rust at the joints of plumbing pipes. Rapping the pipes with a hard object discloses whether the pipes are clear or clogged with limestone deposits.

2. Mitering above door framing is inspected for quality of workmanship. If there has been much planing of the doors, it usually indicates swelling of wood, poor fit, settling of the house or poor construction.

3. Tile work is also examined to see whether there has been movement or settling.

4. Even after careful redecorating, excessive cracking of plaster can be detected by running the fingertips over the surface of the wall.

5. General quality can be checked by an experienced appraiser who notes the type of furnace, water heater, bath and kitchen fixtures and other equipment, as well as lumber and other materials. These and many other clues noted during inspection enables the appraiser to estimate the annual rate of repair expenses and whether they will increase unduly over the years.

Dean Lockley concluded that the man who doesn't know how to analyze construction details or who fails to recognize potential neighborhood changes that will affect the value of the property cannot correctly term himself an appraiser.

The misuse of electricity along with carelessly discarded cigarettes and matches accounts for nearly 40 per cent of all fires.

## Model House Displays Many Innovations

(Continued from page one)

chita show house was responsible for still more innovations.

Large glass areas are of the picture window type, fixed and not opened. But to meet persistent inclinations to open windows, especially between seasons, adjustable glass slats, or jalousies are provided in lower panes. However, the air conditioning system in the house includes a fresh-air intake from the attic, where entire gable ends are devoted to louvers for efficient roof ventilation.

The air conditioning plant operates on the high-velocity, 3½-inch duct system with blending chambers for recirculation of certain percentages of indoor air to keep operating costs down. Even new ceiling blenders are engineered to induce a certain amount of gentle suction of room air into the mixing chambers.

Because of the way the house is built and the way the heating and cooling system is installed, any changes in room sizes or arrangements would be simple by shifting the storage walls.

This one-big-room principle of building is credited by the builder with saving about 20 per cent in man-hours of labor in the application of the gypsum wallboard. Cutting and taping is minimized by the elimination of wall and ceiling corners in individual rooms, he says, and by modular measurements.

The ceiling is fastened to furring strips across the bottom of the trusses.

## How To Cultivate Your Good Taste

In painting a house, decorating a room, upholstering or buying furniture, good taste is a personal thing and no one can say "this is right and that is wrong."

Commenting on this, a recent issue of the Farm Journal observed, "but each person's taste can grow. When we see something new, we should look at it again and again. If it is in good taste chances are we will like it better every time we see it. We learn by exposure to things and ideas."

## When You Have The Choice CHOOSE GAS FOR YOUR NEW HOME BECAUSE OF THESE FACTS:

# Pyrofax Gas vs Electricity

"PYROFAX" GAS		ELECTRICITY	
<b>DEPENDABILITY</b>	Always available. No interruptions due to storms, winds, ice, lightning. Gas range burners guaranteed for lifetime — do not deteriorate or wear out.	<b>DEPENDABILITY</b>	Not always dependable. Current often shut off due to storms, high winds, ice, lightning. Elements fail and deteriorate with age.
<b>SPEED</b>	Fastest cooking fuel. Flame delivers full heat immediately. No waiting, ever.	<b>SPEED</b>	Slow—takes time to reach working temperature. Must wait to start cooking.
<b>FLEXIBILITY</b>	Maximum heat instantly. Complete "outrage" instantly. No lingering heat. 1000 heats at your finger-tips.	<b>FLEXIBILITY</b>	Slow to warm up. Slow to cool down. Limited number of heats—only three, five — sometimes seven adjustments.
<b>CLEANLINESS</b>	Gas range burners easy to clean. Can be lifted out and washed. Flame is clean — no soot on pots or walls.	<b>CLEANLINESS</b>	Elements difficult to clean. Cannot be taken off and washed easily. Must usually broil with door open — allowing grease and vapor to escape into kitchen.
<b>SAFETY</b>	Not toxic. 6½ million users of LP-Gas testify to safety of this fuel.	<b>SAFETY</b>	Elements may still be hot without appearing to be — can cause serious burns.
<b>ECONOMY</b>	Figures from the 1949 report of the National Fire Protection Association of all fire losses during 1948 show: Gas, 4,100 fires (0.72%). Electricity 70,300 fires (12.3%).	<b>ECONOMY</b>	
<b>MAINTENANCE COSTS</b>	FIRST COSTS: Electric ranges cost up to \$100.00 more to buy and up to \$50.00 more to install than comparable gas ranges.	<b>MAINTENANCE COSTS</b>	Burners and switches usually guaranteed for only one year. Replacement costs high. Elements wear out and lose efficiency.
<b>OPERATING COSTS</b>	Seldom any maintenance costs—equipment & burners guaranteed. No loss of efficiency.	<b>OPERATING COSTS</b>	The highest first cost and higher maintenance cost of an electric range amortized over its estimated average life—10 years—means that it may cost approximately \$12.00 per year more to simply own and maintain an electric range. Add this figure to any estimated operating cost—it increases it by almost a full cent for every KWH consumed.

## COOKING RESULTS

<b>BAKING AND ROASTING</b>	Ovens utilize convected heat allowing for: Circulation of air; Even distribution of heat; Uniformity of temperature throughout oven; Removal of greases and vapor. Better temperature control — Thermostats maintain temperature within about 2 degrees.	<b>BAKING AND ROASTING</b>	Ovens rely on radiant heat. Little or no circulation of air. Limited distribution of heat. Limited uniformity of temperature. Varying intensity of heat received by foods being cooked. Less accurate temperature control. Thermostats operate on "stop-and-go" principle. Temperatures may vary as much as 50 degrees while thermostat is on or off.
<b>BROILING</b>	Fast, intense heat of flame—sears meat, retains juices and flavor. Smokeless broiling—flame consumes smoke and greases given off by food. Door shut—keeps heat in.	<b>BROILING</b>	No flame or fast heat to sear meat—permits drying out, loss of flavor. Broiler not smokeless—no flame to consume smoke. Door usually open — smoke and greases escape into kitchen.
<b>PRESSURE COOKING</b>	Ideal for pressure cooking. <ul style="list-style-type: none"><li>Flexible wide range of heat</li><li>Flame size can be adjusted quickly</li><li>Correct pressure can always be maintained</li></ul>	<b>PRESSURE COOKING</b>	Difficult to use pressure cooker. <ul style="list-style-type: none"><li>Limited range of heats</li><li>Difficult to adjust to proper heat</li><li>Difficult to keep correct pressure in vessel.</li></ul>

Gas is the preferred cooking fuel—over 20,000,000 homes use gas for cooking—over 6,500,000 use bottled (L-P) Gas—Hundreds of thousands of homes use "Pyrofax" gas, the most widely used brand of bottled gas on the market. Practically all chefs and restaurant operators prefer and use gas for cooking—it is the ONLY cooking fuel which permits maximum cooking results with economy of operation.

## Remodeling Simplified By Planning

Repairing or remodeling a home is bound to involve some mess and fuss, so the more planning you do before starting a project, the more you can keep disorder at a minimum and get the work done on schedule.

The typical modernizing job comprises two phases—the planning and the actual work. Here are some pointers on organizing each stage:

1. Make your plans carefully and then give yourself time to think them over. Never rush into a remodeling project with incomplete plans. To start to build a fireplace in your living room on Dec. 20, for example, is going to mean that Santa Claus undoubtedly will have to stumble over bricks and mortar.

2. Get estimates on all work to be done and on all materials to be used. Carelessness on these points may put you in the position of trying to do today's work on yesterday's budget. Prices seem to change faster than cash on hand.

3. Use quality materials where quality counts. Labor is a major item in any remodeling project and labor costs on shoddy materials amount to the same as for quality materials. Such standard items as clay tile for baths and kitchens may cost a little more but promise a lifetime of service.

4. The same goes for workmanship. Skilled craftsmanship is more economical than an inexperienced dub. The only thing permanent about a botched job is disappointment.

5. Don't change your mind of your plans after work has started. Changes cost money and your contractor has to pass the cost on to you. Patient planning can avoid this.

6. Clear everything out of the room or space to be done over. You can't expect the workmen to know what value you place on your china, pictures or furniture, and you will be paying them for their time.

7. Close off other rooms to prevent the spread of dust and dirt. Place shoe-wiping mats to prevent grit from being tracked through the house. If the workmen don't clean up at the end of a day, do it yourself to prevent accidents, especially if there are children in the house.

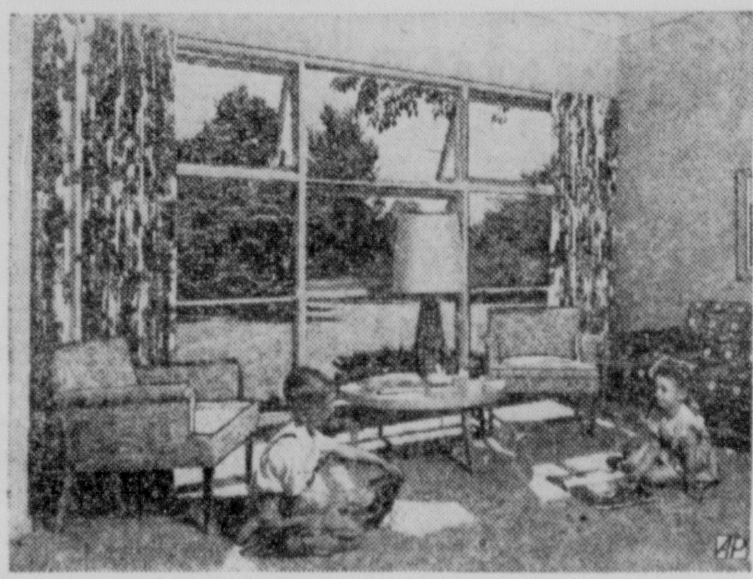

## Roofing Material Does Two Jobs

Roofing material can be used to advantage under some houses as well as over them.

Research conducted by Pennsylvania State College and the U. S. Department of Agriculture found that asphalt roll roofing laid on the ground in crawl spaces under houses without basements kept moisture from rising from the ground to rot framework of the buildings.

## Accident Prevention

Painting the edges of basement steps with luminous paint is a good accident prevention measure. This paint can be protected from wear by covering it with two thin coats of pure white shellac.

DOUBLE GLAZING keeps a picture window comfortable.

## Picture Windows Offer Real Problem For Air Condition

Adequate insulation is as important for an air conditioned house as it is to the efficiency of a refrigerator.

Therefore, windows become an extravagance, seriously interfering with their heat loss with economical operation of air conditioning.

But we have to have windows for light and view, even if the air in a house is regulated automatically.

Since the best way to insulate windows is to double them, creating an insulating air space between panes, we use storm windows in winter in colder climates.

But to leave storm windows up the year-round presents problems. Dust and moisture seep in between the two layers of glass necessitating frequent washings and polishings to maintain a clear view.

Modern double glazing ends that trouble. Two panes of clear glass are sealed with a dehydrated air space between them. No dust, moisture or even air can get into this space. When windows need washing, they need it only on the outdoor and indoor surfaces. The sealed insulating space is permanently clean.

Such double glazing has a double effect, says Harry M. Ives, manager of the Thermopane division of the Libbey-Owens-Ford Glass Co. It not only makes it possible to have large picture windows and window walls without creating heat loss or heat intake problems, but it also actually reduces the load on air conditioning equipment.

"Case histories of air conditioned buildings," Ives says, "show that the use of double glazing makes it possible to reduce the size of cooling equipment, resulting in substantial savings in original costs as well as in operating expenses."

## Enamel Undercoats

An enamel undercoat is essential for the best results in enamel finishes. This undercoat is a flat paint, especially made to flow out smoothly and leave no brush marks.

## Proper Place For Laundry Important

Since most laundry is stored and used in the bedroom-bath-room area of a house, why should laundry equipment be installed at the opposite end of the house?

The Small Homes Council of the University of Illinois asked itself this question and then went to work planning a one-story basementless dwelling with laundry equipment installed in the bathroom.

This setup sounds reasonable especially in view of modern developments in compartmenting bathrooms. As much plumbing economy can be achieved by planning a laundry in a bathroom as in combining laundry and kitchen.

Including an electric dryer eliminates the need for a space-consuming indoor drying room or the carrying of laundry to and from a drying yard.

James T. Lendrum, Illinois professor of architecture and director of the Small Homes Council, says "In the past few years, coordinated research in housing has resulted in many new recommendations regarding house design, construction techniques, assembly methods and materials, all of which are directed toward using materials, labor and space most efficiently."

The bathroom-laundry idea has been incorporated in two new test houses built by the University of Illinois in cooperation with the division of housing research of the Housing and Home Finance Agency.

## Elegance Hits Stride In Nation's Home

By Vivian Brown

Elegance has hit its stride in the American home. Even modern furnishings have acquired an air of formality. The trend has been abetted by materials such as marble, wrought iron, and satin smooth woods, used in both traditional and contemporary furnishings and associated with the grandeur of the past.

Marble is the biggest news on the home front and it has gone to the floor with a thud—as floor covering not only in foyers, but now in living rooms and kitchens as well. Other hard floor coverings such as clay tile lend an aura of sophistication, too, to formal living rooms.

Plastic has taken on unusual glamor. First to get the grand treatment are lampshades which have laminated in them everything from real Italian grass to feathers and leaves. These are exquisite in detail, capturing the natural beauty of the materials used and impregnating it forever in its plastic shell. Burlap and raffia shades complement bases of basket weave, wrought iron, marble.

Wrought iron is going strong in modern furnishings, and in Pompeian-style revivals. Empire is the pet of lovers of traditional furnishings, but the Italian influence is being felt.

Compact living still is being catered to with space savers such as serving carts which combine many uses from acting as silent butlers to china and linen custodians.

## Simple Burglar Alarm Plan For Home

A simple and reliable burglar alarm system for a home is easy for the handy man to design and install.

Push button switches of the type used on refrigerator and closet doors to turn on a light when the door is opened are installed in door jambs and window frames. As soon as a door or window is opened, these buttons are released making a contact to sound the alarm.

A door bell is used for the alarm. Since door bells operate on low voltage, which can be supplied by batteries, ordinary insulated bell cord is sufficient for wiring and involves no fire hazard.

A shutoff switch is used to cut off the alarm system in the daytime when windows and doors will be opened by members of the household. This shut off switch should be located well away from the protected windows or doors and all wiring should be concealed as carefully as possible.

It also is wise to camouflage the push buttons in window and door frames by painting them the same color as the woodwork. This will make them less easily noticed when windows and doors are open.

Test the system periodically and replace batteries before they die out merely because of age.

## Better To See You

Non-fogging bathroom mirrors have concealed heating elements which keep the glass at a higher temperature than dew point.

## Plastic Plywood Smooths Surface

Concrete surfaces smooth enough to be painted directly without further finish are being produced by the use of forms made of plywood surfaced with plastic.

This surfacing is credited with changing soft-wood, such as Douglas fir plywood, into a hard surfaced material. The trick is turned by fusing resin-impregnated fiber sheets, called Kimpreg, to plywood veneers.

The resultant product is rated at 33 times greater in wet-abrasion resistant over ordinary plywood, making it possible to re-use it many more times for concrete forms.

## Pumpkin Pine Antique Finish

An interesting finish for pine furniture to simulate antique or Early American effects is "pumpkin pine," a mellow yellow color. This can be obtained by applying a blend of orange shellac and light mahogany spirit stain. A final coat of straight orange shellac is followed by rubbing the surface with 0000 (4-0) steel wool and waxing to a dull luster.

# Air Conditioning Helps Keep Homes Cooler

## Trend Seen Toward Home Air Cooling

Summer air conditioning appears to be inspiring the most pronounced trend in the improvement of homes as well as in the design of modern homes.

For more than 20 years, summer air conditioning has been used in some luxury homes. Now it has been developed on a popular scale for the average house.

Although it still is not cheap, it has been perfected to be economically practicable both in cost of installation and in cost of operation for new homes ranging from \$10,000 or \$12,000 through the \$20,000 price brackets.

Complete conditioning units to cool, dry, filter and circulate summer air throughout all rooms in a house are being installed across the country for as little as \$1,000 to \$1,500, depending on the size of the house and other factors. Operating costs have been ranging from around \$20 to \$40 for the season. These costs include electricity or gas and water.

**Cases Of Actual Costs**

Promoters of air conditioning equipment like to quote operating costs on a per-month basis stretched over the year-around. On such a basis it has been found that a house of 1,300 square feet (average five or six-room size) in Ohio cost \$155 per month over the year for cooling in the summer.

Other examples have been: a house of 1,400 square feet in Connecticut cost \$6.16 per month over the year; a house in Texas covering 1,600 square feet cost \$8.12 per month spread over a year, and a much larger house of 2,600 square feet in St. Louis cost \$11.50 per month, year round for cooling.

Regional differences in summer air conditioning needs are summed up aptly by David E. Feinberg, vice president of the United States Air Conditioning Corp. He observes:

"Obviously in the South and Southwest, where the cooling season lasts longer than in other sections, the operating costs will be considerably higher."

**Well Water Cuts Costs**

Wherever well water is available, costs of summer air conditioning can be reduced substantially. In some cases where artesian water can be tapped, it is worth while to drill a well. The Plumbing and Heating Industries Bureau explains the use of well water as follows:

"The water is pumped from the well by an electric pump which forces the water through coils. Warm air from the rooms is drawn to the coils by a fan which also forces the cooled air back to the rooms. A filter cleans the air before it is recirculated. Thermostatic controls make the system entirely automatic, starting the pump and fan when room air reaches the point at which cooling is required."

Feinberg also stresses the importance of water because in most types of air conditioning equipment a large supply of water is used.

"The cost of this water," he says, "will vary from place to place. In some communities it is necessary or desirable to have special equipment (such as cooling towers) to recirculate this water and use it over and over again. There will be an additional cost for this facility and an increased operating cost for its pumps and fans, but there will be a saving in water costs."

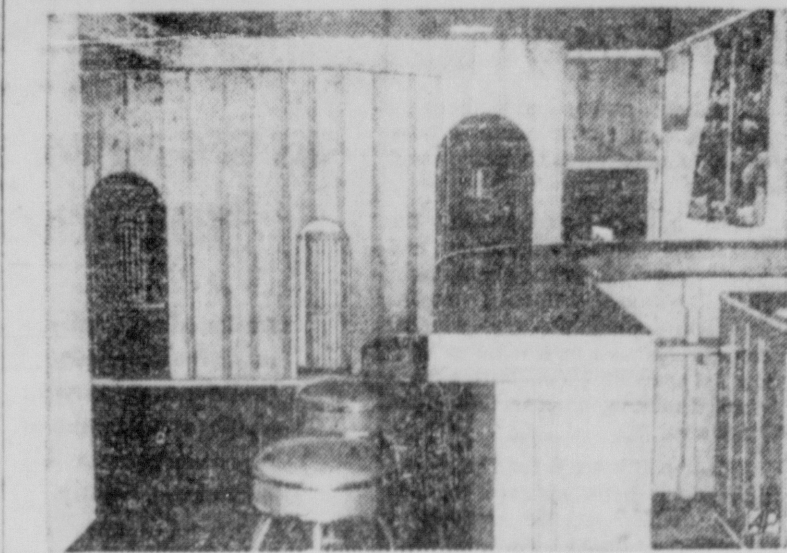

**Right Size Plant**

This expert also points out that selection of the proper capacity air conditioner is of prime importance.

"Too small equipment," he says, "just will not be able to do the job. Oversized equipment has serious drawbacks, too, aside from the higher initial and operating costs. If the unit is too large it will cool the house too quickly and then be turned off by the thermostat. During the period when it is not in operation, although the temperature may be proper, humidity will build up and the air will become stale and stuffy."

**Design Is Important**

Proper construction of a house is important in keeping air conditioning operating costs down. This not only involves adequate

AIR CONDITIONING heating and cooling units can be recessed in the wall of a finished basement recreation room.

## Air Conditioning Foreseen As 'Must' Within Five Years

Spokesmen for the air conditioning industry predict that within five years no house will be built to sell for more than \$15,000 without summer air conditioning.

Why, you may ask, is this feature of summer cooling so important when we spend as many hours as possible outdoors in summer?

One—We stay outdoors most of the time to keep cool.

Two—Experts say that according to scientific evidence, a person even in physical repose is seriously handicapped in efficiency when the temperature rises above 90 degrees.

Three—A person engaged in physical activity, such as the average housewife, operates under sharply reduced capacity when the temperature is above 90.

Four—The average person reaches a point of physical discomfort when temperature is 79 and relative humidity tops 50 per cent.

Five—Summer dust, not filtered out of the air, is known to aggravate hay fever and other respiratory troubles, while apathy and inability to sleep because of heat and humidity have been blamed for organic strains, including those of the heart.

In summer air conditioning, complete sealing of windows and doors is essential to efficient operation of the plant. S. J. Levine, general manager of the General Electric home heating and cooling department at Bloomfield, N.J., says planning a new house around air conditioning system can partly offset the cost of installation.

Money can be saved, he says, by eliminating windows in places where they add nothing to the appearance of your house or to the view, but normally would be installed only for ventilation.

The practical value of screened porches and breezeways also is eliminated, he contends, by filtered and conditioned air throughout a house.

Laundry and dry cleaning bills on such items as draperies and rugs should reflect the economy of cleaned and filtered air in a house, he says.

And theoretically you won't spend so much running away from the heat.

### When To Paint

The best time to paint basement floors is in early spring, late fall or winter when basements are heated, dry, and free from summer condensation.

insulation and double glazing wherever possible, but also call for ample roof overhangs to shade windows, reflective roofs to counteract radiant heat from the sun, shade trees to protect the roof from direct rays of the sun as much as possible, sprinkled lawns to modify surrounding temperatures and attic fans to quickly rid a house of accumulated warm air.

"The simplest of all air conditioning equipment to install and operate," says Feinberg, "is the window type room unit. Generally speaking, a ½ ton window type unit will be large enough to cool a room up to 300 square feet in area. A ¾ ton unit will be adequate for a room up to 400 square feet. Such room units need be operated only when the rooms are in use, and can be utilized during cooler weather for ventilation and exhaust. A simple switch controls these various operations."

ALUMINUM screened louvers fit snugly in inch holes.

## Ventilation May Stop Paint Peeling

Ventilation of the walls and roof spaces of a house lacking adequate vapor barriers often is the only solution of moisture problems, which cause outside paint to peel, wood to rot and mildew odors to annoy.

A government study in houses states:

"The humidity within the wall can be relieved to the outside by proper ventilation of the walls. One-inch holes, one in each linear foot of wall, at the top and bottom of the cold air space venting to the weather will prevent considerable condensation troubles in cavity type walls."

Midget louvers are handy for capping porches and keeping insects out. These devices fit snugly into one-inch holes, require no nails or screws and have collars that completely cover the edges of the holes. Made of aluminum, they are rust proof and contain aluminum screens behind their louvers.

Sizes up to 4 inches in diameter are used under eaves to keep air circulating under roofs.

The hazards of moisture in walls are summed up by Frank J. Sealton, Norwalk, Conn., manufacturer of midget louvers, as follows:

"When moisture blistering of paint occurs it is a warning that moisture mites (minute decay organisms) in the form of dry rot (fungus) will develop and destroy the lumber, which means that the studs, sheathing, sills, etc., must be replaced at considerable expense."

"These minute decay organisms are a greater menace than termites or other wood-eating insects."

**Wood Without Pitch**

Plastic-faced plywood is regarded by engineers as an effective vapor barrier in building construction.

**Long Life For Plant**

Tests show that paint on GPX plastic-faced plywood lasts longer than on virtually any other type of wood-base product.

**Wood Vapor Barrier**

There is no pitch in hemlock logs. For that reason, this wood is chosen for fine interior plywoods.

## Conditioned Air Assumes Fancy Airs

Wonderful claims are being made for air conditioning.

Enthusiasts say a hostess' make-up will stay fresher! Our cereals and crackers won't get soggy. Heat rash on the baby will be less likely and he, or she, will nap comfortably summer and winter. The piano won't need tuning so often. We'll have less jittery nerves because there will be less likelihood of falling plaster. There'll be an "alleviation of allergies"; our clothes won't wilt and we won't mildew!

No matter if you have the spiffles when you come out of a movie in the summer time, air conditioning your own house will mean no drafts, so more safeguarded against colds—so say the air conditioners.

All of which might be true.

**House Design May Change**

This system of controlling the temperature, the humidity and the dust content of the air in our own homes has certain possibilities. In fact it may change the design of houses quite radically.

Cloud Wampler, president of the Carrier Corp., manufacturers of air conditioning equipment, expects one of the biggest changes in house design to be in windows. Since it is unnecessary and undesirable to open windows when the air in a house is being controlled, unmovable windows may be used more and more.

Windows, says this observer, will not be arbitrarily placed to achieve cross-ventilation. There will be no need for cross-ventilation, so windows will be located only for the best light and view. Walls facing a neighbor's house will need no windows. Interior rooms will be as well ventilated as any rooms and may be equipped with skylights.

**No Screens Needed**

Double glazing of fixed windows will eliminate the use of storm sash and no screens will be needed. Wampler thinks screened porches may vanish when it is more comfortable to stay in the house than to relax outdoors.

A further trend away from basements is envisioned through the compactness of modern air conditioning plants. Greater utilization of space in the core of a house will continue to reduce waste space and therefore cut building costs.

As for the light and fantastic claims for air conditioning, Wampler's attitude is "Why not?" Easier housekeeping is inevitable with constantly filtered humidified, or dehumidified air, he says. Moisture control, he contends, should solve many condensation problems, prevent the drying out and cracking of chairs, floors and doors, make house plants grow better and keep cut flowers fresher.

## Restyling Helps Radio Cabinet

Television has not yet pushed the radio entirely out of the American home, but old-style radio cabinets do need a face-lifting to keep up with modern furnishing and decorating trends.

Many families are restyling their radio cabinets simply and easily by covering the old cabinet with panels of the new Wedgwood textured plywood. This can be attached with small screws, countersunk into the wood.

The richly-grained Wedgwood can be given one coat of paint to harmonize with any color plan, or a two-tone effect can be created by using two colors and wiping off part of the second coat before the paint dries.

## Eliminate Fire Hazards In Basement

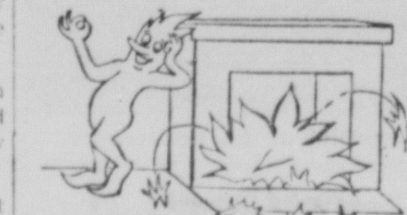

Fire hazards in a home can be materially reduced through proper inspection and maintenance of the heating plant.

Some sensible rules have been compiled by the Plumbing and Heating Industries Bureau. They are:

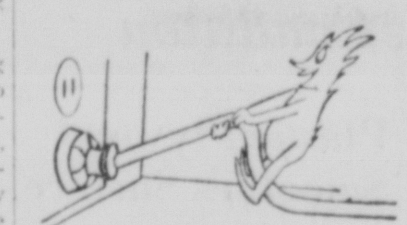

1. Have your heating plant cleaned. This means cleaning out all soot and fly ash from heating surfaces.
2. Practice good housekeeping around your heating plant. Too often the heater room is a repository for rubbish and waste paper, all of which constitute a fire hazard. Oily rags are particularly dangerous. If coal is used, have a covered metal container of adequate size for depositing ash and clinkers. Never throw paper or other combustible material into such containers.
3. Have your heating plant inspected for leaks in fire doors and blue cleaning doors.
4. Be sure your chimney is clean and free from cracks. Clean and check the smoke pipe leading from the boiler or furnace to the chimney, making sure that it has not developed leaks through corrosion.
5. Be sure that damper doors, draft doors, and chains and pulleys work smoothly.
6. If you have a warm air heating system, be sure the filters are clean. Dirty filters should be replaced or cleaned. Check the insulation on warm air ducts.
7. Never use kerosene to start or quicken fires.
8. Never search for gas leaks or try to repair them. It's safer to call the gas company.
9. Don't force or overheat your furnace or boiler in cold weather.
10. Don't start a fire in a hot water or steam plant on the first cool day of the season without making sure that the boiler is full of water.

Worn electric cords.

Fireplace without screen.

Strain on electric cords.

AND MOST of all, fire likes you to forget how to call the fire department.

In January, 1953, the United States had 23,966,000 head of milk cows and heifers.

## Precautions For Painting Cement Floors

Concrete floors can be painted successfully if proper precautions are taken.

Whether you plan to paint a basement floor, garage floor, porch or breezeway floor, the type of paint to be used will be determined by several factors.

If the concrete has been laid on the ground, such as most basement floors, rising moisture and natural alkali will destroy ordinary paint. Rubber resin base paints are not supposed to be affected by alkali as much as ordinary paints, but if the floor is not dry, no coating can be expected to stick to it.

If a concrete floor is excessively dusty or crumbly, no paint can be expected to last long on it until the fault has been corrected in the concrete by a new surfacing.

If the floor has been painted before and patches of old oil paint or enamel remain, it is wise to remove the old paint before applying rubber base paint. Since the old paint failed in some places, it eventually will fail in the others and the new covering will come off with it.

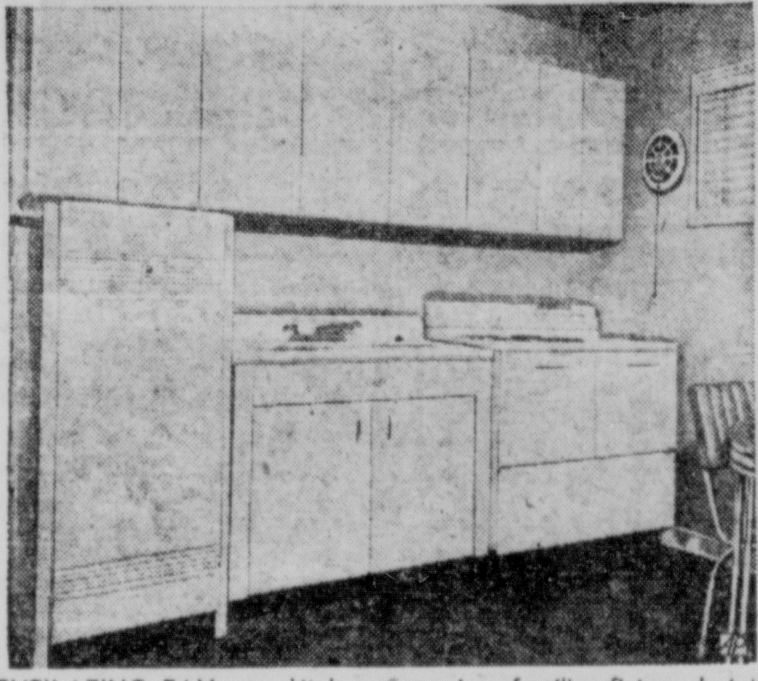

If a concrete floor has been steel troweled to give it a slick, glassy surface, it must be etched with acid to give paint a good bond.

To determine whether a floor is dry, lay a rubber mat or a piece of linoleum down for a few days. If it shows a dark spot when removed, rising moisture is indicated.

To remove old paint, sanding, paint remover or lye are effective. Ventilation and precautions against fire are highly important in the use of paint removers. A lye solution can be spread with sawdust over the old paint and left moist overnight. This is then scraped up with the paint the following morning, washed down with trisodium phosphate detergent and rinsed with clear water. The floor should then dry for a week.

Rubber gloves and rubber shoes or galoshes are needed when working with lye, paint removers or with acid.

For etching a concrete floor a solution of 1 part muriatic (hydrochloric) acid to 3 parts water is scrubbed in with a long handled stiff bristled brush. The acid is left to fizzle until the surface is well roughened and then flushed off with plenty of clear water. The floor is allowed to dry for at least a week and must be thoroughly dry before painting.

VENTILATING FAN over kitchen range is a familiar fixture, but the tall unit at the left is not a refrigerator. It's a white jacketed oil burner, designed for homes without basements.

## Ventilating Fan In Wall Becomes Important Feature

The ventilating fan in wall, ceiling or window has become one of the most important accessories of the modern home.

Air trapping under ceilings, where windows and doors do not extend all the way to a ceiling (and few ever do), has been an old problem, especially in summer. Because warm air rises, about the only way to dislodge such collections is by forcible ventilation. Ceiling ventilators offer a practicable means.

In homes where the installation of year-round air conditioning systems is too expensive a project, ventilating fans provide another advantage. Most of these devices can be purchased for less than \$30. A flip of the ventilator switch clears the air of a room in a matter of minutes. By spotting ventilating fans at strategic points in a house, overheated summer air can be forced out, allowing cooler outdoor air to breeze in at the windows.

### A Winter Purpose, Too

In winter ventilating fans are especially important in kitchens and bathrooms. Grease-laden cooking fumes can be readily exhausted over kitchen ranges before they spread through the house to discolor and soil wallpaper and curtains.

Adequate ventilation of bathrooms prevents the condensation of excess moisture on mirrors and walls while shower baths are in operation. An added feature for bathrooms in winter is a three-way combination of ceiling fan, light and heating unit. The heating ele-

ment is similar to that used in many electric ranges, but it operates on ordinary house current. This is a comfortable auxiliary heater in cold weather, when house temperature is not sufficient for bathing.

The right place to install a ventilating fan is determined to some extent on convenience to the outdoors. In a one-story house it is comparatively easy to run exhaust flues up to the roof for ceiling fans without too many elbows in the ductwork. When a kitchen range is against an outside wall it is easy to place a wall fan above the range.

### Figuring Fan Sizes

The size of fan-to use is easily estimated. J. Ralph Corbett, president of NuTone, Inc., of Cincinnati one of the largest makers of ventilators, says an 8-inch fan is adequate for a small kitchen. Medium size, or large kitchens can use a fan with a 19-inch diameter of blade. Corbett explains that the c.f.m. rating of a fan—referring to cubic feet of air per minute, is an important point to check. An 8-inch fan, he says, moves 600 c.f.m., and a 10-inch fan moves 800 c.f.m.

For bathrooms, 8-inch fans are used. For recreation rooms where stale smoke may gather, 10-inch fans are recommended.

Modern ventilating fans are equipped with automatically operated louvers on the outside of the house to keep the rain out. These louvers close on a felt tension and are kept under spring tension to prevent them from hanging in the wind.

## All Houses Benefit From Heat Control

Modern rambling one-story houses with heating problems presented by longer heating ducts, extensive attic and roof areas and broad expanses of windows, have brought about improvements that benefit all types of houses.

One of the major developments is the control of indoor temperature by zones. This makes it possible to maintain one level of temperature for bedrooms, another for living rooms and cooler degrees in kitchens, laundries and recreation areas.

Separate thermostats control the various zones and make it possible to concentrate more heat in northern portions of a house to offset the chill of northern exposures, while decreasing heat in rooms warmed by large sublighted windows facing south.

Since heating plants have been increased in efficiency while they have become more compact—fitting into comparatively small closet space—some rambling houses have been zone heated by the installation of two or more separate furnaces. This arrangement eliminates overly long pipe runs and aims at reducing fuel consumption. A bedroom wing, closed off for most of the day, can be warmed by one furnace operating at low capacity while that part of a house being used is heated by its own small furnace.

However, maximum flexibility is obtained through the use of electronic thermostats. The strategic location of these instruments depends entirely on the individual house layout and even on its surroundings. Dr. Waldo Kliever, research director for the Minneapolis-Honeywell Regulator Co., says even trees that shelter or shade a living room, or tall shrubbery that forms a windbreak, are factors determining the location of thermostats.

## Fire Costly To Small Home Owners

If you own a house that is worth less than \$20,000, chances are that a fire would cost you as much as it would cost your insurance company.

This is because the average small home owner does not increase his fire insurance coverage in accordance with current increasing property values. John A. Arnold, vice-president of the National Retailers Mutual Insurance Co., says some small home owners can expect to collect less than 75 per cent of actual cash value in the event their houses are destroyed by fire.

In contrast, Arnold says, most owners of larger homes could collect enough to pay for complete new houses in cases of total destruction, because they have been more careful to keep their insurance adequate to cover current value.

Appraisal figures cited indicate that because of reproduction costs the \$8,000 house of 1946 now averages around \$12,400 in value; the \$12,500 house of 1946 is now roughly worth \$19,375.

## Non-Skid Bathtubs Become Popular

So many people have been seriously injured in bathtub falls that the use of tubs with corrugated bottoms becomes a real long range economy.

Enameled pressed steel bathtubs, made somewhat in the same way automobile fenders are stamped out, have such non-skid bottoms. Light enough in weight for one man to handle, they are economical for installation and in colors they

cost only about the same as white in heavier cast iron tubs.

# Man's Place In The Home Includes Lending Active Hand In Decorations

By Charles Hones  
My theme today is that a man does not take enough personal interest in the decorating scheme and furnishings of his home.

Usually he leaves it to the wife, either because he is too lazy, uninterested, uninformed, or because the wife insists.

But is the result always a happy one? By no means! I've seen some horrible messes when the wife was left to her own devices. My opinion is that men have just as much flair, if not more, than women in decorative taste. If they feel they haven't they should study up and get help because it will pay dividends.

I suppose the average man's attitude is illustrated by a conversation I had with one of my conferees after I had decided to sound off in this piece.

"Do you take any interest or have you anything to say about the physical arrangement or furnishings of your home?" I asked.

"We are just getting some new drapes and I helped pick the shade of red that I like," he replied.

But he added quickly that if his wife hadn't liked the shade it was a good bet that it wouldn't go into the home.

"Perhaps," I continued, "men usually keep off of the decorating front on the theory that if they horn in on such things they will be forced to do a lot of other things around the house, leaving less time for the easy chair."

"That sounds reasonable," my friend replied. "A woman usually feels that the house is her concern. Just let her stick to her own last."

He thought a moment and then said with something of an air of triumph:

"We also are painting our basement floor and I've been permitted to choose whatever color I want there."

The next man I queried said: "I keep my mouth shut about the home. Of course I have ideas on decor but when I mention them the wife says: 'OK, give me the money.' That ends the discussion."

Because I have always been extremely interested in color schemes and the furnishings of my home, I have tried to assert myself as much as possible on this front. Believe me, it's not easy and I have to run for the tall timber now and then.

I certainly don't argue my methods for all men. Probably one is enough. But I think a man should be in there slugging at least on a fifty-fifty basis.

A friend in whose judgment I trust said that if the woman takes over entirely, the result is likely to be too feminine. The man usually adds a positive appeal with his masculine viewpoint.

"A combination of the two often results in a happy arrangement," he adds. "Sometimes when the wife and husband have two entirely different ideas and talk it over calmly and sensibly they come up with an entirely new concept that is better than either one."

"It is even worth while to have the kids come up with suggestions. A home is a place where everybody has to live and it should reflect a livable cross-section viewpoint."

If a woman does not trust herself with home arrangement she usually consults an interior decorator. If she has the dough.

There is nothing wrong with this. The interior decorator will turn in a nice looking job—but that's no assurance that it will reflect the personalities of the persons who live there.

Therefore, I again advise a man to get heated up on the subject and then to take an active hand in giving his home the personal touch it cannot otherwise have.

## Bent Bolts Stay Fixed

Bolts intended to anchor a wood plate to concrete sometimes have a tendency to crack loose and turn. A mechanic suggests bending the bolts about three inches from the threaded ends before they are set in the concrete. This bend permanently prevents them from turning.

## New Type Blow Torch Developed

The compressed gas idea, popularized by some cigarette lighters, has been applied to a new safety-type blow torch.

Resembling a miniature edition of an acetylene tank, the device is about the size of a pint vacuum bottle. A replaceable cylinder contains liquefied petroleum gas with a total burning time rated up to 15 hours. A leak-proof valve controls it. When the tank is empty it is discarded and a new one is obtained for about \$2. The entire setup sells for about \$7.

Developed by the Otto Bernz Co., Rochester, N.Y., manufacturers of plumbers' supplies, the torch is handy for the fix-it-yourself man. It eliminates the fire hazard of a gasoline pump blow torch around the house.

Sidney J. Reich, president of the manufacturing company says the device will light without priming or pre-heating, operates

## Striking Changes In '53 Home Design

A great transition has occurred in house design in the past 6 years. Entirely new concepts have been developed by architects and builders, so revolutionary that 1953 houses bear little resemblance to those built in the immediate post-war period, says the Construction Research Bureau, national clearing house for building information.

Open planning of rooms; sliding-door closets; free-standing fireplaces away from the wall; storage walls replacing conventional interior partitions; plywood-paneled walls with textured finish; ceiling-recessed lighting; decorator-styled kitchens and flush-type doors are among the innovations.

## Vacuum-Clean Walls

Dust on wood-paneled plywood walls can be removed easily with the same vacuum cleaner attachment as used on furniture upholstery.

from any position in any weather even to 30 below zero and provides a flame of 2,300 degrees F.

## Deeper Cellars, Higher Ceilings

"If basements ever are taken out of the dungeon class they will have to have higher ceilings."

This is the opinion of a home owner who just completed the finishing and decorating of his basement.

It is a good tip for anyone planning a new home. To make the basement a foot or so deeper than usual, to give it a good ceiling height of 8 feet or more, adds very little cost.

## Advantage Of Batteries

Home burglar alarm systems are safest when operated on current from dry cell batteries. The average home's electric power can be too easily cut from outside the house.

## ECONOMICAL HOUSE PAINT

## Tints Over Your Head Go Pastel

Like the old gray mare, the American house roof "ain't what she used to be." The introduction of light pastel shades in the ceramic granules used for asphalt shingles and gypsum type roofing materials is giving houses top dressings of off-whites, pearl grays, light tints of green, blue or coral.

One result is that the shapes of houses appears to be changing because light colors give appearances of larger masses than impressions created by darker colors. For an average small house with a gabled roof, lighter colored shingles tend to make the roof seem larger and the house taller. In addition, light roofs like white summer clothing, reflect more sunlight and provide added insulating value.

The spreading use of roof colors is seen by experts as breaking down color-timidty and the ponderance of white houses. Faber Birren, color consultant, outlines a variety of exterior color schemes which can be used with pastel shingles. Here are some of Birren's suggestions:

**Pearl Gray Roof**—Siding may be matched in gray with trim in white or pale yellow. Gray, being neutral, blends with almost any color. A white house with this roof may have trim in pink, flame red, aqua, blue or chartreuse. Pastel shades harmonize easily. Or the body of the house may be pale yellow, pale green, pink or coral — with trim in white or a deeper tone

A LIGHT COLORED pastel roof adds glamor to this modern house built by Irving Warfield at Syoset, N. Y.

A DARK ROOF accents this two-family dwelling.

of the house paint.

**Pastel Green Roof**—House exterior in matching pale green, pale yellow, or even pink or coral. Trim could be white. Or if the house is white, trim could be deep forest green, wine or burgundy.

**Pastel Blue Roof**—Siding a matching blue, or complementary pale yellow, cream, pink or coral —with white trim. If house is white, trim in blue, yellow, lime, pink or burgundy.

**Pastel Coral Roof**— Cheerful in a natural green setting, this roof could accommodate a coral, pale green or pale blue house with white trim. If a white house is preferred, the trim could be coral, burgundy, turquoise or deep blue. For those who prefer more subdued shades to go with ranch type houses of stone, brick or redwood siding, Birren endorses darker roof shades of red, green, brown or deep blue.

## Home Modernizing Given Boost By Greater Ease Of Getting Required Financing

One of the major factors causing an upward spurt in the modernizing of American homes is the increasing ease with which homeowners can get funds for this purpose.

An article in Home Modernizing outlined the principal sources of modernizing money available to the home-owner—FHA Title I loans, open-end mortgages and mortgage refinancing.

In use for 20 years, Title I loans have financed more than \$6,000,000,000 in home repairs and modernization. Simple and easy to obtain, the Title I is ideal for smaller projects, where \$100 to \$1,000 is needed (the limit is \$2,500). There is no red tape, and the homeowner or his contractor will normally be paid the money within a few days of the application.

There is no mortgage, no costly title examination to delay matters, no extra charges or service fees. Title I loans are paid back monthly over a period of six months to three years. The interest rate—five per cent—is uniform throughout the nation.

Similar to the Title I loan is the Veterans Administration home improvement loan. The interest rate (four per cent) is lower and the repayment period longer. Few lending institutions, however, have adopted this type.

One of the really important steps toward bringing modernizing within reach of the average homeowner is the open-end mortgage. It is a mortgage allowing new loans and lender agreeing that the original mortgage will secure the future advances as well as the original loan. This eliminates the delay and expense of a complete new loan.

The trend toward wider use of open-end mortgages was given a big push last year when the Dime Savings Bank of Brooklyn (which originates great numbers of mortgages) announced that it would henceforth have an open-end clause in all its mortgages.

George C. Johnson, president of the bank, said the plan will make terms considerably easier for the homeowner contemplating modernizing.

"Instead of borrowing on a short-term note and repaying it within one to three years, families can spread payments over the term of the original mortgage has yet to run," he explained. He gave this example:

A homeowner has an original five per cent \$10,000 mortgage to run for 20 years. With monthly payments of \$66 on principal and interest, he has paid off a little more than \$2,000 at the end of six years. By this time his family has grown so he needs more room. It will take \$2,000.

He fills out a simple form at the bank. If the application is approved, the bank hands him a check for \$2,000; in turn, he pays \$30 to cover costs of legal work, title insurance and other incidentals. He agrees to repay this \$2,000 loan and the interest on it of \$16.58 instead of the \$63.88 per month required on three-year modernization loans.

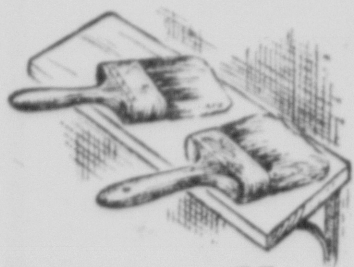

The \$16.58 added to the \$66 monthly payments on the original mortgage brings his total payment each month to \$82.58.

If a homeowner is planning a big project and other financing is unavailable or impracticable, he can turn to new mortgage financing. The problem, if his place is "free and clear," is simply to get the best mortgage terms available.

If he already has a mortgage, however, the solution may be refinancing—getting a new mortgage large enough to pay off the old one and to provide the money needed for modernizing at the same time. Refinancing requires two or three weeks for processing (including a complete title examination), and the homeowner will also run into the usual servicing costs of a new mortgage.

### Shingle Shapes

The shape of shingles can produce distinctive patterns on roofs. Modern shingles are made in various sizes and shapes. Square-butt and hexagonal shapes are most common among asphalt shingles in all colors.

## It's Easy To Make Bird Houses

It's easy to make bird houses out of sections of wood gutter stock of obtainable at local lumber yards.

READY TO PAINT . . . It's as easy as it looks.

says the American Builder, trade publication of the home building industry.

Two pieces of gutter stock are cut the same length. One section is placed upside down over the other. For a single bird house pieces 5 or 6 inches long are sufficient. For multiple houses, par-

## Masking Tape Becomes Tool

Masking tape has become an almost indispensable tool for the amateur painter around the house.

This adhesive material, made by the manufacturers of the popular cellulose tape, is not transparent and therefore is handy for making labels.

It is especially useful in painting by making it easy to obtain straight lines, or edges without overlapping. It is commonly placed around the edges of window panes when the sash is being painted, or over the edge of natural wood trim or baseboards to protect them when walls are being painted.

Designs on doors can be masked out with the tape and painted so that sharp, clean edges remain. Geometric designs can be made with the tape on cupboard doors or panels where unusual color effects are wanted. Kitchen chair seats can be given cheerful patterns by masking.

The tape allows painting to be done as quickly as with a stencil.

titions are scribed and cut from 1/4 inch plywood or fiber hardboard to fit the cavity between each unit. Two pieces of the same plywood or hardboard are scribed and cut to cover the ends of the house.

Entrance holes are drilled in the center of each unit. The size of the holes depends on the bird expected to occupy the house. Wrens require only a one-inch hole—the size of a quarter. Perches can be created under each entrance by using long rustproof nails.

## Refinishing Furniture Is Painstaking

In refinishing old furniture, the preparation of the wood is as vital as the careful application of a new finish.

Gordon Obrig, Fellow of the Industrial Designers Institute and an expert on wood and wood finishes, has some practical tips for "do-it-yourself" hobbyists.

After an old finish has been completely removed with a suitable paint remover, Obrig suggests sponging the raw wood thoroughly with pure turpentine to remove all traces of chemicals.

"When the surface is dry," Obrig says, "the wood should be carefully rubbed with No. 00 steel wool followed by No. 00 sandpaper. New wood should be prepared with steel wool and sandpaper in the same way."

Thin coats of fresh white shellac are recommended for the under-

coat. Best results can be obtained by rubbing each coat with No. 00 steel wool or sandpaper before the next coat is applied. For a natural finish, Obrig then rubs the final coat with a high quality carnauba paste wax for a final polish.

"If it is desired to bleach or stain the wood," he says, "it should be done with the raw wood before any shellac is applied. When the surface has dried, the shellac coat will seal in the stain or bleach and give the color a richness which will be protected."

# Start From Outside To Decorate Dwelling

## Let Exterior Set Entire Color Scheme

If you're planning a new home, or rebuilding an old house, and wonder how you'll decorate your living room, where do you start?

The time honored advice of decorators is to start with the carpet because it will set a background tone.

But Beatrice West, color consultant in the styling of more than 65,000 homes in the last five years, including the vast Levittown projects, says:

"Start with the roof." She argues that exterior color schemes should set the space for interior colors, especially in modern homes with picture windows and window walls that often give a view of part of the exterior. And the roof, like the carpet, forms an overall background mass.

**New Point of View**  
"In the past we assumed that the exterior and the interior had nothing to do with each other," Miss West says. "But designers are beginning to realize that is nonsense. Interior and exterior colors must harmonize for the most unified effect."

The reason this color stylist starts with the exterior of a house is that nature already has established many of the outside keys—colors that will be seen from wide windows.

Even a neighbor's trees or lack of trees have their bearing on this scheme. Maples and birches turning lighter than oaks; dark firs and pines, or plain blue sky; lawns or gardens or thickets, all figure into the color scheme.

With modern roofing materials, such as asphalt shingles, almost monopolizing the market because of economy, Miss West tackles the roof first. The ceramic granules embedded in these roofing materials for fire protection in the surface have given the home builder color choices ranging from off-whites and silver-grays through pastel shades to deep greens and blue-black shades. Agreeable uses of these colors is something the decorator wants to control.

**The Glamorous Effect**  
Miss West contends that builders can get a glamorous and popular effect through the careful use of such colors, making a house look "right." With a roof color set, exterior colors can be selected to harmonize rather than clash. One of her favorite touches is to paint exterior window trim a bright, attention-getting hue. This accents the softer colors she uses on larger exterior areas.

Contemporary house design makes these details important, she says. Large windows unavoidably offer a view both ways.

"Pay attention to what draperies look like on the back or lining side as well as the front," she says. "Remember that the back side of window draperies can be seen through the windows from the outside of the house. If the back of the draperies doesn't blend with the outside colors of the house, the whole effect can be ruined."

And Miss West practices what she preaches. She color-styled her own house from the outside in.

## Thief Proof Garbage Can

Painting your house hunter on ash cans and garbage cans reduces chances of cans being lost or stolen.

Galvanized steel cans are easily painted if the surface is first wiped with a cloth dampened in a half-and-half mixture of vinegar and water. This will cause the paint to adhere securely to this rust-resistant metal.

A COLOR EXPERT'S home, decorated from the outside in, showing how Beatrice West uses color in her own house. Numbers are keyed to the illustrations: (1) Gray-green. The roof is a variegated gray blend of asphalt shingles in which specks of green, yellow and coral are combined. Gable ends are gray. A celadon green-gray is dominant in the living room, where it is used for carpeting, walls, ceiling and trim, as well as in the sofa fabric. This repetition creates an illusion of spaciousness, Miss West says. (2) Citron yellow is the exterior accent, supplying a "welcoming note" on front door trim and frame of picture window. It contrasts with the gray and is carried

out with many yellow and bronze flowers in the yard. A lounge chair and den chairs carry this color indoors. (3) White on exterior brickwork and on the trim where gable ends meet the gray roof calls attention to architectural lines and is carried indoors on lampshades and incidental accessories. (4) Coral on flowers planted for their effect is continued indoors on dining chairs and sofa cushions. (5) Red "antique" with celadon green was used on the fireplace, which was originally red brick. Pine beams were similarly treated to relate them to the entire scheme. All the colors are combined in the draperies, which in this case had to be hand painted. These are of a sheer fabric that give privacy, but let in light and air.

## Portland Cement Not A Trademark

Portland cement is not a trade name. Various manufacturers produce Portland cement. It gets its name from the Isle of Portland, England.

It was originally named by Joseph Aspin in 1824 who patented a powder of limestone and clay, which reminded him of stone quarried at Portland after the material hardened. Isaac Johnson perfected that cement in 1845.

The first Portland cement produced in the U.S. was made in the Lehigh district in 1875, although other experiments dated back to 1818.

## Wire May Solve Leaf Problem

To keep leaves from clogging roof gutters, galvanized wire netting of quarter-inch or half-inch size fastened along the tops of the eavestroughs can be very effective.

Some building supply houses carry fabricated screens of this type with metal edging designed to hold the screens in place. But satisfactory screens can be readily cut from stock mesh, slipped under gutter hangers and bent around edges to be secure.

Harrison Todd, building materials dealer of Sacramento, Calif., tells of having installed screens of this type eight years ago with the result that the roof gutters have not needed cleaning since.

## Paint Can Be Removed With Safety

An electric paint remover, designed to peel paint with the aid of radiant heat and without the fire hazards involved in the use of a blow torch has been developed by the Industrial Heating Electric Co. at Schenectady, N. Y.

The device comprises two skids between which is mounted a 1,000-watt, 115-volt tubular heating unit. As this heater is slid along a painted surface, its radiation softens and blisters the paint so that it can be removed readily with a putty knife.

Old paint can be removed continuously as the operator slides the heater along with one hand and follows with putty knife in the other hand. The skids keep the heat at a safe and constant distance from the painted surface, while two metal reflectors keep the pliable handle cool.

The device, 6½ inches long and weighing 2½ pounds is expected to be available at paint stores for less than \$15.

## Basement Vs. No Basement

If you're planning a new house and pondering the problem of basement vs. no basement, you might ask yourself where you'll find space for the following:

One—A workbench and power tools.

Two—A photo darkroom.

Three—Track "mileage" for junior's model train and its tunnels and bridges.

Four—An entertainment bar and recreation room.

Five—Seasonal storage space for golf bags, tennis rackets, bicycles, sleds, skis, beach umbrellas, lawn furniture, electric fans.

Six—And all your personal storage—canned goods, vases from Aunt Emma and gadgets that don't work.

## Paint Brush Care

It is not necessary to clean a paint brush thoroughly when putting it aside overnight or for a few days if you wrap the bristles in wax paper and seal the edges with masking tape to keep the air out. The paint in the bristles will then remain soft.

## Engineer Plans Unique House; It Can't Burn

McKeesport, Pa.—An 80-year-old engineer, alarmed by the toll which fire has taken in life and destroyed homes in recent years, has designed and built what he terms an absolutely fireproof home, using nothing but incombustible materials.

Steel, concrete and asbestos-cement board went into its construction. The designer, John J. Boax, claims there isn't another house like, he says, it is termite-proof and vibrationless.

Most of the construction is cement. Windows and doors are metal trimmed. The doors themselves are made of asbestos-cement board, with an incombustible filler between the sections.

Occupying the unique house will be Boax's son, Fred, and the latter's wife and four daughters.

WAIST HEIGHT refrigerator and oven units built into the wall eliminate stooping in the modern kitchen. The burner top of a range is separately built into a tile work surface.

## Strategy In The Kitchen

The secret of kitchen efficiency is the arrangement of range, sink and refrigerator in a plan which requires few steps between each and which leaves space for all the extras you consider important in your dream kitchen.

From three basic kitchen designs—the one-wall lineup, the L-shape and the U-shape arrangement—many variations can be achieved.

In the one-wall kitchen all appliances, cabinets and work surfaces are stretched out in a row. This plan works well in limited space, but the wall becomes too long to be practical if much storage space is desired.

By bending the one-wall kitchen around a corner, an L-shape is formed which allows more space for additional cabinets. Bending still another corner forms the U-shaped kitchen so that still more cabinets and work surfaces can be added.

Once the kitchen work unit has been planned, the remaining floor and wall space is available for individual family needs. One homemaker might feel that with growing children a laundry area is a "must." Another homemaker, however, might feel that nothing is more important than a kitchen dining area.

There are often many different layouts for a kitchen plan, even though the dimensions of space or location of windows or doors remain the same. For this reason, planning is particularly important before a house is completely finished, giving the homemaker a choice of kitchen arrangement.

To emphasize this point, kitchen experts of the General Electric Home Bureau took a room of 14' by 11'4" with two windows and two doors. Without changing the placement of either doors or windows, they were able to plan 14 different kitchens—some with a dining area, some with laundry equipment, and others with both.

The plans cover all conditions average buyers asked for in kitchen including refrigerator, range, dishwasher, planning desk, snack bar, table and chairs, serving bar, cabinets and work counters, and complete home laundries with automatic washer, dryer, and ironer.

## Cresote Stain Saves Wood

Natural wood siding, becoming increasingly popular on modern so-called ranch style homes, offers the owner preferring a frame house as much freedom from painting as the owner of a brick house enjoys.

Cresote stain is one treatment, preserving the wood and maintaining a rustic effect.

This method was used on the exteriors of new \$30,000 homes at East Norwich, N. Y., by Furno & Harrison, architects of Split Rock Ridge. They found that one gallon of cresote is adequate for two coats over an area of 200 square feet of smooth siding. On new rough or sawn siding they covered 100 square feet with a gallon in two coats.

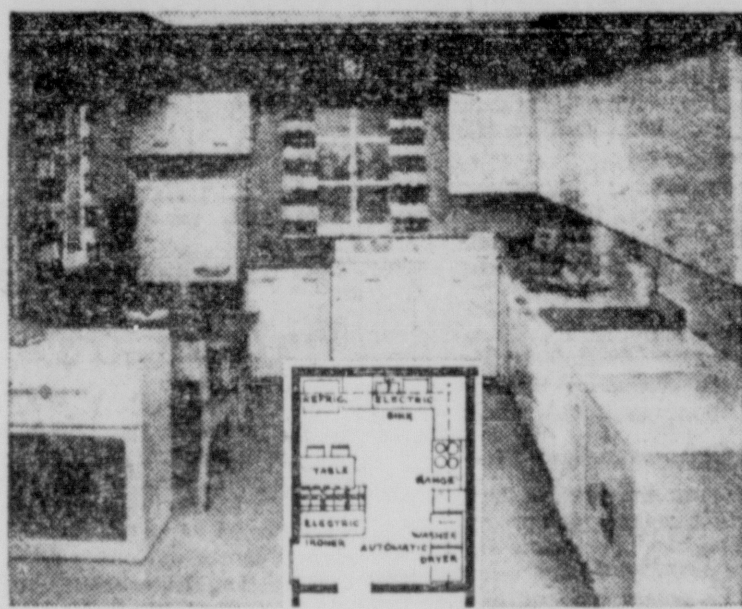

An average frame house measuring 30 by 50 feet with approximately 2,000 square feet of new wood siding was found to require about 10 gallons of cresote stain costing from \$1.85 to \$2.55 per gallon. An extra single coat, added every four to six years and calling for half as much stain, is considered adequate to retain the natural wood beauty and guard against insects, moisture and dampness.

Cresote stains are available in a variety of shades. However, it is difficult to paint over them.

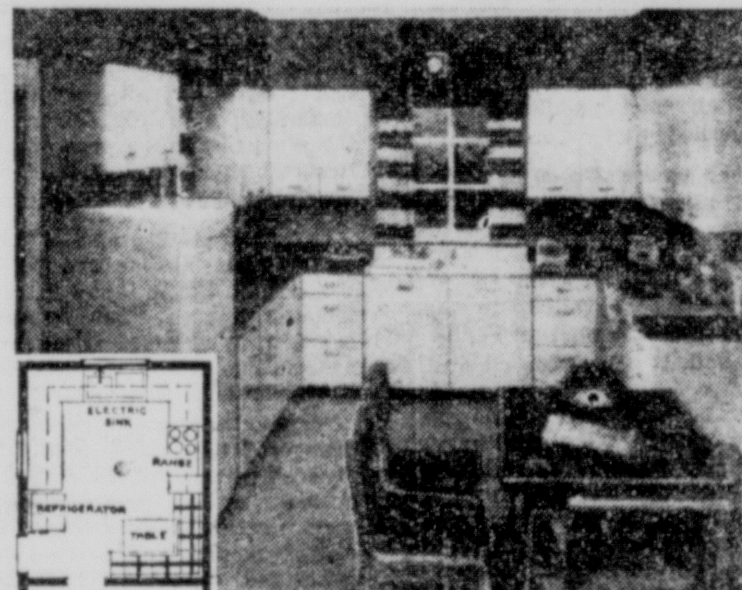

## Shellac Prevents Bleeding Stains

A coat of shellac often will prevent stain from bleeding through into paint when old furniture is being refinished, especially if the stain is 15 years old or more.

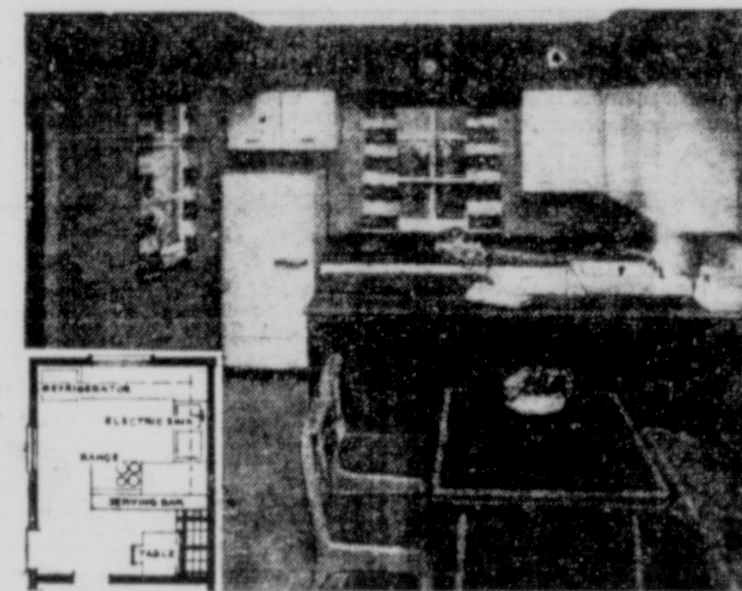

The National Paint, Varnish & Lacquer Association recommends either shellac or stain. An enamel undercoat is then applied before the final finish is put on. Each undercoat is carefully sanded.

AN L-SHAPED kitchen combines equipment along two walls.

IN THE SAME SPACE, a U-shaped kitchen uses three walls.

OR A COMPACT U creates a separate dining nook.

## Precautions Against Fire Important

Because of the high combustibility of gasoline, all possible precautions against fire should be taken in garage construction.

A concrete garage floor should be sloped slightly to keep explosive gasoline vapor from collecting in hollows. A slope permits gasoline fumes, which are heavier than air, to flow out under the garage door.

A fire-resistant wall between a garage and the house is highly important. Such walls have saved many homes when fire occurred in the garage.

A fire-resistant roof is considered adequate. Asphalt shingles are widely used. These are resistant to fire from flying sparks on the outside and if the garage does catch fire they will not spread firebrands to endanger other structures.

Any door between a garage and a house should be insulated and self-closing.

## Porch Painting Tip

It's wise to paint porch floor boards before putting them in place. Paint the boards all over. If only the tops are painted, moisture can enter from the under side, causing the wood to deteriorate and eventually causing the paint to blister.

## 'UL' Seal Means Safety To Articles

The little yellow label marked "UL," which the householder finds on electrical appliances, extension cords, stoves, oil burners and various other places is a seal of safety.

It means that the article labeled is fire-safe provided it is not misused.

It means that the article has been tested and approved by the Underwriters' Laboratories, Inc., an organization devoted to the impartial testing of nearly all types of building materials, electrical equipment and various devices used in homes today.

Even the electric train for your little boy, or the toy electric iron your little girl plays with may have been tested and labeled by "UL" for your protection.

More than 375,000 different products, touching on almost every phase of modern American life, have gone through rigorous tests of these laboratories. These products have been twisted, tortured, burned, stretched, scorched, broken, dropped, and otherwise analyzed for their various abilities to provide safety from fire and shock.

## How Tests Are Made

The main laboratories in Chicago, with branches in San Francisco and New York, are non-profit in their operation. Manufacturers pay fees for tests. If you should invent an atomic mousetrap, you could send it to the UL and pay for a test. After it was pounded, cooked, dunked and whatnot, the UL would tell you whether it was safe. And the UL decision would stand, since it is sponsored by the fire insurance companies through the National Board of Fire Underwriters.

All tests of building materials are made in the Chicago lab. Huge furnaces accommodate new type of walls. A wall to be tested for fire safety is built into such a furnace. Thermometers are connected to each square foot of the opposite side of the wall while gas jets play intense flames on the inside surface. The inside temperature goes up to 1,700 degrees, nearly white hot, and is held there for one hour. Then the gas is turned off, the wall is quickly removed and a fire hose is turned on the hot wall. If the wall remains intact, it is said to have passed a "one-hour fire test."

## Rough Tactics Used

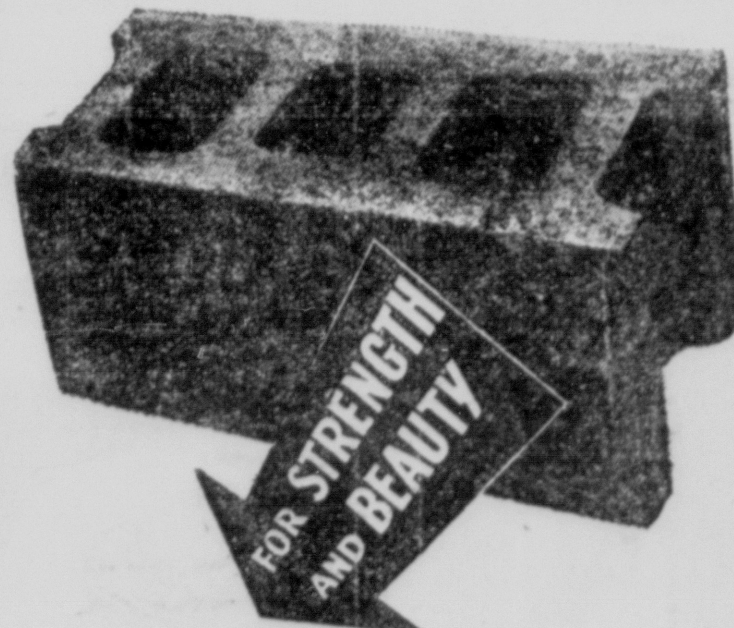

To test ordinary flexible electrical cord, such as you have on your lamps, a machine twists the wire thousands of times to see how it will survive years of wear in the home.

Electric irons are dropped many times to see if the jar affects their thermostats. Heavy steel

## Ready-To-Paint Furniture Appeals To Home Budget

Ready-to-paint furniture has great appeal, particularly to the budget-conscious home planner.

Many of the newer designs are in smart contemporary styles, harmonious either in traditional or modern settings.

This furniture can be finished in many ways—painted, papered or stained. It can be stenciled, dressed with decals or decorated with other designs which suit the fancy. Here are some general tips on

balls are thrown against the safety glass of television sets to see if the glass will resist any "implosion" of the picture tube.

If a product will not cause a fire or a shock, and will perform according to specifications, whether it is an asphalt shingle or a 15-ampere fuse, it is going to give the consumer a longer use.

The greatest benefit of the UL label is saving lives and property. But the UL label does not mean that product is foolproof. It means it is safe if used for the purpose and in the manner it is intended.

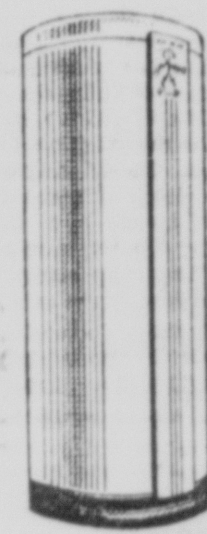

The ownership of a home begins when you decide to save some money.

Use our friendly help!

# 'Blue Mondays' Washed Up In Home Laundries

You don't hear much about "Blue Mondays" any more. Blueing is used any day since any day can be washed day with modern appliances—the automatic washer, dryer and ironer.

With a well-organized home laundry, good equipment and a soap-and-water wardrobe a big part of the drudgery is taken out of housekeeping.

New laundry equipment needn't be purchased all at one time. It can be added one piece at a time, over a period of months or years, with no strain on the family budget.

Planning, however, should be almost complete when the first installation is made, and all necessary plumbing and wiring changes completed and conveniently located according to your plan.

The most convenient location for a home laundry depends upon personal preference and available space. Any space of six by nine feet, or even less, in the kitchen, basement, bathroom, breezeway, hobby room, or a sewing room is sufficient for a complete modern laundry.

When you are examining your house for the most convenient location for your home laundry, keep the dimensions of the equipment you now own, or plan to buy, in mind. And don't overlook extras, such as counter space for work surfaces, storage cabinets, and a sink which add convenience and make the job easier.

Although the basement has been the most popular place for the laundry, it is not always the most desirable location. In fact, unless plumbing is already located there and septic tanks or sewerage lines sufficiently below ground level, a basement laundry can call for costly plumbing installations.

Since most dirty clothes and linens are collected upstairs, that might be the place for your laundry. Many older homes and some new homes have large bathrooms with unused space which might easily be utilized with laundry equipment. Plumbing is already available, and soiled washables need be moved but a few feet into the laundry area.

The kitchen is a popular location, for which a combination kitchen-laundry—the homemaker's work is centered in one spot.

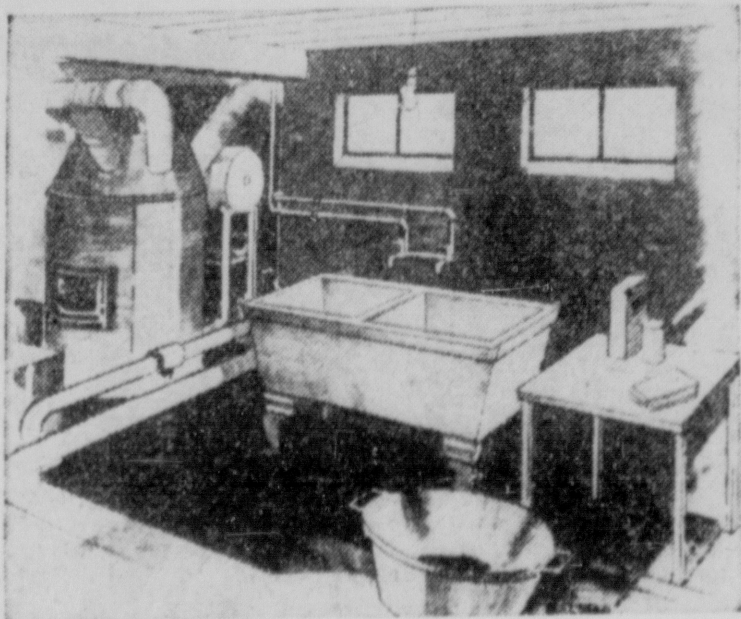

Once you have determined the location, plan the area to save the most steps. Generally your work moves from washer, to dryer, to ironer, so appliances should be lined up in that order.

## Keep Walls Resistant To Vapor

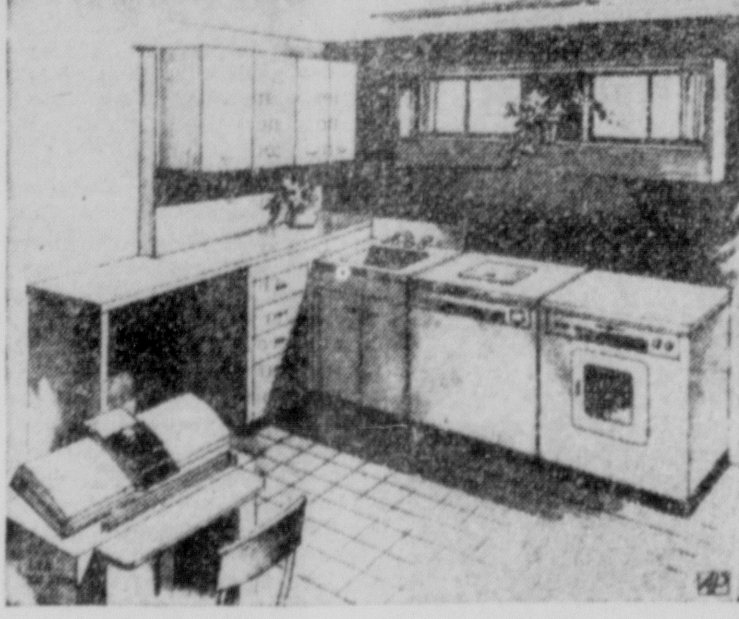

Science believes that more insidious damage is caused in American homes by moisture condensation than by any other single cause. Millions of dollars have been spent on research and on development of building materials and construction techniques to free home-owners from this plague. Research has revealed that vapor barriers and ventilation will cure the trouble.

The problem has become especially acute since the advent of tightly-constructed dwellings with weather-stripping, storm windows, complete insulation, tight wall and roof sheathing and modern living habits which mean a greater use of water in the home.

Condensation troubles result from the fact that all air contains water-vapor. The warmer the air, the more moisture it can hold. Water-vapor exerts pressure and will penetrate most building materials, including wall-paper, plaster, some types of insulation, ordinary wood, masonry; in fact,

BEFORE MODERNIZING the basement laundry looks like this.

AFTER NEW EQUIPMENT is installed the room is cheerful.

## Fire Wall May Be Beneficial

Many building codes require a fire-retarding wall between a house and its garage.

Although experts say it is almost impossible to make a house absolutely fireproof, it is comparatively easy to make a house fire safe.

Building materials which are fire-resistant can confine a fire to the room in which it starts or keep it under control until fire fighters arrive.

One of the commonest fire-resistant building materials is gypsum in the form of sheathing, lath, plaster or wallboard. Being a mineral, it does not burn, nor support combustion. It retards the transfer of heat and helps to keep wood not in direct contact with the flames from igniting.

National Bureau of Standards tests show that wood stud partitions with a half-inch covering of gypsum wallboard on both sides will protect the studs for 40 minutes. A wall of gypsum lath and plaster over wood studs with gypsum sheathing and wood siding has a one-hour fire resistive rating.

A wall built of wood studing with 3/4-inch gypsum wood fibre plaster on metal lath is given a fire resistive rating of 1 1/2 hours.

When a redwood garage attached to the home of H. A. Bernstein at 6457 Riggs Place, Los Angeles, burned, a gypsum lath and plaster fire wall kept the flames from spreading to the house, although an automobile gasoline tank exploded and the heat cracked the concrete floor and melted the metal of the car.

practically all materials except glass and metal and those imperiously coated with paint, plastics or asphalt.

To combat this danger, extensive use is being made of high-density plastic-faced GPX plywood for walls and ceilings. Since this material has a water-vapor transmission rate considerably lower than most wall materials, government experts regard it as an effective vapor barrier, especially when used in conjunction with aluminum foil insulation.

With walls and ceilings of this plastic-faced plywood, further protection against moisture condensation can be obtained by eliminating as much water-vapor as possible at its source.

Attics should be ventilated by louvers above the insulation; damp basements corrected by opening windows or providing heat. Gas and oil-burning equipment should be vented with flues since consid-

## Kitchen Home Office Eases Daily Tasks Of Housewife

The kitchen is a good place for the "home office," where the housewife in today's space-saving house can place her orders, file her bills and do the planning for the family.

This office needs no desk. A comparatively small corner of counter-top will provide for memo pad and bill spindle.

A good desk pen, similar to those

used in banks, with a reservoir for a year's supply of ink, will prevent pencil hunts. These pens won't spill even when overturned. A telephone extension can be a great time saver. A wall type phone takes up less kitchen space than table models.

A bulletin board on the wall will keep important reminders and telephone messages constantly in view.

## Window Shadow Box Marks New Decorative Idea

Build a shadow-box effect around a large window to add interest to the room and to conceal the pull-ropes and other mechanism controlling blinds and draperies, says the Construction Research Bureau.

The box extends across the top and down the two sides of the window. An unusually interesting effect can be obtained by using 6" strips cut from a sheet of Wedge-wood plywood as facing for the box, with 4" strips of the same material for the sides, and finishing the plywood in two tones of color.

To build the box, strips 4" wide are fastened with screws to the top and side window casings with the edges of the strips against the wall. The 6" strips are then screwed in a flat position to the outer edge of the 4" strips. Thus, the wider pieces of material extend a few inches over the window, creating a boxed-in effect on three sides. The strip across the top of the window serves as a valance.

A further decorative touch is added if the inner edges of the 6" plywood strips are cut into scallops with a coping jigsaw before being put in place and painted.

are fastened with screws to the top and side window casings with the edges of the strips against the wall. The 6" strips are then screwed in a flat position to the outer edge of the 4" strips. Thus, the wider pieces of material extend a few inches over the window, creating a boxed-in effect on three sides. The strip across the top of the window serves as a valance.

A further decorative touch is added if the inner edges of the 6" plywood strips are cut into scallops with a coping jigsaw before being put in place and painted.

Bathrooms and laundry areas likewise produce a great deal of moisture, and adequate ventilation is a must.

## Protect Roof With Metal Drip Edge

When applying asphalt shingles to a new deck or over an old roof, a metal drip edge and a "flashing strip" of mineral-surfaced roll roofing at least 36 inches wide should be applied along the eaves.

The purpose is to protect the roof deck and interior walls and ceiling from damage in the event the roof drainage system becomes clogged because of ice forming in eaves troughs. The flashing strip, extending 36 inches up the roof, presents back-up slush and snow from penetrating the roof deck.

First to be applied is the metal drip edge, made of corrosion-resistant 26-gauge sheet metal. Galvanized steel, painted on both sides, generally is used. The drip edge, two to four inches wide, should be bent down over the edges of the roof deck sheathing.

Then the flashing strip of heavy asphalt roll roofing is placed along the eaves in such a manner that it will overhang the metal drip edge by one-fourth to three-eighths of an inch.

## New Types Plywood Prove Boon In Home Workshops

More than 10,000,000 Americans are engaged in various handicraft activities in which wood or metal is used, reports the Construction Research Bureau, national authority on building. The vast majority of these home craftsmen work with wood.

They make everything from birdhouses to the most intricate cabinetwork and furniture and enjoy countless hours of relaxation and pleasure from their hobby.

It is only natural to strive for perfection in such work, and much of the production that comes out of home workshops cannot be distinguished from that of professional woodworkers.

One of the reasons for this perfection is the great progress made by plywood processors in the use of glues, plastics and veneers. One of the newest types of this material is known as GPX paint grade plywood.

Its plastic-faced surface is smooth as glass and presents a perfect surface for painting or varnishing without the necessity of laborious planing and sand-papering.

The material can be cut into any shape and size without splitting. Because the plywood comes in large 4' x 8' sheets, 5/16" thick, there is no problem of joining many pieces together to form a broad surface, such as a table top.

Another advantage claimed for this new type of plywood is that nails or screws can be driven within a quarter-inch of the edge without splitting, and that its high resistance to moisture prevents deterioration of the finished product through warping, peeling or loosening of glue, nails or screws.

Since plywood consists of several thin layers of wood with the grain of each layer crossing the other, the material is many times stronger than a board of equal thickness. At the same time, it can be steamed and bent into various shapes without breaking.

Another important money-saving idea is to make repairs to the masonry and siding and other parts of the house as soon as damage is discovered. Prompt repair, costing relatively little, will prevent the damage from spreading and result-

## Plan Ways To Save Money On Maintenance

Since a sum equal to about 4% of the purchase price of a home must be included in the annual budget as a maintenance cost, it is imperative that home-owners devise means whereby all possible savings can be effected, advises the Construction Research Bureau, national clearing house for building information.

Under the heading of maintenance come painting, redecoration, repairs to downspouts and gutters, tuck-pointing of masonry, sidewalk and driveway repair, replacement of shingles or siding damaged by the elements, and scores of other items which add up to a substantial amount each year.

Exterior painting and redecoration of the interior are perhaps the largest single items of maintenance expense. But important money can be saved if structural materials are used which require less refinishing than others.

Home-owners in all sections have discovered that paint grade GPX plywood with its plastic surface requires painting less frequently than practically any other wall surface material. It is used both inside and outside the house, and because of its glass-smooth surface less paint is needed.

Another important money-saving idea is to make repairs to the masonry and siding and other parts of the house as soon as damage is discovered. Prompt repair, costing relatively little, will prevent the damage from spreading and result-

ing in an overpowering repair bill later. The entire house should be inspected thoroughly each spring and fall. The roof deserves special attention because a leak can cause untold damage.

## Doodle Your Dream House With Handy Planning Kit

House plans look very simple—so simple it seems that you can easily draw them yourself. And you can. But did you ever try it? It can be a lot of fun to map and visualize all the rooms you'd like and where you'd like to have them.

In fact, if you're planning your dream house, the hobby of "house plan doodling" can be very valuable. You can get your ideas down on paper to give an architect a definite idea of what you like, or such sketches can be a big help in finding a ready-made plan that closely fits your needs.

An easy way to do this is to get some squared paper at a stationery store. If it's squared one-quarter to the inch, it makes it easy to allow four feet to the inch. Or you can use the same scale with a ruler.

### A Practicable Idea

This is a more or less scientific scale, because it fits in with Modular Planning, something that many manufacturers are striving to cooperate on for standardization. The idea is to have all materials made to fit multiples of four—4 inches, 4 feet, or multiples of either. In this way bricks would come out even at the end of a row. Windows and doors would fit in spaces without cutting and wasting too much material.

Because of building costs, one of the rules in the game of "house plan doodling" is not to waste space. Unneeded halls waste space. Needed closets do not waste space. A dining room 8 feet wide and 20 feet long wastes space, unless you want to eat at a lunch counter. A bedroom with doors and windows so placed that there is no wall space for the heads of beds is a lemon.

You have to imagine how you're going to live in each room you plan.

So you accept these handicaps and go ahead and doodle.

**Some Trouble Arises**  
One trouble that turns up is that many such doodlings turn out to have no front door—you have to come down the chimney to get into the house. And many of these plans have no chimneys!

But such things are not important, the doodlers say impatiently. Anybody can put a door or a chimney any place!

Can they?  
How about rain and snow coming in the door when you open it? How about muddy shoes, dripping umbrellas, slush covered galoshes? How about paying the fuel bill to keep far corners of a house warm when the chimney compels you to place the heating plant in a most uneconomical location?

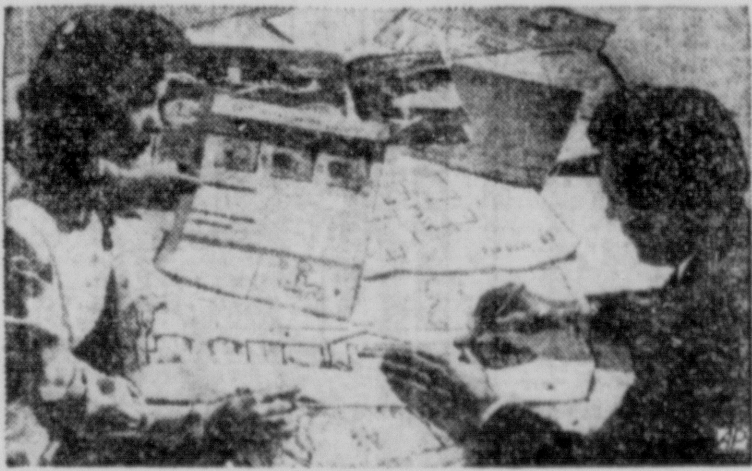

All right, we'll correct all such targets for kibitzers and we'll show this plan to a practical builder. Hooray! He says it looks reasonable. Only he says the plumbing contract may be a bit high—asking why did we put the bathroom here and the kitchen way over there? He thinks we could save a lot of copper and a lot of dollars if we turned the house around and grouped kitchen and bath at or near the front.

**Controlling the Sun**  
But why turn the house around? We want the morning sun in these windows and afternoon shade in those windows (if we have thought about such fancy things as orientation).

So after more doodling, we go to an architect, who thinks this is an excellent plan—except—. He suggests that we change the sizes of the rooms here and there to cut down the terrific lumber bill we've built up. His argument is that by making a room width 11 feet and 4 inches instead of 12 feet, we can use standard 12-foot lengths without paying to cut down 14-foot lengths on the job and throwing the waste away.

And he objects to the roof line when we haven't even drawn a roof. He claims that all these joists in the plan are going to complicate rafter framing, involve valley flashings and things we don't want to bother with. If we straighten some of those outside walls we can save a lot of money.

**Getting Personal**  
Then the architect asks a lot of personal questions. Do we sleep in a double bed, or twin beds? (This involves wall space, he says.)

IT'S FUN to doodle your dream house with a planning kit.

## Woodwork Stain Colors Keep Peace In Household

It's on the woodwork in a house that the average man's and average woman's opinions bump and bump hard. So say the decorators. The average man would like to have woodwork that looks like woodwork, with the natural beauty of the wood maintained without hiding it under paint.

The average woman contends that woodwork should be the same color as the walls, to make it unobtrusive. When the walls are repainted, she tells the painter to use the same paint on the woodwork. When the walls are papered, she stands over the painter until he gets an exact match with the predominant wallpaper color for her woodwork.

A happy compromise has now been worked out by one of the leading paint and varnish manufacturers in the development of wood stains in 169 colors. With colored stain, woodwork can match a woman's color scheme and still reveal all of the natural texture and grain of wood.

To the average person, accustomed to thinking of stain only in shades of brown, or at the most in gray, the development of stains in pastels, blues, yellows and greens opens an entirely new field for wood finishes.

The accurate portrayal of the color effects of these stains on different types of wood is impossible to achieve on the usual paper color tabs of paint charts. To overcome this, the Martin-Senour Co. of Chicago has had color booklets prepared with actual wood chips, shaved paperthin, showing how major shades of 169 colors appear. Close-grained interior woods can produce a soft pinkish cast under one stain, while the same stain used on exterior cedar results in a rust to brown effect. Only natural wood chips can show such differences. Because of this difference a few of the more delicate colors are not recommended for exterior use.

General rules for staining close-grained interior woods, such as birch, maple, gum, white pine, fir, do I shave before my wife wants to brush her teeth in the morning? (This is a bathroom problem, he says.) Although we may have a daughter, don't we think it's possible that a son might arrive someday? (This is going to mean an extra bedroom eventually, he says.) And what about those cellar stairs? He asks. Do we want to carry a bag of potatoes through the dining room, or fireplace ashes through the living room? May be it would be a good idea to relocate those stairs so they'd come up at the back door to be handy to the kitchen and handy for the meter-reader and other tradesmen without tramping these men through the house.

Naturally we go ahead with this architect. But that doesn't stop us from doodling. We already have doodled the dream house we'll build when and if we don't have to think about money.

But many amateur house plans save money right from the start. Arvid Peterson, president of the Homograf Co. of East Detroit, which makes a planning kit for amateur architects, says many practicable ideas have come out of doodling. The architect is given a definite idea of what is wanted. Peterson says, and many preliminary studies are avoided.

## Does A Flat Roof Reduce House Cost?

A flat roof is advocated as a money saving feature by people who like what is variously called contemporary or modern architecture.

It is argued that the construction of all the cubic feet of space contained in an attic is extravagant. Flatten the roof, these people say, and you save material and labor that goes into rafter framing or trussing. You cut down the roof area which must be covered with shingles.

Whether a house with a flat roof fits into your idea of what a house ought to look like has nothing to do with this argument. Although many houses of extreme modern design have cost more than conventional houses of the same size, and although in many communities it is next to impossible to get a mortgage on extreme designs, the flat roof is supposed to distinguish the smart house.

But does a flat roof cut costs? Many Question That  
The National Association of Home Builders asked its members this question. Both builders and architects were polled. Here is the answer as published in the Correlator, official publication of the association:

"On the affirmative side of cost saving the score was 47 per cent; 41 per cent found no saving; 12 per cent had no experience with this type of construction."

The overall conclusion was that it is all a matter of how a flat roof is built, and where it is built, when it comes to determining cost saving.

You might think that geography would determine that. Flat roofs have been popular for a long time in California, Florida and other southern regions. But apparently geography doesn't play such a big part.

"For instance," says the Correlator report, "in Rhode Island, Armand Ferland finds savings 'considerable.'"

"In Ohio, Alex Simms estimates a saving of \$500 to \$600 per house through the elimination of gutters and downspouts, half of the framing cost, and half of the roofing cost."

"Harry Burgess in Elmire, N. Y., states, 'Flat roof is cheaper.'"

**A Doubter in Texas**  
Other builders and architects who favor "flat tops" reported from Pennsylvania, Kansas City, Miami and Sacramento. But the geographical theory was further upset by Vernon Smith of Dallas, Texas, reporting there was very little difference in cost over a trussed or pitched roof.

An angle of the home owner's benefit was brought up by Walter Johnson of Niagara Falls. He said: "I do not believe there is any particular advantage cost-wise in original construction. However, I believe there is an advantage in permanent maintenance of the property."

## Saw Holder On Tool Kit Easy To Make

Saw holders on the sides of a carpenter's tool box are easy to make with plywood or fibboard, protecting saw teeth from damage by other tools.

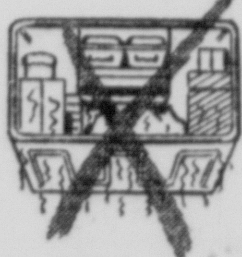

Each saw holder is made of three sheets of thin board, the middle sheet being routed out to conform to the profile of the saw. When the saw is inserted in this pocket with edge down the teeth provide enough traction to hold it in place, while the handle protrudes. The idea, developed by a carpenter, was contributed to the American Builder pool of practical pointers.

## New Roofs Over Old Ones

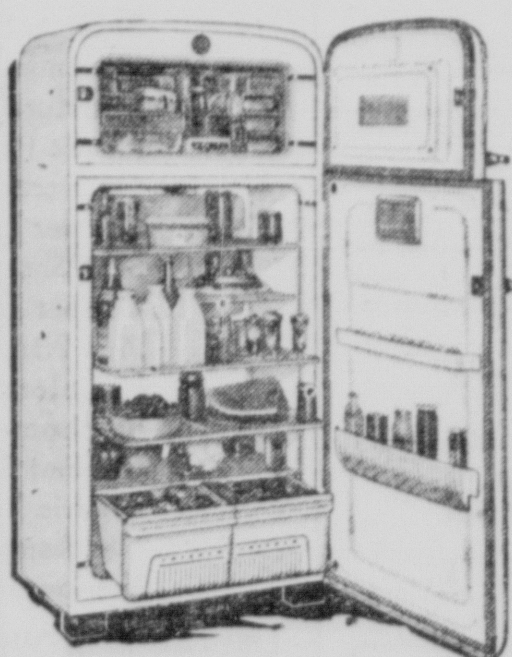

It is rarely necessary to remove old roofing material when putting on a new roof of asphalt shingles. This eliminates the expense of tearing off the old roof and it results in a thicker over-all roof covering. The old roof should be repaired sufficiently, however, to provide a firm nailing base.

## Let There Be Light

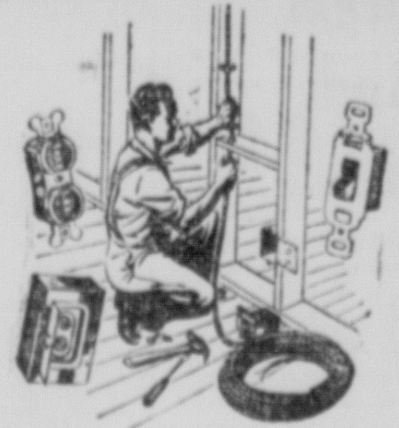

A woman who bought a \$30,000 home recently, says she hopes that someday she can afford a house with lighting fixtures that will save her moving from one bedroom mirror to another and from one bathroom to another, trying to get her makeup on, and then having to finish it with the aid of the mirror in her car, where she gets the only adequate light.

provide for insulating space also is a problem in the construction of a flat roof. H. Barrett Pennell, Pennsylvania architect, reported in the Correlator poll:

"If single roof construction is acceptable, the secondary ceiling construction can be saved entirely."

But in most northern regions requiring insulation and ventilation against the sun in summer and against heat loss and condensation in winter, double roof construction is necessary.

# Beware Of Nature In Landscaping

## Don't Forget Plants And Trees Grow

A neighbor, pausing for breath while moving a Persian lilac from the deep shade of a 20-foot hemlock to a sunny spot, mopped his brow wearily and remarked:

"After 10 years in a house, you spend most of your time digging up all the things you spent the first two years planting."

And such activity is routine, for nothing, except possibly a skinned rabbit, is as naked as a new house. It cries pitiously for covering for lawn, for trees and for shrubs, and more shrubs. It's a tough-minded householder who can resist the impulse to get busy in such an emergency, making all the mistakes of over-planting and mis-planting which will soon make trouble for him.

### Figure on Growth

The one item we are apt to overlook is that trees and plants grow some of them at a fantastic rate. Probably it's not so much oversight as the fact that it is hard to believe that the delicate little bush which is today's forsythia will in just a short time be a sprawling giant quite capable of pushing other plants into the shade and competing with them for food and water.

If any words of advice can be given to the new homeowner, "restraint" is certainly the most important.

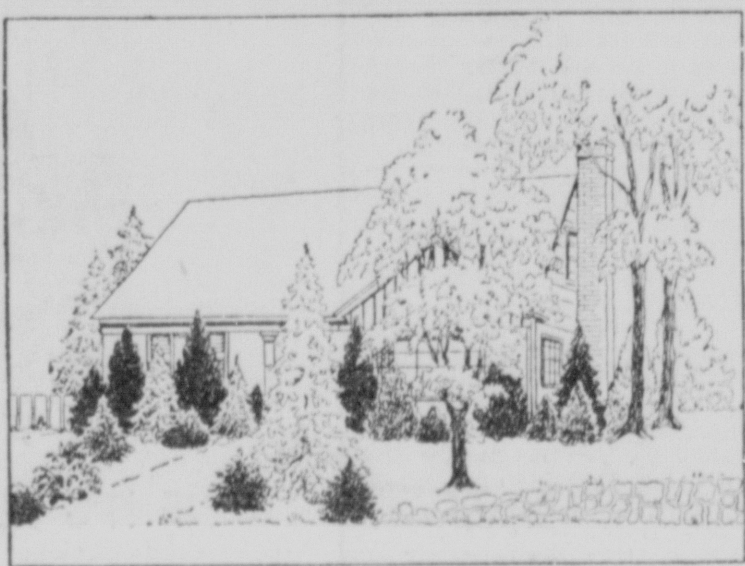

Landscaping is something which should be undertaken the hard way, by the application of discipline, by study and by thought. The initial landscaping should be done on ruled paper, with a pencil equipped with an eraser.

First, study whatever trees are already growing on the lot. Try to save the valuable trees and the healthy ones and the trees which will add to the attractiveness and usefulness of your home.

### Trees for Privacy

During building operations, see that those trees are protected. It's cheaper and smarter to preserve them than to try to replace them with others from a nursery later. Then decide what you want from the rest of the landscaping. Most people today are concerned about privacy. If you would conceal yourself from the road, consider evergreen hedges—hemlock or yew—which are expensive but effective the year-round. If expense is an important consideration, screens of flowering shrubs are handsome, provide color and protection during the out-of-doors seasons.

When it's the looks of the house

"AFTER 10 YEARS in a house, you spend your time digging up the things you spent the first two years planting."

### Aluminum Paint Used

Aluminum paint is often used as a barrier over bituminous paints and oil stains to prevent them from bleeding through and discoloring finishing coatings. Painters frequently use aluminum paint as a sealer when changing the color of interior woodwork which previously was stained mahogany. After aluminum paint is thoroughly dry, it can be finished with white or any light tint.

and grounds you're concerned about, there are fences, clipped hedges and flowering hedges. In either case, the advice of a good nurseryman will be helpful.

Foundation plantings are attractive, but not as important today as in the days of high ugly foundations. Most new home owners, operating on limited budgets, find it better to sink their money in unit plantings—a corner clump or a border screen—than to scatter bushes and specimen trees in a confused pattern around the lawn.

### Advantages of Landscaping

Basically, landscaping is designed to tie the home and its grounds into a single, handsome and integrated package. It also goes a long way toward making a house more pleasant to live in, to provide sunlight and shade in the proper proportions and at the desired time for the out-of-doors living portions, to screen less attractive areas. And the whole thing should be designed for ease of maintenance.

All this takes imagination and, above all, patience. A well landscaped place was not built in a day nor in a year. But in the long run, planning and caution saves money—and, ultimately, muscle when today's young tree becomes a towering giant.

## U-Shaped Kitchen In Favor

The U-shaped kitchen has come into favor because of its allowance for efficient arrangement in the saving of steps.

However, the placement of doors and windows in an individual kitchen and the amounts of wall space available usually dictate the arrangement of kitchen equipment.

A general and flexible rule is to think of each division of appliances, adjacent cabinets and work surfaces as a "work center."

The major work centers of a kitchen are usually around the sink and china cupboards, the range and pan storage compartments, and the mixing and refrigeration area. Greatest convenience results when the sink is located between the range and the mixing center.

According to various tests, the mixing center, which includes refrigerator and food storage, is best located near the service door. The refrigerator door should open away from the mixing counter.

## Oil Paint Is Vapor Barrier

Several coats of high gloss oil paint over plaster has been found to provide a very effective vapor barrier in houses in which such a barrier has not been provided in the walls.

Finish coats of flat paint, or wall paper can be placed over the high gloss paint without affecting its value. Aluminum paint, or several coats of shellac should be equally effective in keeping indoor moisture from working into outer walls.

### Room Deodorizers

Electric deodorizers, which blow room air through activated carbon, can absorb and hold as much as 15 per cent of the weight of the carbon in doors and gaseous impurities.

### Sharpening A File

Sometimes a dull file can be sharpened by soaking it for about 20 minutes in a dilute solution of sulphuric acid.

## Condensation Greater In North States

There are more condensation troubles in houses in northern regions than in the South.

Engineers for the Housing and Home Finance Agency say such problems arise most commonly north of the 35-degree average January isotherm.

"This line approximates the northern boundaries of California, Arizona, New Mexico, Oklahoma, Arkansas, Kentucky, and Virginia," they say.

## Emergency Ladder Often Needed

An emergency stepladder can be created with a minimum of effort from an ordinary 8-foot or 10-foot straight ladder, suggests the American Builder, trade publication of home builders.

Merely take two 2 by 4s of the same length as the ladder. Make deep notches in one end of each length to fit the top rung of the ladder securely.

Nail pieces of 1 by 4s across these uprights for bracing, making the bottom board about 6 inches longer than the top board. This spreads the legs for safety.

Fit the top rung into the notches, spread the legs about 5 feet apart and use a rope to hold them in that position.

### Flat Paint Radiates

When painting radiators or exposed hot water or steam risers used partly for heat in bathrooms, you can get more heat through flat paint than through a glossy surfaced coating. Metallic finishes such as gilt or aluminum paint transmit the least heat.

Our low-cost home improvement loans help you modernize now... make your dream kitchen come true.
